

Vendor: F5

Exam Code: 304

Exam Name: F5 BIG-IP APM Specialist

Version: DEMO

QUESTION 1

Which of the following is the primary function of an iApp template?

- A. To manage and monitor BIG-IP hardware components
- B. To provide a web-based interface for end-users
- C. To automate the deployment and configuration of application services
- D. To configure load balancing settings for virtual servers

Answer: C

QUESTION 2

How does BIG-IP APM handle Access Policy Sync to ensure consistency across HA devices?

- A. It synchronizes access policies globally for all virtual servers.
- B. It requires manual configuration for local objects on each device.
- C. It synchronizes access policies locally within each traffic group.
- D. It uses DNS-based synchronization for global policy settings.

Answer: C

QUESTION 3

When configuring a VPE flow with multiple branches and objects, what is the purpose of variable assignment?

- A. To optimize application performance for specific users
- B. To define custom session variables for each user
- C. To configure SSL certificate settings for secure logon
- D. To manage application-specific ACLs

Answer: B

QUESTION 4

What are the possible policy ending types you can use in VPE?

- A. Allow, Deny, and Redirect
- B. Permit, Block, and Forward
- C. Accept, Reject, and Reroute
- D. Pass, Drop, and Retry

Answer: A

QUESTION 5

In Citrix ADC's Web Access Management (LTM-APM Mode), what does APM stand for?

- A. Access Policy Manager
- B. Application Performance Monitoring
- C. Advanced Pool Management
- D. Application Proxy Module

Answer: A

QUESTION 6

How do you configure "application access" in Citrix ADC?

- A. By configuring ACLs in Global Access Control List (ACL) policies
- B. By setting up Resource Items for each application
- C. By creating virtual servers and configuring service bindings
- D. By defining traffic policies in the Application Firewall

Answer: B

QUESTION 7

When applying corporate branding to the BIG-IP APM user interface, what customization options are available to administrators? (Select all that apply)

- A. Adding a logo to the logon form
- B. Changing the default font style and size
- C. Modifying the color scheme of the user interface
- D. Adding a custom footer to the web portal

Answer: AD

QUESTION 8

Which of the following is NOT a component of Single Sign-On (SSO)?

- A. Identity Provider (IdP)
- B. Service Provider (SP)
- C. Assertion
- D. AAA Server

Answer: D

QUESTION 9

Which of the following is NOT a security feature provided by BIG-IP APM?

- A. Web Application Firewall (WAF)
- B. SSL VPN
- C. Distributed Denial of Service (DDoS) protection
- D. Intrusion Detection System (IDS)

Answer: C

QUESTION 10

When updating an existing license for BIG-IP APM, what should be considered to ensure a smooth license upgrade process?

- A. The number of client devices connecting to the BIG-IP device

- B. The access policy configurations in the existing license
- C. The version of the BIG-IP software currently installed
- D. The number of virtual servers deployed on the BIG-IP device

Answer: C

QUESTION 11

What does AAA stand for in the context of F5 BIG-IP APM?

- A. Authentication, Authorization, and Administration
- B. Authentication, Authorization, and Accounting
- C. Authorization, Authentication, and Accounting
- D. Access, Authentication, and Accounting

Answer: B

QUESTION 12

What is the primary function of the BIG-IP APM in Network and Application Access?

- A. Load balancing network traffic.
- B. Protecting the network against cyber-attacks.
- C. Controlling access to applications based on user identity and context.
- D. Monitoring application performance and availability.

Answer: C

QUESTION 13

When deploying an iApp template, what is the significance of determining the min/max BIG-IP module versions supported?

- A. To ensure compatibility with the BIG-IP device hardware
- B. To prevent potential security vulnerabilities
- C. To guarantee the availability of specific features required by the iApp
- D. To estimate the deployment time and resource requirements

Answer: C

QUESTION 14

How can you configure variable assignment in VPE? (Select all that apply)

- A. Using a custom expression to define the variable value
- B. By setting up Resource Items for each application
- C. By defining custom session variables for user-specific data
- D. By configuring ACLs in Global Access Control List (ACL) policies

Answer: AC

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
