Vendor: Microsoft

Exam Code: 70-633

Exam Name: TS: Microsoft Office Project Server 2007, Managing Projects

Version: DEMO

QUESTION 1
You are the IT professional who has ever worked in an Enterprise Project Management (EPM)
environment.
You are experienced in managing and supporting projects by using Microsoft Office Project
Professional 2007 and Microsoft Office Project Server 2007.
At present you work in an International company which is named Wiikigo. Currently you are in
charge of the company network and provide technical support for the company.
In Microsoft Office Project Web Access, a proposal is created by you. Some resources of your will
not be working full time but only part time.
Now what you have to do is to capture the types of resources and the estimated effort required
from these resources over the duration of the project.
What action should you perform?

A. The resource utilization should be changed to calculate from the resource plan.
B. Generic resources should be added to the proposal by using the team builder and assigned to
    tasks. Then the proposal should be published.
C. After resources are added to the proposal by using the team builder, they should be assigned to
    tasks. Then the proposal should be published.
D. The proposal should be published and a resource plan should be created. Then resources should
    be added by using the team builder, and the resource plan should be published.

Answer: D

QUESTION 2
You are the IT professional who has ever worked in an Enterprise Project Management (EPM)
environment.
You are experienced in managing and supporting projects by using Microsoft Office Project
Professional 2007 and Microsoft Office Project Server 2007. At present you work in an
International company which is named Wiikigo. Currently you are in charge of the company
network and provide technical support for the company.
You are developing a project that is published to Microsoft Office Project Server 2007.
You have identified the resources you want to work on your project. In Microsoft Office Project
Web Access, you need to propose these resource assignments so that senior management can
review and approve them.
What should you do?

A. After the named resources you want are assigned to the tasks in your plan with a booking type of
    Proposed, the booking type should be changed to Committed after you get approval.
B. After generic resources are assigned to the tasks in your plan with a booking type of Committed,
    generic resources should be replaced with named resources after you get approval.
C. After the named resources you want are assigned to the tasks in your plan with a booking type of
    Committed, the plan should be saved. Then it should be published after you get approval.
D. After generic resources are assigned to the tasks in your plan with a booking type of Proposed,
    the generic resources should be replaced with named resources after you get approval.

Answer: A
