- A. Predefined mapping templates for objects in SAP SRM
- B. Predefined content for mapping to legacy systems
- C. SAP BusinessObjects Data Integrator
- D. Predefined migration content for the SAP Best Practices Baseline Package, documentation, and mapping templates

Answer: CD

QUESTION 3

SAP Business All-in-One solutions always combine content and software applications. Which SAP applications are offered as part of SAP Business All-in-One? (Choose three)

- A. SAP Business Objects
- B. SAP Event Management
- C. SAP ERP
- D. SAP CRM
- E. SAP Business One

Answer: ACD

QUESTION 4

The Power list provides a general overview of your work environment and the related business objects like sales orders, billing documents, or stock items.

With Power lists, users can perform their business tasks quicker, and business processes become faster as a result.

What are the characteristics of a Power list? (Choose three)

- A. The Power list consists of tabs, and each tab contains a different query.
- B. It is not possible to set a filter within a data table in the Power list.
- C. The layout of the Power list can be personalized by choosing Settings and determining which columns are shown and how many rows are displayed.
- D. A new Power list can be created directly using the SAP NetWeaver Business Client (NWBC).
- E. The Power list can be divided in two areas: the Query area and the List area.

Answer: ACE

QUESTION 5

SAP Best Practices offers the Demo Assistant tool to support quick preparation of the data in the demo system.

Which task can you perform with the Demo Assistant?

- A. Delete unnecessary Customizing settings.
- B. Record system simulations used to run offline customer demos.
- C. Change any type of master data and transaction data.
- D. Change the descriptions of master data and organizational data.

Answer: D

QUESTION 6

The risks reviewed during risk management typically affect many business areas. The risk review should include representatives from the affected areas to ensure effective analysis and response development.

When do you start tracking risks in a project?

- A. During the realization phase
- B. During the delta requirements phase
- C. During the evaluation phase
- D. During the pre-project activities phase

Answer: C

QUESTION 7
