Vendor: Dell-EMC

Exam Code: D-MN-OE-23

Exam Name: Dell Technologies Metro Node Operate 2023

Version: DEMO

Exam A

QUESTION 1
During EZ Provisioning in Unisphere, what feature ensures data is distributed across disks to improve performance and avoid hotspots?

A. Auto-tiering
B. Disk Pooling
C. RAID Grouping
D. Load Balancing

Answer: B

QUESTION 2
Which component provides guidance to clusters on how to react to a cluster or inter-cluster communication failure?

A. Witness
B. Logging volume
C. Consistency group
D. Rule-set

Answer: A

QUESTION 3
Which of the following is NOT a typical outcome of EZ Provisioning via VPlexcli?

A. Simplified disaster recovery setup
B. Automated volume migration
C. Enhanced storage optimization
D. Instantaneous data deduplication

Answer: D

QUESTION 4
When performing an extent migration, which operation frees the source extent for reuse?

A. Remove
B. Start
C. Commit
D. Cancel

Answer: C

QUESTION 5
Which of the following aspects does Unisphere NOT directly monitor for system health checks?

A. Environmental conditions like temperature
B. Database performance metrics

C. Disk failure and predictive failure analysis
D. User access patterns and security

Answer: D

QUESTION 6
What type of statistics can you expect to see from a well-configured CLI performance monitor?

A. Only historical I/O performance data
B. Real-time and historical I/O performance, latency, and throughput
C. User login attempts and security breaches
D. Power consumption statistics for the data center

Answer: B

QUESTION 7
What are the three characteristics of the Perpetual Performance Monitors built into the Metro node system? (Select 3)

A. Cannot be disabled.
B. Cannot be deleted.
C. Can be modified.
D. Can be disabled.
E. Cannot be modified.

Answer: ABE

QUESTION 8
What is the primary purpose of implementing role-based access control (RBAC) in a system?

A. To ensure all users have the same level of access to system resources.
B. To provide users with access based on their specific role within an organization.
C. To allow unrestricted access to system settings for all users.
D. To monitor user activities on the system in real-time.

Answer: B

QUESTION 9
What security features are typically included in Metro node systems?

A. Biometric access controls for system management
B. End-to-end encryption for data in transit and at rest
C. Physical locks on all data storage devices
D. Use of a public internet connection for data replication

Answer: B

QUESTION 10

During the volume expansion process using Unisphere, what must be done after resizing the LUN?

A. Reboot the storage system
B. Expand the file system on the host
C. Recreate the storage pool
D. Run a data integrity check

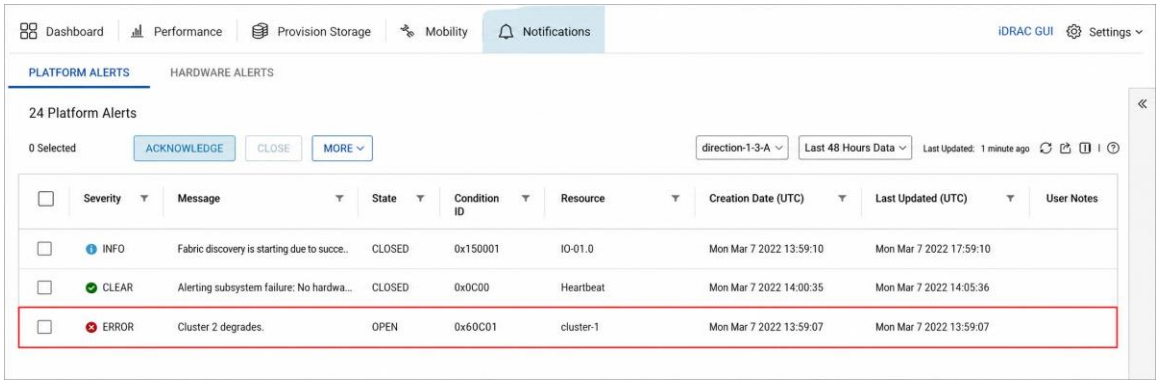
Answer: B

QUESTION 11
What command is used to create a distributed device in VPlexcli?

A. device create-distributed
B. virtual-volume create
C. metro-device assemble
D. distributed-device create

Answer: D

QUESTION 12
Refer to the exhibit. How should the administrator interpret the highlighted area?



A. An error has occurred but does not have a significant impact on the system.
B. A condition has occurred that can obstruct the functionality of other components.
C. An error has occurred that has a significant impact on the system and must be rectified immediately.
D. An event has occurred that does not impact system functions and no action is required.

Answer: C

QUESTION 13
While creating a mobility job to migrate data between clusters, the system administrator is unable to create mappings.
What is causing the problem?

A. Source extent is used.

B. Target extent is used.
C. Target device has associated Virtual Volume.
D. Source device has associated Virtual Volume.

Answer: C

QUESTION 14
Which Ansible command lists the volumes which are 80 G or greater in the Metro node system?

A. ansible get_volumes_given_size.yml
B. ansible -i get_volumes_given_size.yml
C. ansible-playbook -i get_volumes_given_size.yml
D. ansible-playbook get_volumes_given_size.yml

Answer: D

QUESTION 15
Which three conditions would prevent a virtual volume to be expanded? (Select 3)

A. Rebuild is in progress
B. Witness is not enabled
C. Volume is part of a distributed volume
D. Health-check has errors
E. Migration is occurring

Answer: ABD

QUESTION 16
In Unisphere, which policies are essential for implementing Quality of Service (QoS) on storage resources? (Select two)

A. I/O Limit policies
B. Snapshot policies
C. Deduplication policies
D. Storage Pool policies

Answer: AD

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

★ More than **99,900** Satisfied Customers Worldwide.

★ Average **99.9%** Success Rate.

★ **Free Update** to match latest and real exam scenarios.

★ **Instant Download** Access! No Setup required.

★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.

★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.

★ **100%** Guaranteed Success or **100%** Money Back Guarantee.

★ **Fast**, helpful support **24x7**.
