Vendor: IBM

Exam Code: A2150-006

Exam Name: Assessment: IBM Tivoli Identity Manager V5.1
Implementation

Version: DEMO

QUESTION 1
Which two join directives can be used when multiple provisioning policies affect the same account? (Choose two.)

A. Xor
B. Not
C. And
D. None
E. Union

Answer: CE

QUESTION 2
Which two options should be included in a custom adapter design document? (Choose two.)

A. supported platforms, Java version, log file locations
B. input requirements, installation instructions, prerequisites
C. process flow diagram, debugging information and log file information
D. prerequisites, supported platforms, process flow diagrams, source code
E. security certificate configuration, installation location, input requirements

Answer: BC

QUESTION 3
Click the Exhibit button.

Based on the organization chart and list of roles, which option is correct for this IBM Tivoli Identity Manager V5.1 configuration?

A. A user in the On Demand Incorporated business unit can be granted the DESIGNER

organizational role.
B. Only users in the Engineering and any sub tree business units can be granted the DESIGNER organizational role.
C. A provisioning policy with DESIGNER organizational role as membership can only be created in the Engineering business unit.
D. Users in the On Demand Incorporated and sub tree business units will automatically be granted the EMPLOYEE organizational role

Answer: A

QUESTION 4
Which information is stored in a certificate used to secure the connection between IBM Tivoli Identity Manager Server and its adapters?

A. certificate expiration date
B. certificate encryption type
C. certificate requester's name
D. certificate encryption strength

Answer: A

QUESTION 5
The Business Continuity Review describes the system availability characteristics of the solution design.
In a typical high availability (HA) configuration, a load balancer is configured in front of several peer masters for the directory server. Which statement is true regarding load balancing in an IBM Tivoli Identity Manager (Tivoli Identity Manager) HA solution design?

A. If a primary master goes down, all traffic to that master is held until the master is available.
B. Load balancing of write traffic is unwise, because it leads to a possibility of an update conflict.
C. If the primary system goes down, the remaining systems do not need to be able to bear the work load.
D. The Tivoli Identity Manager dataservices component will assist the load balancer in the redirecting of requests to one of the other replicated Tivoli Identity Manager servers.

Answer: B

QUESTION 6
Which steps are needed to create the password policy design?

A. define password policy scope, select password settings, document password policy design
B. define password policy requirements, analyze password settings, document password policy design
C. gather current password settings, analyze password policy, define password scope, document password policy design
D. gather password policy requirements, define password policy scope, define password settings, document password policy design

Answer: D

QUESTION 7
Which option is relevant to gathering requirements and creating an IBM Tivoli Identity Manager (Tivoli Identity Manager) system architecture document?

A. formulate list of questions, identify interviewees, identify timelines for project phases, and delegate responsibility
B. formulate list of questions, identify interviewees, identify network topology, and ensure business continuity planning
C. formulate list of questions, identify interviewees, discuss organization chart structure, and discuss Tivoli Identity Manager ACI and group security model
D. discuss firewall rules, discuss certificate installations for HTTPS communication, and discuss Tivoli Identity Manager Web application security and hijack-prevention features

Answer: B

QUESTION 8
Which sequence of actions best describes a secure practice for sensitive data in an IBM Tivoli Identity Manager (Tivoli Identity Manager) database?

A. Schedule periodic database backups regularly in order to prevent losing sensitive data.
B. Enable security on the WebSphere Application Server and disallow running the WebSphere Application Server using a non-root account.
C. Restrict network traffic to those ports or systems needed by the deployment only. If you write your own application and use a Tivoli Identity Manager API to retrieve sensitive data, encrypt the data before sending it over the network.
D. Restrict operating system access to database files. Limit the privileges of the operating system accounts (administrative, root-privileged, or DBA) to the least privileges needed, change the default passwords, and enforce periodic password changes.

Answer: D

QUESTION 9
Given the desired services list and organization structure design, which two options are essential to create a service design? (Choose two.)

A. Define reporting data.
B. Validate human resource data.
C. Define organization requirements.
D. Gather platform business processes.
E. Gather IBM Tivoli Identity Manager access requirements

Answer: CD

QUESTION 10
In which formats can reports from the IBM Tivoli Identity Manager user interface be generated?

A. PDF, CSV
B. TXT, XML
C. PDF, TXT

D. HTML, PDF

Answer: A

QUESTION 11
A simple IBM Tivoli Identity Manager (Tivoli Identity Manager) implementation running on a Windows-based server includes a single AIX platform with two adapters (UNIX and DB2). What are two necessary considerations when creating an upgrade planning document for this scenario?

A. middleware versions and domain trust relationships
B. secure FTP constraints and domain trust relationships
C. middleware versions and operating system release levels
D. secure FTP constraints and operating system release levels

Answer: C

QUESTION 12
Which two options describe components of the Self-Service User Interface that can be included in the customization design? (Choose two.)

A. changing the button text
B. changing the banner colors
C. creating a custom workflow approval process
D. changing the default lifecycle management flow
E. creating new views for IBM Tivoli Identity Manager groups

Answer: AB

QUESTION 13
When performing analysis for designing a global identity policy, which considerations are essential?

A. UID constraints of each managed service type, and the erglobalid of the person object
B. which managed service has the least restrictive UID constraints, and the erglobalid of the person objects
C. UID constraints of each managed service type, and which attributes are available from the person objects
D. which managed service has the least restrictive UID constraints, and which attributes are available from the person object

Answer: C

QUESTION 14
Given the information in the sample Organization Chart, which three pairs of roles are valid in a rule of a separation of duty policy? (Choose three.)

A. Operations and Web Page design
B. Development and Web page design

C. Operations and Production Web Team
D. Web page design and Production Web Team
E. Engineering and Web Infrastructure Engineering
F. Development and Web Infrastructure Engineering

Answer: ADF

QUESTION 15
In preparation for an initial identity or Identity feed to IBM Tivoli Identity Manager (Tivoli Identity Manager) V5.1 which two person attributes are required as a minimum in the feed? (Choose two.)

A. Last Name (attribute sn)
B. Common Name (attribute cn)
C. Organizational Unit (attribute ou)
D. First Name (attribute givenname)
E. Employee Number (attribute employeeNumber)

Answer: AB

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

★ More than 99,900 Satisfied Customers Worldwide.

★ Average 99.9% Success Rate.

★ Free Update to match latest and real exam scenarios.

★ Instant Download Access! No Setup required.

★ Questions & Answers are downloadable in PDF format and VCE test engine format.

★ Multi-Platform capabilities - Windows, Laptop, Mac, Android, iPhone, iPod, iPad.

★ 100% Guaranteed Success or 100% Money Back Guarantee.

★ Fast, helpful support 24x7.
