

Vendor: Microsoft

Exam Code: 70-537

Exam Name: Configuring and Operating a Hybrid Cloud with
Microsoft Azure Stack

Version: DEMO

QUESTION 1

Your network contains an Active Directory forest named adatum.com.

You deploy an Azure Stack integrated system.

You implement federation between adatum.com and Azure Slack.

You need to ensure that a user named admin01@adatum.com can manage all aspects of Azure Stack from administrator portal.

Which cmdlet should you run?

- A. New-CloudAdminUser
- B. Set-ServiceAdminOwner
- C. Set-AzsUserSubscription
- D. Set-CloudAdminPassword

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/azure/azure-stack/azure-stack-integrate-identity>

QUESTION 2

You have an Azure Stack integrated system.

What are three possible types of records that you can create in Azure Stack DNS? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. NSEC
- B. PTR
- C. SRV
- D. MX
- E. AAA

Answer: BCD

Explanation:

<https://docs.microsoft.com/en-us/azure/dns/dns-zones-records>

<https://docs.microsoft.com/en-us/azure/azure-stack/user/azure-stack-dns>

QUESTION 3

Your company has a Microsoft Azure subscription that contains that tenants configured as shown in the following table.

Tenant name	IP address range	Internal namespace	Number of virtual machines	Number of virtual networks
Tenant 1	192.168.1.0/24	Contoso.com	24	5
Tenant 2	192.168.1.0/24	Contoso.com	30	4

You plan to recreate both tenants in an Azure Stack integrated system. The tenants will be configured to use the DNS service provided by Azure Stack.

Which tenant configuration should you modify to ensure that the tenants can be deployed to Azure Stack?

- A. the number of virtual machines
- B. the number of virtual workers
- C. the internal namespace

D. the IP address range

Answer: A

QUESTION 4

You implement an Azure Stack integrated system.

You receive the following service Fabric warning alert: "The infrastructure role FabricResourceProvider is experiencing issues."

You contact Microsoft support and are instructed to modify the configuration of the Azure Stack integrated system.

You successfully modify the configuration. You need to restart the Azure Stack integrated system. What should you do first?

- A. Connect to the Azure Resource Manager administrative endpoint.
- B. Connect to the privileged endpoint.
- C. From the Azure Stack administrator portal, stop the infrastructure role.
- D. From the Azure Stack administrator portal, restart the infrastructure role.

Answer: D

QUESTION 5

You have an Azure Stack integrated system.

You receive a Storage Resource Provider alert indicating that a file share named SUI_ObjStore_4 on a volume named ObjStore_4 is more than 90 percent utilized.

You verify that none of the storage accounts were recently deleted. You need to remediate the storage usage issue as quickly as possible.

What should you do first?

- A. From the Azure Resource Manager user endpoint, run start-AzsReclaimStorageCapacity.
- B. From the Azure Stack administrator portal, modify the retention period.
- C. From the Azure Stack administrator portal, restart the storage controller infrastructure role.
- D. Contact Microsoft Support.

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/azure/azure-stack/azure-stack-manage-storage-accounts#reclaim>

QUESTION 6

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario.

Your network contains an Active Directory forest named contoso.com. You deploy an Azure Stack integrated system named Prod to a production environment. You also deploy an Azure Stack integrated system named Dev to a development environment. The developers who access Dev change frequently.

The Azure Stack integrated systems and the contoso.com forest are federated. The on-premises

network contains a Hyper-V host that hosts a Red Hat Enterprise Linux virtual machine named Linux1. Linux1 has the following characteristics:

A 2-TB disk
Generation 1
10 virtual cores
128 GB of RAM
A disk named LinuxVhd.vhdx

You plan to deploy infrastructure as a service (IaaS) to Dev for developer projects. The Marketplace on Dev is configured and ready to publish items. Dev contains one plan named Dev_Plan1 and one offer named Dev_Offer1. Prod contains two plans and two offers. One of the offers is named Offer1. All the IaaS and platform as a service (PaaS) tenant data must be backed up to an external location. The solution must ensure that the data can be restored if the datacenter that hosts Prod becomes unavailable.

End of repeated scenario.

You need to ensure that the team that supports the developers can perform Azure Stack operator tasks on Dev. The solution must minimize the amount of administrative effort required to manage the administrative rights.

Which three actions should you perform? Each correct answer presents part of the solution.

- A. From the Azure Stack administrator portal, configure the Default Provider Subscription.
- B. In contoso.com, modify the group membership of the development users.
- C. From the Azure Stack administrator portal, create a new subscription.
- D. From PowerShell, run the New-CloudAdminUser cmdlet.
- E. From the Azure Stack administrator portal, create a new resource group.

Answer: ABD

QUESTION 7

You deploy an Azure Stack integrated system. The system contains several tenants that use infrastructure as a service (IaaS) virtual machines.

You need to recommend a solution to ensure that if a datacenter fails, you can start the virtual machines as quickly as possible.

What should you include in the recommendation?

- A. Microsoft Azure Backup
- B. Microsoft Azure Site Recovery
- C. blob snapshots
- D. file-snapshot backups

Answer: B

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
