Exam Name: Riverbed Certified Solutions Professional –
Application Performance Management

Version: DEMO

QUESTION 1

Refer to the exhibit. In the diagram, what does the gray wedge signify?

- A. Unidentified traffic
- B. Parallel effects
- C. Protocol effects
- D. User think time

Answer: B

QUESTION 2

What granularity of data is available on the Service Management Platform (SMP)? (Select 2)

- A. 1 minute
- B. 5 minutes
- C. 1 second
- D. 15 minutes

Answer: CD

QUESTION 3

What do AppResponse Xpert utilization metrics measure?

- A. Inbound traffic to a group and outbound traffic from a group.
- B. The number of turns between servers and clients.
- C. Average size of data transfers to and from business groups.
- D. AppResponse Xpert appliances do not report on utilization.

Answer: A

QUESTION 4

What are the four metric granularities AppResponse Xpert stores?

- A. 1 minute, 5 minutes, 1 hour, 1 day
- B. 5 minutes, 15 minutes, 1 hour, 1 day
- C. 1 minute, 30 minutes, 8 hours, 1 day
- D. 5 minutes, 30 minutes, 60 minutes, 8 hours

Answer: A

QUESTION 5

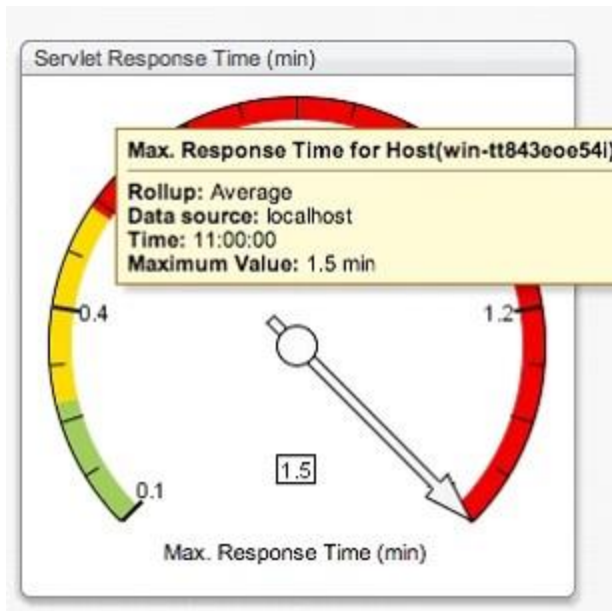

What parameter is used to identify the originating IP in web transaction analysis?

- A. Business group membership
- B. Three-way handshake
- C. X-Forwarded-For
- D. User session tracking identifier

Answer: C

QUESTION 6

Refer to the exhibit. Given that the gauge is at its maximum point, which of these statements apply? (Select 2)

- A. The threshold values came from the data source, AppInternals Xpert.
- B. The absolute worst response time in the dashboard's time range was 1.5 minutes.
- C. The gauge is actually showing the minimum maximum value.
- D. The gauge's value is the average of the maximum servlet response times for the dashboard's time interval.

Answer: AD

QUESTION 7

For a given business group, which metric is most useful to determine how the systems in the business group acting as servers are responding to requests from clients?

- A. User response time (servers)
- B. User response time (clients)
- C. Server response time (servers)
- D. Server response time (clients)
- E. Initial application response time (TCP clients)

Answer: C

QUESTION 8

What is the Command-Line Interface (CLI) command used to filter traffic received by the appliance?

- A. Capturefilter
- B. Captureconfig
- C. Monconfig
- D. Monfilter

Answer: B

QUESTION 9

Which of the following is not a default metric in a Favorites table?

- A. Packet loss (inbound)
- B. Throughput (inbound and outbound)
- C. Connection requests (TCP servers)
- D. Round trip time (outbound)
- E. Server response time (clients)

Answer: A

QUESTION 10

What are the main functions of AppResponse Xpert Database Browsing Insight? (Select 3)

- A. Find top database servers and clients based on criteria such as response times, amount of data returned, and rate of kilobytes or packets returned.
- B. Drill down into detailed data for specific databases, SQL statements, query commands, and other types of data.
- C. Display if exists operations causing lock on databases.
- D. View a time series chart for a specific metric, such as average response time.
- E. Display the execution plan of SQL statments.

Answer: ABD

QUESTION 11

When defining rules for the AppResponse Xpert Database Performance Module, which of these

fields are mandatory? (Select 3)

- A. Database server name or internet protocol (IP) address
- B. Database type
- C. Port number(s)
- D. Table name
- E. Query type

Answer: ABC

QUESTION 12

If a proxy or load balancer changes or hides internet protocols (IPs), how could AppResponse Xpert (ARX) determine the originating IP? (Select 2)

- A. This is not currently supported.
- B. Monitor web traffic in a location where AppResponse Xpert can observe the originating and server IPs directly.
- C. Configure all intervening devices to include X-Forwarded-For (XFF) headers.
- D. AppResponse Xpert is able to expose the originating and server IPs even when intervening devices hide them.

Answer: BC

QUESTION 13

Which data sources are required when creating an "APM End-to-End: .NET" Riverbed Performance Management Dashboard?

- A. AppSensor Xpert, AppInternals Xpert, and BrowserMetrix
- B. AppTransaction Xpert, AppInternals Xpert, and BrowserMetrix
- C. AppResponse Xpert, AppInternals Xpert, and BrowserMetrix
- D. AppSensor Xpert, AppResponse Xpert, and BrowserMetrix

Answer: C

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
