Answer: C

QUESTION 4
Joshua is using the Dojo List Text Box control to display values of the department code for the internal forum XPages application. Joshua is planning to use these values: Research & Development (rd), Marketing (mkt), Engineering (eng), and Human Resources (hr). He needs to store the department code in the dept field but wants to display a readable label to the user. How can Joshua configure the Value Picker control to display the correct information in the Dojo List Text Box control and store the department code in the underlying field?

A. Select the Value Picker control and set the labelSeparator property to "|".
   The Dojo List Text Box control will use the same value to display the correct label.
B. Select the Value Picker control and set the displaySeparator property to "|".
   The Dojo List Text Box control will use the same value to display the correct label.
C. Select the Value Picker control and set the labelSeparator property to "|".
   Next select the Dojo List Text Box control and set the displayLabel property to "true".

D. Select the Value Picker control and set the displaySeparator property to "|".
Next select the Dojo List Text Box control and set the displaySeparator property to "|".

Answer: C

QUESTION 5
What is the purpose of using the Dynamic View Panel?

A. It allows users to filter what content displays in the view.
B. It allows users to customize a view by selecting the columns they want to see.
C. It allows developers to display the contents of a view based on the view's definition.
D. It allows developers to display the contents of any view by defining a faceted area for each view.

Answer: C

QUESTION 6
How would a developer enable partial refresh using a Dynamic Content control?

A. partialEvents="true"
B. partialRefreshMode="true"
C. No action needed. By default, partial refresh is enabled.
D. getComponent("dynContent").setRefreshMode("Partial")

Answer: A

QUESTION 7
What does setting the expandLevel property of a Navigator control to "0" do when the expandable property is set to "true"?

A. expands all the Navigator control levels
B. expands the first (index 0) Navigator child node
C. makes the Navigator control show only the parent levels
D. prevents the Navigator from displaying a twisty on levels that can be expanded

Answer: C

QUESTION 8
