

Vendor: Adobe

Exam Code: AD0-E117

Exam Name: Adobe Experience Manager Architect Master

Version: DEMO

QUESTION 1

A client is using AEM and wants to make sure they are managing their configurations correctly. Refer to the following requirements:

- The client has multiple brands that they will be hosting on a single AEM implementation
- The client wants to reuse as much between brands as possible
- Each brand needs to be able to override the default values for items like contact us information
- The client plans to support multiple languages in multiple regions for each brand
- Each brand/language/region combination will have its own set of content approvers used as part of a custom workflow

Which approach should an Architect recommend to manage the client's configurations for AEM?

- A. Use the OOTB Configuration Browser to set configuration defaults and approval group by brand/language/region combination.
- B. Use Context-aware configurations to manage configuration overrides and approval group by brand/language/region combination.
- C. Use OSGi to manage approval group and provide default contact us information by runmode.
- D. Use OSGi Configuration to handle configuration overrides by brand. Create a new workflow for each brand/language/region combination for content approval.

Answer: C

QUESTION 2

A new AEM Sites implementation includes a component that lists the 10 most recently published PDF documents in AEM Assets. The component works as expected during development and passes QA testing. The business starts to use it while entering content and uploading assets in preparation for go-live. A few days later, the component's PDF list is empty. What is the most likely cause of the issue?

- A. A PDF with too large file size has been uploaded.
- B. The component is missing a matching Oak index.
- C. The component is missing the HTL display context to escape the PDF title.
- D. A PDF with incorrect MIME type has been uploaded.

Answer: A

QUESTION 3

A customer is migrating from their On-Premises AEM 6.4 instances to AEM as a Cloud Service. Next to the required code refactoring, a content migration of approximately 100,000 pages needs to be performed. The customer wants the content freeze period to be limited so that editors can continue to do content actions as long as possible.

Which two recommendations should the Architect make for the migration of the content pages? (Choose two.)

- A. Migrate the content using Lazy Content Migration approach
- B. Upscale the memory of the On-Premise AEM instance
- C. Migrate content deltas using a query-based packaging tool
- D. Ensure sufficient storage space on the On-Premise AEM instance
- E. Migrate the content using the Content Transfer Tool

Answer: BD

QUESTION 4

A website built on AEM Sites displays the company's stock price in the footer of all pages. The stock data is retrieved from a third party REST service using two-way SSL and rendered in an AEM component using HTL. During performance testing in the last development sprint it becomes apparent that the third party service sometimes takes up to 30 seconds to respond, which degrades the overall site performance.

How should an Architect address this issue?

- A. Call the REST service directly from the browser
- B. Temporarily remove the component from all content
- C. Load the stock data component asynchronously
- D. Add a 5 second timeout to the REST call

Answer: C

QUESTION 5

A client's site does not show the latest page content for some site visitors. The client has two data centers with each configured with a Dispatcher connected to two Publish machines. The site load issue only occurs intermittently for visitors from one of the data centers. Which step should the Architect take to resolve the issue?

- A. Disable caching on all impacted data centers Dispatchers to force the Publish machines to serve the page content
- B. Check the Publish instance(s) attached to the Dispatcher associated to the impacted data center
- C. Check the SSL certificate on the impacted data center's load balance.
- D. Review the log files on the Author instances to determine if there are any template errors

Answer: C

QUESTION 6

A customer wants to implement an AEM solution to serve localized content to several regional websites. Which AEM capability should the Architect recommend?

- A. Use translation connector and Multi Site Manager
- B. Use i18N API and Multi Site Manager
- C. Use translation connector and i18N API
- D. Use translation connector and translation workflows

Answer: C

Thank You for Trying Our Product

Braindump2go Certification Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
