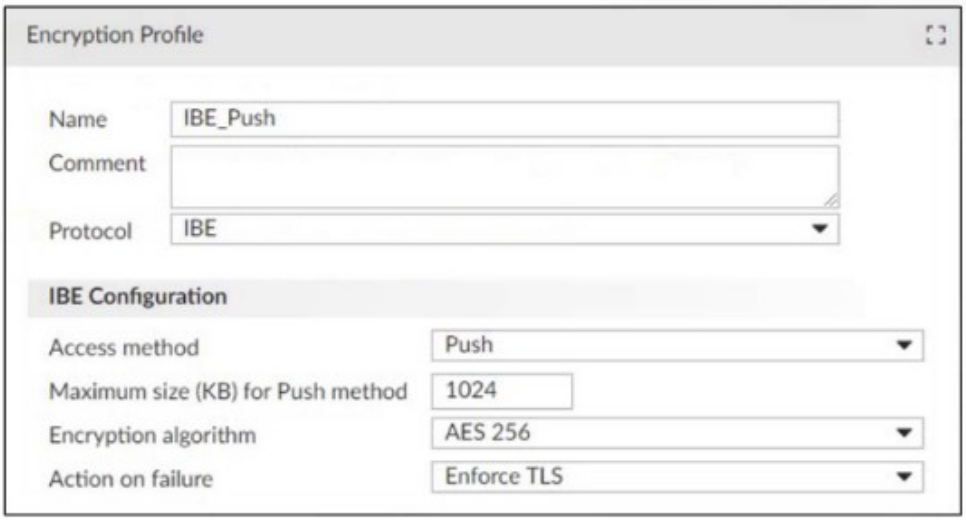
Vendor: Fortinet

Exam Code: FCP_FML_AD-7.4

Exam Name: FCP - FortiMail 7.4 Administrator

Version: DEMO

QUESTION 1
Refer to the exhibit, which displays an encryption profile configuration.



What happens if the attachment size of an IBE email exceeds 1024 KB?

A. AES 256 will be used.
B. TLS will be used.
C. Pull delivery will be used.
D. The email message will not be delivered.

Answer: B
Explanation:
When the attachment exceeds the 1 024 KB push limit, the push attempt is treated as a failure and FortiMail falls back to the configured “Action on failure,” which here is to enforce TLS encryption.

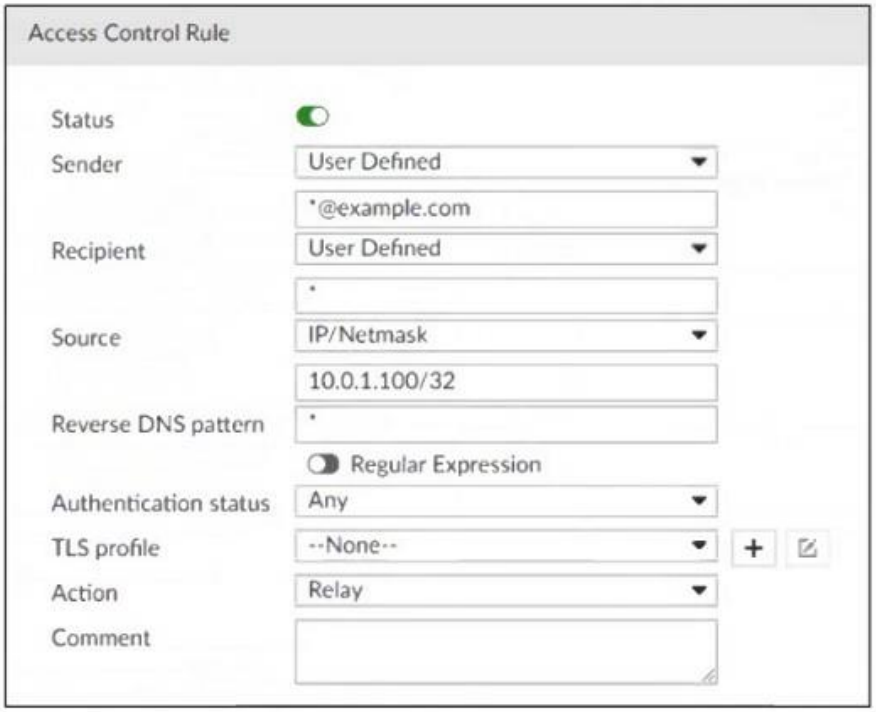
QUESTION 2
Which two antispam techniques query FortiGuard for rating information? (Choose two.)

A. SURBL
B. URL filter
C. IP reputation
D. DNSBL

Answer: BC
Explanation:
URL filter: Queries FortiGuard’s constantly updated web-rating database to check URLs in messages.

IP reputation: Uses FortiGuard’s reputation service to look up sender IP addresses.

QUESTION 3
Refer to the exhibit, which displays an access control rule. What are two expected behaviors for this access control rule? (Choose two.)

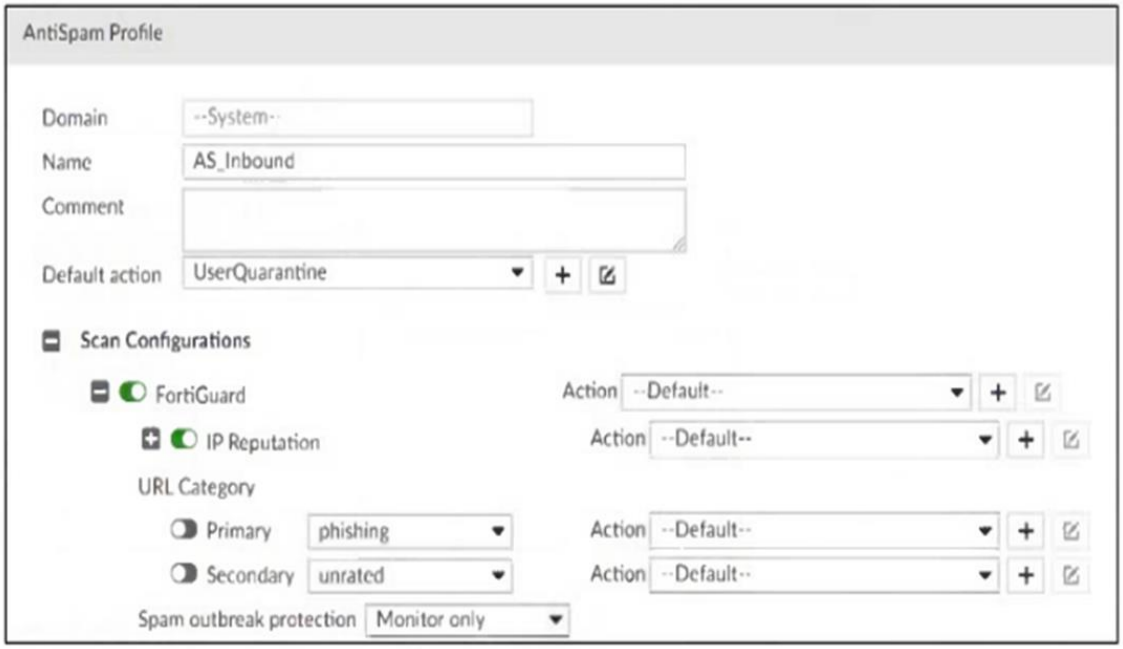


A. Senders must be authenticated to match this rule.
B. Emails must be sent from the `10.0.1.0/24` subnet.
C. Email matching this rule will be relayed.
D. Email must originate from an `example.com` email address.

Answer: CD
Explanation:
Email matching this rule will be relayed.
The rule's Action is set to Relay, so any message that matches the rule is forwarded onward.

Email must originate from an example.com email address.
The Sender field is "*@example.com," so only envelopes with a MAIL FROM in that domain match.

QUESTION 4
Refer to the exhibit, which shows a partial antispam profile configuration.



What will happen to an email that triggers **Spam outbreak protection**?

A. The email is logged.
B. The email is rejected.
C. The email is held in a deferred queue for a period of time.
D. The email is marked as clean and released to the recipient.

Answer: A
Explanation:
With "Spam outbreak protection" set to Monitor only, messages that match an outbreak signature are simply logged for review but not blocked or otherwise held.

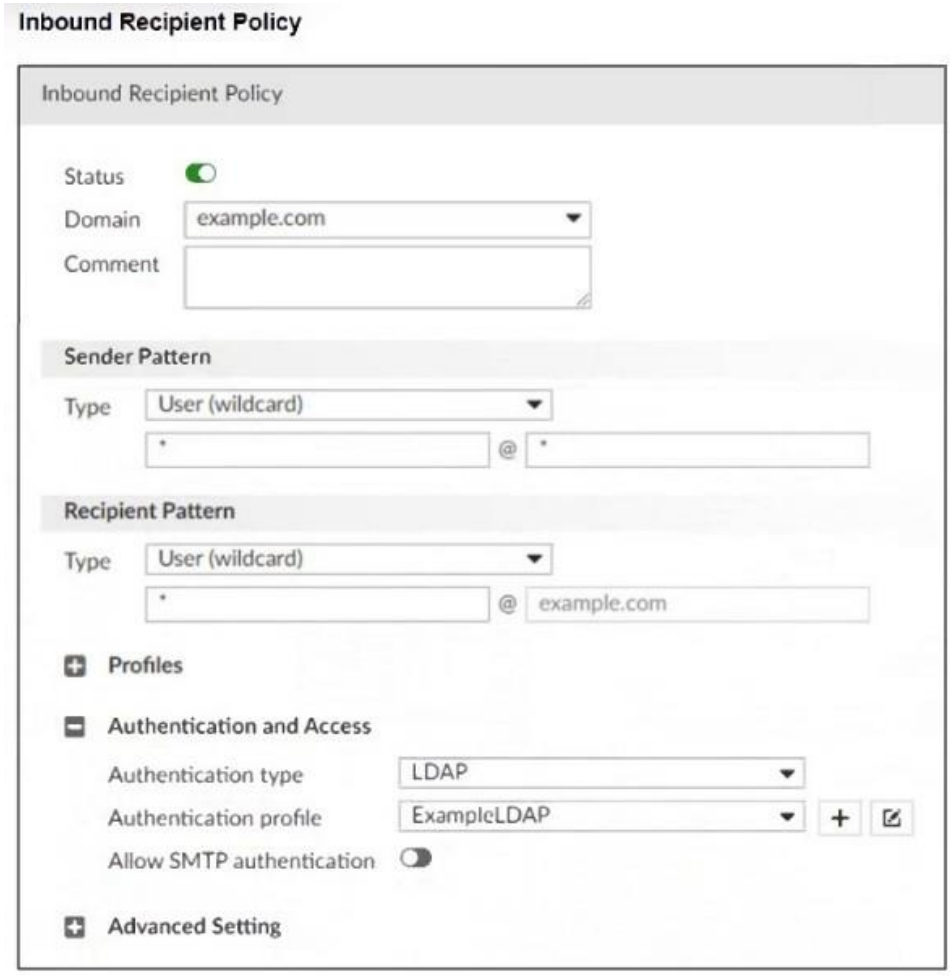
QUESTION 5
In which two ways does a transparent mode FortiMail use the build-it MTA to process email? (Choose two.)

A. The built-in MTA must connect to an external relay host to deliver email.
B. It ignores the destination set by the sender and uses its own MX record lookup.
C. MUAs must be configured to connect to the built-in MTAto send email.
D. It can queue undeliverable messages and generate DSNs.

Answer: BD
Explanation:
It ignores the destination set by the sender and uses its own MX record lookup.
In transparent mode FortiMail intercepts mail and then its built-in MTA performs an MX lookup on the recipient domain rather than trusting the original destination hop.

It can queue undeliverable messages and generate DSNs.
The built-in MTA maintains delivery queues and produces Delivery Status Notifications when downstream delivery fails.

QUESTION 6
Refer to the exhibit, which shows an inbound recipient policy.



After creating the policy, an administrator discovers that clients can send Inbound Recipient Policy unauthenticated emails using SMTP.

What must the administrator do to enforce authentication?

A. Configure an access delivery rule to enforce authentication.
B. Configure a matching IP policy with the exclusive flag enabled.
C. Configure an outbound recipient policy for LDAP authentication.
D. Configure an access receive rule to verify authentication status.

Answer: D
Explanation:
You need to create an Access Receive Rule that matches your incoming mail and sets Authentication status to “Authenticated.” That rule will block any SMTP session that isn’t authenticated before it ever reaches the recipient policy.

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

★ More than **99,900** Satisfied Customers Worldwide.

★ Average **99.9%** Success Rate.

★ **Free Update** to match latest and real exam scenarios.

★ **Instant Download** Access! No Setup required.

★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.

★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.

★ **100%** Guaranteed Success or **100%** Money Back Guarantee.

★ **Fast**, helpful support **24x7**.
