

Vendor: VMware

Exam Code: 2V0-16.25

Exam Name: VMware vSphere Foundation 9.0
Administrator

Version: DEMO

QUESTION 1

An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:

- Power on/off virtual machines
- Open consoles
- Create snapshots

Which out-of-the-box role satisfies these access control requirements?

- A. Administrator
- B. Virtual Machine Console User
- C. Virtual Machine User
- D. Virtual Machine Power User

Answer: D

QUESTION 2

An administrator creates a cluster by joining a Medium sized VMware Cloud Foundation (VCF) Operations for Logs node to an existing Medium sized single-node deployment.

The secondary node of the cluster fails, degrading the functionality of VCF Operations for Logs.

What action should the administrator take to create a healthy active cluster?

- A. Scale up the VCF Operations for Logs primary and secondary node to size Extra Large.
- B. Scale up the VCF Operations for Logs primary and secondary node to size Large.
- C. Rebuild the VCF Operations for Logs cluster secondary node and place the cluster back into operation.
- D. Rebuild the VCF Operations for Logs cluster secondary node and add an additional node to the cluster.

Answer: D

QUESTION 3

A virtual machine (VM) owner has requested to move a VM from one cluster to another. The following information has been provided:

- The VM cannot have downtime during the transfer.
- The same network is present on both clusters.
- The datastore that the VM is currently on is not present in the destination cluster.

What step should the administrator perform to move the VM?

- A. Perform a vMotion of the VM to the new cluster.
- B. Backup the VM and restore it to the new cluster.
- C. Perform a vMotion with Storage vMotion to the new cluster.
- D. Inform the owner the VM cannot be moved to the new cluster.

Answer: C

QUESTION 4

An administrator is tasked with developing an automated, repeatable process to:

- Connect to the corporate Active Directory and create a Windows computer object in a defined Organizational Unit.
- Connect to the target vCenter and create a Windows VM from a template.
- Power on the VM and join it to the corporate domain.

Which VMware vSphere Foundation (VVF) component is best suited for this task?

- A. vSphere Supervisor
- B. VCF Operations
- C. VCF CLI
- D. VCF Operations Orchestrator

Answer: D

QUESTION 5

An administrator has been tasked to create a virtual machine (VM) into a VMware vCenter Supervisor Namespace in an existing VMware vSphere Foundation (VVF) deployment.

How would the administrator create the VM?

- A. Create a YAML file and deploy using kubectl.
- B. Deploy using the vSphere Client.
- C. Use VCF CLI to deploy the VM.
- D. Log in to VCF Automation Service Broker and select the "Create a VM" catalog item.

Answer: A

QUESTION 6

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Assign the SUSPECT_USERS group the No access role to the vCenter Object and check propagate.
- B. Assign the SUSPECT_USERS group the Administrator role to the vCenter Object and uncheck propagate.
- C. Disconnect the vCenter from Active Directory.
- D. Assign the SUSPECT_USERS group the Read-only role to the vCenter Object and check propagate.

Answer: A

QUESTION 7

An administrator is tasked with adding a 96-core VMware ESX host to a VMware vSphere Foundation (VVF) 9.0 vCenter cluster. The vCenter has been previously licensed for 1024 cores and the existing hosts equal 960 cores. The administrator adds the host to the vCenter cluster and places the cluster back into production.

What issue will occur if the administrator performs no additional actions to this vCenter?

- A. The new ESX host will operate in evaluation mode until more capacity is added to the license to license the host. If the host is not licensed when the evaluation period expires, the host will be limited to 64 cores until 32 cores or greater is added to the license.
- B. The new ESX host has been limited to 64 cores until more capacity is added to the license to license the host. Once 32 cores or greater is added to the license, the full 96 cores of the new host will be useable.
- C. The new ESX host will operate in evaluation mode until more capacity is added to the license to license the host. If the host is not licensed when the evaluation period expires, it is disconnected from the vCenter instance.
- D. No issue will occur. The new host was added to the vCenter cluster successfully and will operate for the valid period of the applied license.

Answer: C

QUESTION 8

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- A. Clone the widget from an existing dashboard.
- B. Create the widget in Explore Logs and click Add to Dashboard.
- C. Drag and drop the widget in the dashboard design pane.
- D. Import the widget in the dashboard design pane.
- E. Open Management Pack Builder and clone the widget.

Answer: CB

QUESTION 9

An administrator is tasked with enabling a Supervisor in a VMware vSphere Foundation (VVF) environment using vSphere networking and the Foundation Load Balancer. The vSAN-backed cluster has been configured with a vSphere Distributed Switch.

Which two actions must the administrator perform when enabling a Supervisor using vSphere networking? (Choose two.)

- A. Select a vSphere namespace template to define initial namespace limits.
- B. Provide a static IP address range for the Supervisor control plane VMs.
- C. Configure a Tier-0 Gateway with BGP or static routing.
- D. Enable the VM Service before deploying the Supervisor.
- E. Assign a vSphere Distributed Switch and a corresponding port group.

Answer: BE

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
