

Vendor: CISCO

Exam Code: 642-188

Exam Name: Implementing Cisco TelePresence Installations (ITI)

Version: DEMO

QUESTION 1

What is the valid range of gain for the correct white color balance?

- A. greater than 1 and less than 5
- B. greater than 2 and less than 5
- C. greater than 1 and less than 7
- D. greater than 2 and less than 7

Answer: C

QUESTION 2

Given the following:

Cisco Telepresence endpoint A:

- Phone field Disable Speakerphone and Headset is checked
- DN configuration Auto answer is enabled

Cisco Telepresence endpoint B:

- Phone field Disable Speakerphone and Headset is unchecked
- DN configuration Auto answer is enabled

What happens when Cisco Telepresence endpoint A calls Cisco Telepresence endpoint B?

- A. Cisco Telepresence endpoint A gets a fast busy
- B. Cisco Telepresence endpoint B gets a ring and the call will establish as an audio-only call out of the Cisco IP-Phone
- C. Cisco Telepresence endpoint B gets a ring and the call will establish as a video-only call
- D. Cisco Telepresence endpoint B gets a ring and the call will establish, but there is no audio or video

Answer: B

QUESTION 3

How should directory number of the phone and the Cisco Telepresence endpoint be configured in the Cisco Unified CallManager?

- A. As a shared line where the codec and IP Phone share the same directory number
- B. As a single line for the codec and a single line for the phone using the same directory number
- C. As an overlay line using the same directory number
- D. As a single line for the phone and it only has a directory phone number. The codec uses the IP address of the phone

Answer: A

QUESTION 4

What is not a feature of the Cisco Telepresence System 500?

- A. The system has a built-in embedded microphone array
- B. The system supports life-size images on the display
- C. The system has a built-in facade lighting control
- D. The system has two embedded speakers to support wideband audio

Answer: B

QUESTION 5

Which two statements describe the design goals for the Cisco Telepresence system? (choose two)

- A. Creating a uniform feeling across all installations helps to create the illusion of participants being in the same room
- B. Cisco does not recommend colors so that customers can choose a palette that best complements their corporate standards, while creating an environment that is both warm and inviting
- C. Customers should use different colors in each of the Cisco Telepresence rooms to help identify the different locations
- D. Textures and adornments on the walls should not be similar to those of the walls in the other rooms
- E. Repeatability strengthens the feeling of a common seamless environment which enhances the overall experience

Answer: AE

QUESTION 6

Which statement is correct when focusing the camera on the Cisco Telepresence System 500? (Choose two)

- A. The green rectangle on the display is aligned with the small target
- B. The green rectangle on the display is aligned with the large target
- C. The red rectangle on the display is aligned with the small target
- D. The red and green bars must be the exact same length for proper calibration
- E. It does not matter which target is aligned with which rectangle as long as each rectangle is aligned with one of the targets

Answer: D

QUESTION 7

Which statement is correct when discussing the Cisco TelePresence System 1100?

- A. The system is designed for one to two participants on camera in Cisco Telepresence meetings
- B. The system is designed for two or six participants to be displayed on camera at one time
- C. The system incorporates the design of the Cisco Telepresence System 1300. However, it has a single 37 inch plasma
- D. Video integration with digital signage is supported during a Cisco Telepresence call

Answer: A

QUESTION 8

The Cisco TelePresence System 1100 and 1300 left and right speakers are connected to which component?

- A. codec
- B. audio extension box
- C. POU
- D. light control box

Answer: A

QUESTION 9

Which two statements are correct when connecting a laptop direct to a codec to issue commands from the CLI? (Choose two)

- A. Connect a PC to the secondary Ethernet camera port of the Cisco TelePresence codec
- B. The Cisco TelePresence codec has two internal subnets (10.0.2.x / 24 and 172.16.2.x / 24) that are reserved for the secondary camera port
- C. By default the username is Admin with a password of Cisco
- D. Cisco TelePresence System IP address on the secondary camera port is the first address in the subnet that is assigned to your laptop by DHCP

Answer: AD

QUESTION 10

What is the command path and action on the Cisco TelePresence codec WebGUI to place the camera in loopback mode?

- A. Configuration > Hardware Setup > Cameras and click Start
- B. Hardware Setup > Configuration > Cameras and click Start
- C. Troubleshooting > Hardware Setup > Cameras and click Start
- D. Configuration > Troubleshooting > Cameras and click Start

Answer: C

QUESTION 11

Which would be considered the best environment to house a dedicated Cisco TelePresence system?

- A. a conference room in the corner of a building with the best view
- B. a conference room next to the elevator for easy accesibility
- C. a conference room along an interior corridor
- D. an open space in the demonstration area of a briefing center

- A. IP address
- B. IP address subnet mask
- C. gateway IP address
- D. NTP server IP address
- E. DNS server IP address

Answer: ABC

QUESTION 13

Refer to the exhibit.

Identify the port number where the A/V expansion box should connect

- A. 4
- B. 5
- C. 6
- D. 7
- E. 8
- F. 9
- G. 10
- H. 11
- I. 12
- J. 13

Answer: I

QUESTION 14

Which two statements are correct when calibrating the Cisco Telepresence cameras? (Choose two)

- A. If the room uses fixed artificial lighting, click the Disable radio button for the Camera Auto Brightness and Camera Auto Color Balance
- B. If the Auto Adjust test to automatically adjust lighting and color balance fails, you may need to add more light
- C. If the room uses fixed artificial lighting, click the Enable radio button for the Camera Auto Brightness and Camera Auto Color Balance
- D. If the room uses outside lighting, click the Disable radio button for the Camera Auto Brightness and Camera Auto Color Balance

Answer: AB

QUESTION 15

When booting Cisco TelePresence 500, how do you determine which IP address is used by the codec before connecting to the codec via WebGUI?

- A. The codec uses 10.1.1.1 as its default IP setting
- B. The IP address is displayed on the phone user interface
- C. The IP address is displayed during the boot process on the plasma
- D. The codec uses 192.168.200.2 as its default IP setting

Answer: C

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
