**Exam Name:** Oracle Hyperion Financial Management 11  
Essentials

**Version:** DEMO

### QUESTION 1

Identify the three true statements about security classes.

- A. Security classes are grouping mechanisms for assigning security access to sets of related members, documents, or other objects.
- B. Access levels for security classes include metadata, read, promote, and none.
- C. Security classes are assigned to FDM locations in addition to FM objects.
- D. Security classes cannot be created in EPMA by creating a Security Class dimension and associating it.
- E. Security classes are created in Classic FM under Load Tasks.

**Answer:** ABC

### QUESTION 2

For a classic application, what are the two valid methods to extract metadata to a text file?

- A. You can extract metadata using the EPMA file generator.
- B. Metadata can be extracted from within FM under extract tasks.
- C. Metadata can be extracted from within EPMA Dimension Library.
- D. Metadata can be extracted from the File > Export menu.
- E. Metadata can be extracted from an FDM application.

**Answer:** AB

### QUESTION 3

What is the primary purpose of Extended Analytics in FM?

- A. Exports Financial Management metadata and data to an Essbase database
- B. Exports Financial Management metadata and data to a relational database
- C. Exports Financial Management metadata and data to an Excel pivot table
- D. Provides analytic capabilities directly against the Financial Management application

**Answer:** A

### QUESTION 4

The Audit Intersection link in Data Grid menus takes the user to:

- A. The Data Audit listing for the cell
- B. The FDM location used to load the data
- C. The database log for the data storage table
- D. The Task Audit page
- E. Line item details

**Answer:** B

### QUESTION 5

How can an administrator get a list of security classes AND assigned users defined in the FM application?

- A. Select Document > Reporting > Security > Security report.

- B. Select Tasks > Extract Tasks > Extract Security.
- C. Select Tasks > Extract Tasks > Extract Metadata.
- D. In the EPMA Dimension Library, under the Security Class dimension for the application, right-click the application and select Assign Access Control, then select Security reports, and choose Classes by user.
- E. In Shared Services, right-click the application and select Assign Access control, then select Security reports, and choose Classes by user.

**Answer: B**

#### **QUESTION 6**

The organization by period feature is used for what two purposes?

- A. Segregating rules by month and year
- B. Controlling when entities consolidate into specific parents
- C. Organizing the period dimension into multiple hierarchies
- D. Managing the ownership percentage of one entity by others
- E. Maintaining stored data values for changes in the Entity structure over time

**Answer: BE**

#### **QUESTION 7**

If Sample Company 1230LAP has an intercompany balance with sample company PQR, when is the balance eliminated, assuming that consolidation rules have not been enabled in Application Settings?

- A. All eliminations occur within the uppermost member on each of the entity dimension hierarchies.
- B. Eliminations occur in the [Elimination] value members of the children of the first common parent entity.
- C. Eliminations occur in the [Elimination] value members of the children of the first common parent account.
- D. If the consolidation rule in Application Settings is not enabled, the intercompany accounts do not eliminate.

**Answer: B**

#### **QUESTION 8**

You are designing the dimensionality for your Financial Management application. Identify the two true statements about dimensionality in FM.

- A. Scenario dimension contains members such as CYActual, CYBudget, and PYActual.
- B. Value dimension contains Periodic, year-to-date, quarter-to-date, and any custom members added by the administrator.
- C. Value dimension contains Entity Currency, Entity Curr Adj, Entity Curr Total, Parent Currency, and any currency members added by the administrator.
- D. The preferred method to add detail to accounts is to build subaccounts into the Accounts dimension.
- E. The Intercompany Partner dimension is managed by FM based on settings in the Entity dimension.

**Answer: CE**

**QUESTION 9**

A Classic FM application profile contains which three components?

- A. Frequency
- B. Calendar
- C. Dimension Associations
- D. Language(s)
- E. Scenario

**Answer:** ABD

**QUESTION 10**

Identify the three true statements about Financial Reporting.

- A. Financial Reporting provides highly formatted, printable reports for FM applications.
- B. Financial Reporting provides ad hoc reporting capabilities for FM applications.
- C. Financial Reporting document types include reports, books, snapshots, and snapshot books.
- D. You can create a single P&L report and run that report for any member in the Entity dimension

**Answer:** ACD

## Thank You for Trying Our Product
