

Vendor: IBM

Exam Code: C2020-001

Exam Name: IBM OpenPages Developer Fundamentals

Version: DEMO

QUESTION 1

In IBM OpenPages, you want to configure a profile. Which three functions are available? (Choose three.)

- A. Associate users.
- B. Add new fields to the database.
- C. Set localized object text.
- D. Set up a home page.
- E. Configure views for an object type.

Answer: ADE

QUESTION 2

You want to use Computed Fields to dynamically calculate a value based on other fields every time an object is viewed. You decide to have values persisted rather than dynamic. What are two reasons to do this? (Choose two.)

- A. The value is calculated only when fields on an object are saved; dynamically computing the value for each view is unnecessary.
- B. Dynamic values require fields to be editable, so persisting the value through other means allows you to make the field read-only.
- C. Persisting a calculated value based on many other objects allows you to use that value in CommandCenter reports more efficiently.
- D. Computed Fields are not visible in Past Reporting periods.

Answer: AC

QUESTION 3

What are three platform object types that are installed by default on all OpenPages systems'? (Choose three.)

- A. Process
- B. Business Entity
- C. File
- D. Issue
- E. Risk

Answer: BCD

QUESTION 4

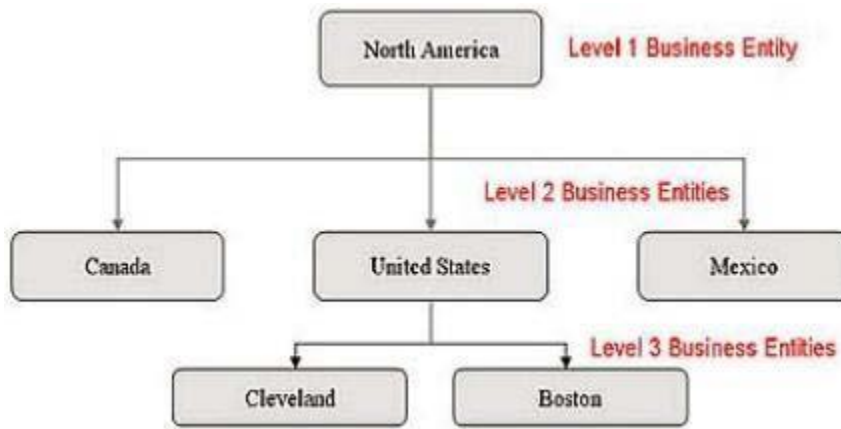

Which three statements are true about required fields? (Choose three.)

- A. A field can be defined to be required for an object type.
- B. A field can be defined to be required for a field definition.
- C. A field can be defined to be required for a profile.
- D. A field can be defined to be required by a field dependency rule.
- E. A field can be defined to be required by a dependent picklist.

Answer: BCD

QUESTION 5

Click the Exhibit button.

Referring to the exhibit, what is the correct Folder Path column value required so that the Boston entity will be imported through FastMap?

- A. /North America/Mexico/United States/Canada
- B. North America/United States/
- C. United States/Cleveland/Boston
- D. /North America/United States/Boston

Answer: D

QUESTION 6

Using OpenPages, you want to define triggers to perform actions. What are three scenarios where you would do this? (Choose three.)

- A. Creating an Object
- B. Creating an Object type
- C. Associating Objects
- D. Copying Objects
- E. Creating a user

Answer: ACD
