QUESTION 1
A user has a perimeter firewall and up-to-date antivirus software. The user is asking what else they can do to improve their security. Which of the following will have the MOST impact on network security? (Select TWO).

A. Install additional antivirus software
B. Disable screen savers
C. Conduct a daily security audit
D. Assign security rights based on job roles
E. Use strong passwords

Answer: DE
Explanation:
To improve security, assign security rights based on job roles. You need to give least amount of privilege to users so that they can do their jobs without having access to resources that have nothing to do with their job roles.

QUESTION 2
Drag and Drop Questions

Answer:

QUESTION 3
A technician is trying to prevent a local application from reaching the web due to security concerns. Which of the following solutions could BEST prevent the application from reaching the web? (Select TWO).

A. Configure the workstation for a static IP
B. Disable all wireless network connections
C. Remove shortcuts to the application
D. Block the application in Windows Firewall
E. Change network location to Work
F. Reroute the web address in HOSTS file

Answer: DF
Explanation:
Use Windows firewall to restrict an application from reaching the web. Alternatively you can also reroute the web address in the HOST file.

QUESTION 4
A user has installed two new drives in one of the computers in the computer lab and has been unable to format Disk1 from the command prompt.

The lab requires that Disk1 be a dynamic disk configured with two partitions. The first partition must be 256,000 MB in size and mapped to drive F. The second partition must be 512,000 MB in size and mapped to drive G.

The new partitions must be formatted to ensure that users' files can be secured from other users and that the disk must be configured to account for future redundancy.

Instructions: Conduct the necessary steps within the Disk Manager to accomplish these tasks. When you have completed the simulation, please select the Done button to submit.
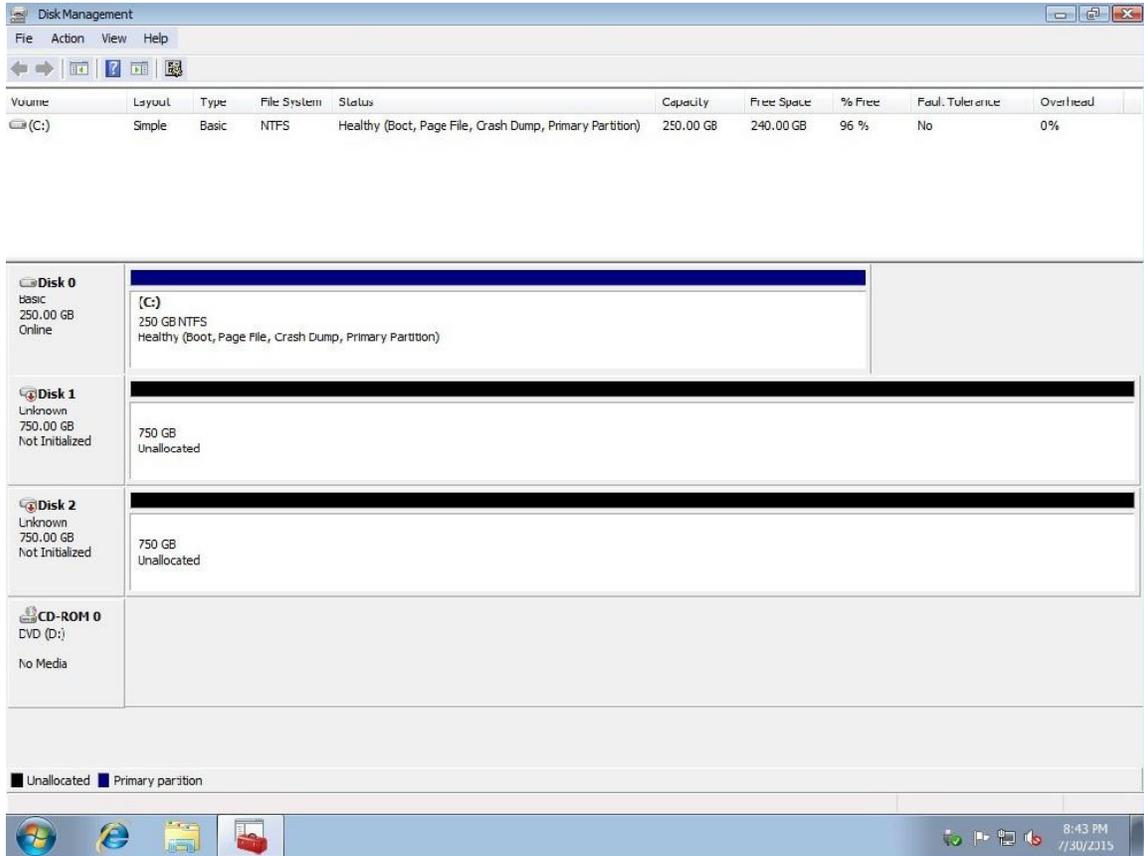

Answer:

```
Review the explanation for all details
```

1. Right click on disk 1, click on initialize
2. Choose disk and option as MBR. Hit ok.
3. Again, right click on disk 1 and choose convert to dynamic disk.
4. Now right click on disk 1 and choose new simple volume.
5. Specify storage as 256000 and assign a drive letter F and choose file system as NTFS and click finish.
6. Do the same thing for rest of space of disk 1, assigning 512000MB and using Disc G

Here are the screen shots showing this process:

QUESTION 5
A user has downloaded and installed a browser add-on that causes the browser to hang. The PC has very slow system response when rebooted. Which of the following should a technician do to

troubleshoot this problem?

A. Run System Restore, update antivirus program, and run an antivirus scan.
B. Remove all Internet temporary files, run an antivirus scan, and reboot using Last Known Good Configuration.
C. Remove all temporary files, turn off System Restore, update and run an antivirus scan.
D. Run an antivirus scan, Run Disk Cleanup, and reboot into Safe Mode.

Answer: C
Explanation:
This might be the sign of a virus infecting the system. First, remove all temporary Internet files on your computer. Viruses are downloaded through software or a webpage. And normally it resides in Temporary Internet Files folder. Now turn off system restore because you don't want to load a previous state on the computer with the virus still lingering the digital wild. Run an antivirus program to clean infected files.

QUESTION 6
Which of the following steps would allow display output from a laptop to an external display? (Select TWO).

A. Press the appropriate Function Key combination
B. A second video card in the Express card slot
C. Disconnect the integrated display
D. Enabling second monitor in the Windows Display Settings
E. Loading external monitor drivers on the laptop

Answer: AD
Explanation:
First enable second monitor in Windows Display settings. After that press the function key along with the assigned key to display the output on an external monitor.

QUESTION 7
When setting up a new wireless router, which of the following actions should the technician take FIRST in order to secure the network? (Select TWO).

A. Disable unused ports
B. Change the SSID
C. Position the antennas to prevent outside access
D. Enable MAC filtering
E. Change the default user name

Answer: BE
Explanation:
The basic tasks to secure a network is to change SSID and the default user name. This is the basic security a user can employ to secure the network immediately.
