QUESTION 1
IBM Sterling B2B Integrator (SBI) is installed with a LDAP connection to allow users to log in using their username/password stored in the LDAP server. A user is created in SBI as a local user and the InternalUser password policy is specified. The InternalUser policy states that the password has to be changed every 30 days. After 29 days the SBI security administrator deletes the InternalUser policy from the system. When the user logs in two days later, will the user be prompted to change the password?

A. Yes, because of the configuration of the original password policy.
B. No, because the policy is deleted so the user has no password policy.
C. The user will not be logged in because there is no valid policy specified.
D. No, the policy is irrelevant since the password is managed by the LDAP server.
