

Exam Code: HP0-J25

Exam Name: HP StorageWorks AIS 2008 Delta Exam

Vendor: HP

Version: DEMO

Part: A

1: Which critical events does the Device Specific Module (DSM) impact? (Select three.)

- A.error handling
- B.bus initialization
- C.request handling
- D.device initialization
- E.OS kernel interface
- F.plug and play interface

Correct Answers: A C D

2: On an EVA, which event log file is used to log disk shelf events?

- A.Controller Event log file
- B.Hardware Event log file
- C.Storage Cell Event log file
- D.Management Event log file

Correct Answers: A

3: Which controller components of an EVA4400 are customer replaceable?

- A.only cache batteries
- B.the entire shelf as one unit
- C.all components that are available as spare parts
- D.all components you can replace without opening the shelf

Correct Answers: C

4: What can you use to display performance data provided by the EVA?

- A.SIM
- B.SSSU.exe
- C.Command View EVA
- D.performance monitor of the Microsoft Windows operating system

Correct Answers: D

5: Which types of spares are available in an MSA2000? (Select three.)

- A.vdisk spare
- B.array spare
- C.global spare
- D.default spare
- E.dynamic spare
- F.dedicated spare

Correct Answers: A C E

6: Which MSA2000 feature disables cache mirroring in active-active mode and might improve the I/O performance?

- A.write-back cache mode (WBCM)

- B.write-through cache mode (WTCM)
- C.super-sequential cache mode (SSCM)
- D.independent cache performance mode (ICPM)

Correct Answers: D

7: How do you acquire management access to fabric switches?

- A.through the FCIP link
- B.by using SmartStart EVA
- C.by using a Telnet connection
- D.through Command View EVA

Correct Answers: C

8: You are starting Command View EVA by using the SmartStart EVA CD to manage a storage system. Which statement is correct?

- A.You must enable the Advanced mode in SmartStart EVA and right-click on the storage system icon.
- B.You must specify the IP address of the management server and select the storage system to manage within Command View EVA.
- C.You must specify only the name of the storage system; SmartStart EVA will automatically locate and start Command View EVA for this system.
- D.You must start Command View EVA from the SmartStart EVA CD without installation and select the storage system to manage within Command View EVA.

Correct Answers: B

9: When you add disks to a disk group on an EVA4400, what is a best practice to maintain redundancy to multiple disk failures?

- A.multiples of 2
- B.multiples of 6
- C.multiples of 8
- D.multiples of the number of disk shelves

Correct Answers: C

10: On an EVA4400, what is a requirement for a fully allocated snapshot in relation to its source?

- A.It must be located in the same disk group.
- B.It must be located in a different disk group.
- C.It must be assigned to a higher redundancy level.
- D.It must be assigned to the same redundancy level.

Correct Answers: A
