SAP

C_S4EWM_2023 Exam

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management

Question: 1

Where do you enable opportunistic cross-docking in a decentralized EWM?

A. In the warehouse and the document type

B. In the product and the warehouse process type

C. In the warehouse and the product

D. In the product and the document type

Answer: C

Explanation:

Question: 2

Using embedded EWM, what options do you have for the goods receipt posting for external procurement? Note: There are 2 correct answers to this question.

A. Use synchronous goods receipt where you post the GR in ERP.

B. Use the ERP Inbound Delivery to post goods receipt.

C. Use the EWM Inbound Delivery to post goods receipt.

D. Use synchronous goods receipt where you post the GR in EWM.

Answer: B, D

Explanation:

Question: 3

What information is used to determine the availability group? Note: There are 3 correct answers to this

question.

A. Storage location

B. Stock type role

C. Non-location-dependent stock type

D. Plant

E. Warehouse number

Answer: A, D, E

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The availability group in SAP EWM defines how stock is grouped for availability checks and is critical for inventory management integration with SAP S/4HANA. It is determined by the plant, storage location, and warehouse number. Option A ("Storage location") is correct because it specifies the physical or logical location within a plant, influencing stock availability. Option D ("Plant") is correct as it's the organizational unit tying inventory to a specific facility. Option E ("Warehouse number") is correct because it links the availability group to a specific EWM-managed warehouse. Stock type role (B) and non-location-dependent stock type (C) influence stock categorization but are not directly used to define the availability group; they are subordinate to the plant/storage location/warehouse structure. This configuration is maintained in SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Configure Availability Group.
