Vendor: HP

Exam Code: HP0-S14

Exam Name: Design & Implementation of HP SIM for ISS Solutions

Version: DEMO

QUESTION 1
What are functions of the Version Control Agent (VCA)? (Select two.)

A. The VCA logs activities, such as software installations.
B. The VCA uses SSH to securely communicate with the VCRM.
C. The VCA can use a remote repository that is not managed by a VCRM.
D. The VCA is used to install firmware updates on HP BladeSystem network switches.
E. The VCA retrieves software and firmware inventory from the Management Information Base (MIB).

Answer: AE

QUESTION 2
The Initial Data Collection task collects information for newly discovered devices. When does this task run?

A. every 5 minutes for SNMP-based systems
B. when a new system is added to the database
C. automatically with every polling task that is run on the CMS
D. every 24 hours for desktops and every 12 hours for servers

Answer: B

QUESTION 3
As a system administrator you notice that on the all systems list in HP SIM, the status is not available for some software versions. What are possible causes? (Select two.)

A. The software status polling task has not yet run.
B. The trust relationship is not set correctly on the managed server.
C. There are insufficient user rights to view the software status of these servers.
D. OpenSSH is not configured properly on the Central Management Server and the managed device.
E. The Version Control Agent is pointing to a Version Control Repository Manager not installed on the HP SIM server.

Answer: AB

QUESTION 4
HP SIM communicates with the VCA and VCRM using the Secure Task Execution. How is this enabled?

A. by configuring SMH to trust the CMS
B. by configuring the VCRM to trust the VCA
C. by importing the SSH public key into the SMH
D. by importing the SSH private key into the SMH

Answer: A

QUESTION 5

You want to use HP SIM to deploy the ProLiant Support Pack to a remote ProLiant server. The remote server has no management agents installed yet. How should you proceed?

A. Install OpenSSH first to establish the trust and then use the Install Software and Firmware option.
B. Create a user on the remote server known by HP SIM and then use the Install Software and Firmware option.
C. Use the Initial ProLiant Support Pack Install and provide the login credentials for the remote server in the setup wizard.
D. Create a trust relationship between the remote server and the CMS and then use the Install Software and Firmware option.

Answer: C

QUESTION 6
Who can view, edit, and delete private collections?

A. The user can view, edit and delete.
B. The creator can view, edit, and delete.
C. The user can view; the creator can only edit and delete.
D. The creator with limited configuration rights can view; the administrator can edit and delete.

Answer: B

QUESTION 7
Which utility in HP SIM enables you to customize identification by creating rules that map system object identifiers (OIDs) to product categories and names of your choice?

A. SNMP getconfig utility
B. Device Type Manager (DTM)
C. System Type Manager (STM)
D. SNMP to WBEM service layer

Answer: C

QUESTION 8
You just finished installing HP SIM and want to discover new devices on the network. Besides automatic and manual discovery, which option is available?

A. Import a Hosts file.
B. Use the mxdiscovery command.
C. Register the MIBs using the MIB compiler.
D. Use a database tool to add the device directly into HP SIM.

Answer: A

QUESTION 9
Click the Exhibit button.
Which link enables you to configure the SNMP community string settings?

A. Trap
B. Security
C. SNMP Agent
D. Management Agents

Answer: B

QUESTION 10
Which function of the command mxquery is new to HP SIM 5.1?

A. The mxquery command can provide output in XML format.
B. The language of the query results depends on the CMS locale.
C. Users with limited configuration rights privileges can execute mxquery.
D. To run mxquery, you no longer need access to the file system where HP SIM is installed.

Answer: A
