

**Vendor:** Microsoft

**Exam Code:** 70-744

**Exam Name:** Securing Windows Server 2016

**Version:** DEMO

### QUESTION 1

Note: This question is part of a series of question that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is Independent of the other questions in this series. Information and details provided in a question apply only to that question.

Your network contains an Active Directory domain named contoso.com.

The domain contains a file server named Server1 that runs Windows Server 2016.

Server1 has a volume named Volume1.

Dynamic Access Control is configured. A resource property named Property1 was created in the domain.

You need to ensure that Property1 is set to a value of Big for all of the files in Volume1 that are larger than 10 MB.

Which tool should you use?

- A. File Explorer
- B. Shared Folders
- C. Server Manager
- D. Disk Management
- E. Storage Explorer
- F. Computer Management
- G. System Configuration
- H. File Server Resource Manager (FSRM)

**Answer: F**

### QUESTION 2

Hotspot Question

Your network contains an Active Directory domain named contoso.com.

You have an organizational unit (OU) named Secure that contains all servers.

You install Microsoft Security Compliance Manager (SCM) 4.0 on a server named Server1.

You need to export the SCM Pnnt Server Security baseline and to deploy the baseline to a server named Server2.

What should you do? To answer, select the appropriate options in the answer area.

**Answer Area**

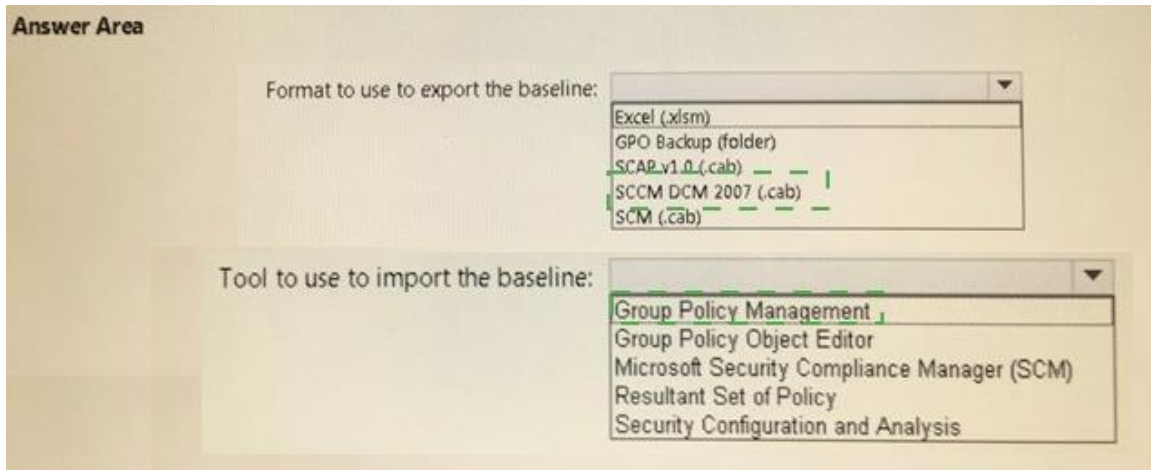

Format to use to export the baseline:

- Excel (.xlsm)
- GPO Backup (folder)
- SCAP v1.0 (.cab)
- SCCM DCM 2007 (.cab)
- SCM (.cab)

Tool to use to import the baseline:

- Group Policy Management
- Group Policy Object Editor
- Microsoft Security Compliance Manager (SCM)
- Resultant Set of Policy
- Security Configuration and Analysis

**Answer:**

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest named contoso.com.

All servers run Windows Server 2016. The forest contains 2,000 client computers that run Windows 10.

All client computers are deployed (from a customized Windows image).

You need to deploy 10 Privileged Access Workstations (PAWs).

The solution must ensure that administrators can access several client applications used by all users.

Solution: You deploy 10 physical computers and configure each one as a virtualization host.

You deploy the operating system on each host by using the customized Windows image.

On each host you create a guest virtual machine and configure the virtual machine as a PAW.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

### QUESTION 4

Your network contains an Active Directory forest named contoso.com.

The forest functional level is Windows Server 2012. All servers run Windows Server 2016.

You create a new bastion forest named admin.contoso.com.

The forest functional level of admin.contoso.com is Windows Server 2012 R2.

You need to implement a Privileged Access Management (PAM) solution.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Raise the forest functional level of admin.contoso.com.
- B. Deploy Microsoft Identity Management (MIM) 2016 to admin.contoso.com.
- C. Configure contoso.com to trust admin.contoso.com.
- D. Deploy Microsoft Identity Management (MIM) 2016 to contoso.com.

- E. Raise the forest functional level of contoso.com.
- F. Configure admin.contoso.com to trust contoso.com.

**Answer:** CF

#### QUESTION 5

Your network contains an Active Directory domain named conioso.com.  
The domain contains 1,000 client computers that run Windows 8.1 and 1,000 client computers that run Windows 10.  
You deploy a Windows Server Update Services (WSUS) server.  
You create a computer group for each organizational unit (OU) that contains client computers.  
You configure all of the client computers to receive updates from WSUS.  
You discover that all of the client computers appear in the Unassigned Computers computer group in the Update Services console.  
You need to ensure that the client computers are added automatically to the computer group that corresponds to the location of the computer account in Active Directory.  
Which two actions should you perform? Each correct answer presents part of the solution.

- A. From Group Policy objects (GPOs), configure the Enable client-side targeting setting.
- B. From the Update Services console, configure the Computers option.
- C. From Active Directory Users and Computers, create a domain local distribution group for each WSUS computer group.
- D. From Active Directory Users and Computers, modify the flags attribute of each OU.
- E. From the Update Services console, run the WSUS Server Configuration Wizard.

**Answer:** AB

#### QUESTION 6

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

Your network contains an Active Directory domain named contoso.com.  
The domain contains a server named Server1 that runs Windows Server 2016.  
Server1 has a shared folder named Share1.  
You need to encrypt the contents of Share1.  
Which tool should you use?

- A. File Explorer
- B. Shared Folders
- C. Server Manager
- D. Disk Management
- E. Storage Explorer
- F. Computer Management
- G. System Configuration
- H. File Server Resource Manager (FSRM)

**Answer:** H

**QUESTION 7**

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

**▪ Start of repeated scenario**

Your network contains an Active Directory domain named contoso.com.  
The functional level of the forest and the domain is Windows Server 2008 R2.  
The domain contains the servers configured as shown in the following table.

Server name	Configuration
Nano1	Nano Server
Nano2	Nano Server
Server2	File server that has a shared folder named DATA
Server3	DNS server that has a DNSSEC-signed zone named adatum.com
Server4	Hyper-V host
Server1	Application server

All servers run Windows Server 2016. All client computers run Windows 10.  
You have an organizational unit (OU) named Marketing that contains the computers in the marketing department.  
You have an OU named Finance that contains the computers in the finance department.  
You have an OU named AppServers that contains application servers.  
A Group Policy object (GPO) named GP1 is linked to the Marketing OU.  
A GPO named GP2 is linked to the AppServers OU.  
You install Windows Defender on Nano1.

**▪ End of repeated scenario**

You need to ensure that you can deploy a shielded virtual machine to Server4.  
Which server role should you deploy?

- A. Hyper-V
- B. Device Health Attestation
- C. Network Controller
- D. Host Guardian Service

**Answer: A**

## Thank You for Trying Our Product

### Braindump2go Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
