Exam Name: SCO OpenServer Release 6 Master Advanced
Certified Engineer

Version: DEMO

QUESTION 1

How many octets are reserved for the HOST portion of a Class A IP address (with no subnets)?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C

QUESTION 2

What does the Internet Protocol level of the TCP/IP protocol stack use to verify that incoming data is for this host?

- A. The Ethernet address
- B. The IP address
- C. Cyclic Redundancy Check (CRC) error checking
- D. The port number

Answer: B

QUESTION 3

Which command, if run on an SCO OpenServer system with an IP address of 192.168.11.11, would send packets onto the network?

- A. ping 127.0.0.1
- B. ping localhost
- C. ping 192.168.11.11
- D. None of these commands would send packets onto the network.

Answer: D

QUESTION 4

Which item is NOT a function of the UnixWare 7 Network Client Manager?

- A. configuring /etc/hosts file entries
- B. selecting a DNS server to use
- C. selecting an NTP server to use
- D. selecting a DHCP server to use

Answer: D

QUESTION 5

Which statement regarding subnets is FALSE?

- A. A Class B network is rarely subnetted because it can support over 65,000 hosts.
- B. A Class B network with subnets has fewer IP addresses available for hosts than a Class B network without subnets.
- C. For optimal network performance, a server should be located on the same subnet as most of its

clients.

- D. A message sent from a host on one subnet to a host on another subnet must pass through a router.

Answer: A

QUESTION 6

Your company has a class C network address. You are planning to configure subnets. Each subnet will have at most fifteen (15) hosts. What is the largest number of subnet bits you can use?

- A. 3
- B. 4
- C. 5
- D. 6

Answer: A

QUESTION 7

Which statement regarding routers is TRUE?

- A. A router must have two or more IP addresses.
- B. A router must connect different networking technologies, such as Ethernet and Token Ring.
- C. A router may not also act as a web server.
- D. A router normally routes all packets to all connected networks.

Answer: A

QUESTION 8

Which command line displays routing table information?

- A. netstat -i
- B. netstat -n
- C. netstat -r
- D. netstat in

Answer: C

QUESTION 9

Which of the following types of ISDN devices can be configured for use by a OpenServer 6 system?

- A. An ISDN router connected to the local area network
- B. An ISDN adapter connected by a serial cable
- C. An ISDN adapter installed on an expansion card
- D. All of the above devices are supported by OpenServer 6

Answer: D

QUESTION 10

Which file is used to configure inbound PPP connections?

- A. Devices
- B. Accounts
- C. Auth
- D. Systems

Answer: B

QUESTION 11

Which file does the inetd daemon read to determine which services to provide?

- A. /etc/inetd.conf
- B. /etc/rc.inet
- C. /etc/hosts
- D. /etc/tcp

Answer: A

QUESTION 12

What do the following entries mean when they are placed in the .rhosts file in the user sandys home directory on the host aruba:

jamaica

jamaica bob

- A. sandy on aruba trusts all users on jamaica
- B. sandy on aruba trusts sandy and bob from jamaica
- C. sandy on aruba trusts all users on jamaica, except bob
- D. sandy on aruba trusts all users on jamaica for rlogin and rcp, and the user bob is also trusted for rcmd

Answer: B

QUESTION 13

Which record type is found on primary servers and includes a serial number as part of its data?

- A. A
- B. MX
- C. PTR
- D. SOA

Answer: D

QUESTION 14

What file is used to configure a DNS client?

- A. /etc/hosts
- B. /etc/resolv.conf
- C. /etc/resolve.conf
- D. /etc/default/dns

Answer: B

QUESTION 15

What is the default webserver on an SCO OpenServer 6 system?

- A. Apache
- B. SCOadmin
- C. Netscape
- D. Konquerer

Answer: A

QUESTION 16

Which statement describing the Network Time Protocol (NTP) is TRUE?

- A. NTP is used to share users schedules and calendars over the network.
- B. NTP is used to synchronize system clocks over the network.
- C. NTP is used to gather CPU time statistics over the network.
- D. NTP is used to balance process loads over the network.

Answer: B

QUESTION 17

The following entry in the /etc/hosts.allow file allows access from which IP addresses?

tftpd: 100.75.50.0/255.255.255.0

- A. 100.75.10.25
- B. 100.75.50.200
- C. 100.75.200.25
- D. They are all allowed.

Answer: B

QUESTION 18

Which packets can a packet filter restrict?

- A. Incoming packets only
- B. Outgoing packets only
- C. Either incoming or outgoing packets
- D. A packet filter must restrict both incoming and outgoing packets.

Answer: C

QUESTION 19

What directory is used to store the Samba configuration file smb.conf?

- A. /usr/lib/samba
- B. /etc/samba/conf
- C. /etc/samba
- D. /var/samba

Answer: C

QUESTION 20

Which statement best describes the Dynamic Host Configuration Protocol (DHCP)?

- A. DHCP enables SCO OpenServer servers to configure their own network configuration at boot time.
- B. DHCP enables a Windows client to configure its network configuration at boot time, using information received from an SCO OpenServer server.
- C. DHCP enables SCO OpenServer servers to configure their network configuration at boot time, using information received from another Windows client.
- D. DHCP enables a Windows client to configure only its IP address, using information received from an SCO OpenServer server.

Answer: B

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
