

Vendor: Fortinet

Exam Code: FCP_FAC_AD-6.5

Exam Name: FCP - FortiAuthenticator 6.5 Administrator

Version: DEMO

QUESTION 1

You are a FortiAuthenticator administrator for a large organization. Users who are configured to use FortiToken 200 for two-factor authentication can no longer authenticate. You have verified that only the users with two-factor authentication are experiencing the issue.

What can cause this issue?

- A. Time drift between FortiAuthenticator and hardware tokens
- B. The seed value on the tokens was incorrectly updated
- C. Token certificate was added to a CRL
- D. FortiAuthenticator has lost contact with the FortiCloud token provisioning servers

Answer: A

Explanation:

If there is time drift between FortiAuthenticator and FortiToken 200 hardware tokens, the one-time passwords generated will no longer match the expected values, causing all two-factor authentication attempts to fail for affected users.

QUESTION 2

A network administrator is using FortiAuthenticator as their RADIUS server for wired and wireless network access. The administrator wants to pass the users' group information back to the RADIUS clients when the users authenticate.

How does FortiAuthenticator accomplish this?

- A. RADIUS attributes
- B. RADIUS accounting
- C. Syslog messages
- D. REST API

Answer: A

Explanation:

FortiAuthenticator uses RADIUS attributes to pass additional information, such as user group membership, back to RADIUS clients during the authentication process.

QUESTION 3

Why would you configure an OCSP responder URL in an end-entity certificate?

- A. To identify the end point that a certificate has been assigned to
- B. To designate a server for certificate status checking
- C. To provide the CRL location for the certificate
- D. To designate the SCEP server to use for CRL updates for that certificate

Answer: B

Explanation:

Configuring an OCSP responder URL in an end-entity certificate designates the server that will be queried to check the real-time revocation status of the certificate.

QUESTION 4

Which two behaviors do certificate revocation lists (CRLs) on FortiAuthenticator exhibit? (Choose two.)

- A. CRLs can be distributed only through the SCEP server
- B. Revoked certificates are automatically placed on the CRL
- C. All local CAs share the same CRLs
- D. CRLs contain the serial number of the certificate that has been revoked

Answer: BD

Explanation:

Revoked certificates are automatically added to the CRL by FortiAuthenticator.

CRLs list the serial numbers of certificates that have been revoked, allowing clients to identify and reject them.

QUESTION 5

Which FortiAuthenticator feature allows users to authenticate against different back-end databases when using a single RADIUS policy?

- A. RADIUS attributes
- B. LDAP services
- C. User Groups
- D. Realms

Answer: D

Explanation:

Realms in FortiAuthenticator allow mapping of authentication requests to different back-end databases within a single RADIUS policy, enabling user authentication across multiple directories or identity sources.

QUESTION 6

An employee lost their assigned token and needs to authenticate to a resource which requires two factor authentication. The user does not have access to SMS or email.

How can an administrator provide access for the user?

- A. Generate and provide an HOTP to the user
- B. Enable and provide an emergency code to the user
- C. Disable two-factor authentication on the resource
- D. Refresh the FTM provisioning status for the user

Answer: B

Explanation:

An administrator can issue an emergency code in FortiAuthenticator, which temporarily bypasses the user's lost token and allows them to authenticate when two-factor authentication is required but no token, SMS, or email is available.

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
