Vendor: Microsoft

Exam Code: AB-900

Exam Name: Microsoft 365 Copilot and Agent Administration Fundamentals

Version: DEMO

QUESTION 1
Your organization has a Microsoft 365 subscription.

You create a security group named Group1 and assign a Microsoft 365 E3 license to the group.

You discover that a user named User1 does NOT have access to the Microsoft 365 E3 features.

You need to ensure that User1 can access all the Microsoft 365 E3 features.

Which two actions can you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Add User1 to Group1.
B. Assign a Conditional Access policy to Group1.
C. Assign a Conditional Access policy to User1.
D. Assign a license to User1.

Answer: AD
Explanation:
You can license a user with Microsoft 365 E3 either by adding them to a licensed security group or by direct assignment in the Microsoft 365 admin center. Group-based licensing automatically assigns licenses to members, which is ideal for automation, while direct assignment is better for individual, immediate, or one-off licensing needs.

QUESTION 2
Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

If a user shares a Microsoft 365 Copilot agent, you can use [▼]

- Microsoft Foundry
- Microsoft Copilot Studio
- the Microsoft 365 admin center
- the Power Apps portal

to block users from using the agent.

Answer:

Answer Area

If a user shares a Microsoft 365 Copilot agent, you can use [Microsoft Foundry / Microsoft Copilot Studio / the Microsoft 365 admin center / the Power Apps portal] to block users from using the agent.

QUESTION 3
Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	○	○
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	○	○
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	○	○

Answer:

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	○	●
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	●	○
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	○	●

QUESTION 4
Your organization has a Microsoft 365 subscription.

You need to evaluate your organization's Identity Secure Score.

Which two factors affect the score? Each correct answer presents a complete the solution.

NOTE: Each correct selection is worth one point.

A. the SharePoint site permissions
B. the number of global administrators
C. passwords that are never expired
D. the location of the users

Answer: BC
Explanation:
[B]
The number of Global Administrators directly affects your Identity Secure Score.
The score is impacted by two primary recommendations regarding these roles:
Designate more than one Global Administrator:
Microsoft requires at least two Global Admins to prevent a total lockout if one account is lost or compromised.
One of these should ideally be a "break-glass" emergency access account.

Limit Global Administrators to fewer than five:
Your score may decrease if you have five or more Global Admins.
Having too many increases the attack surface and "privilege creep".

[C]
Enabling "passwords never expire" (specifically, removing mandatory expiration) positively affects your Microsoft 365 Identity Secure Score. Microsoft considers this a best practice, as forcing regular password changes often leads to users choosing weaker, predictable passwords.

QUESTION 5
Your organization has a Microsoft 365 subscription.

You need to review the impact of a recent phishing incident that targeted email users.

What should you use?

A. the Microsoft Defender portal
B. the Microsoft 365 admin center
C. the Microsoft Entra admin center
D. the Microsoft Exchange admin center

Answer: A
Explanation:
To check the impact of a phishing incident in your Microsoft 365 subscription using the Microsoft Defender portal, you should focus on the Incidents, Email & collaboration reports, and Threat Explorer sections.

1. Identify and Analyze the Incident
2. Investigate Email Details and Exposure
3. Review Remediation Status

QUESTION 6
Your organization has a Microsoft 365 subscription.

You need to assign a license to a user.

What should you use?

A. the Microsoft Purview portal
B. the Microsoft 365 admin center
C. the Microsoft Teams admin center

Answer: B
Explanation:
To assign a Microsoft 365 license to a user, use the Microsoft 365 admin center (admin.microsoft.com) by navigating to Users > Active users, selecting the user, and choosing Licenses and apps. Alternatively, use Billing > Licenses to manage, assign, or remove licenses for up to 20 users/groups at once.

https://learn.microsoft.com/en-us/microsoft-365/admin/manage/assign-licenses-to-users

QUESTION 7
The IT administration team at your organization, Contoso Ltd., has acquired a new domain name, contosoglobal.com, and needs to add it to their Microsoft 365 environment. This new domain will be used for all new user principal names (UPNs) and email addresses. Which section of the Microsoft 365 admin center must the administrator use to manage, verify, and set the new domain as the default for new users?

A. Settings > Org settings > Services
B. Billing > Licenses > Product List
C. Setup > Domain setup > Connect domain
D. Settings > Domains

Answer: D
Explanation:
The dedicated Domains section within the Microsoft 365 admin center is the centralized location for adding new custom domains, verifying ownership (typically via TXT or MX records), managing DNS settings, and setting the default domain used for new user provisioning.

https://learn.microsoft.com/en-us/microsoft-365/admin/setup/add-domain

QUESTION 8
Your organization has a Microsoft 365 subscription.

You need to investigate security incidents and alerts raised from the Windows 11 devices in your organization.

What should you use?

A. Microsoft Entra ID Protection

B. Microsoft Defender for Identity
C. Microsoft Purview Insider Risk Management
D. Microsoft Defender for Endpoint

Answer: D
Explanation:
Microsoft Defender for Endpoint in Microsoft 365 allows security teams to investigate, analyze, and remediate security incidents on Windows 11 devices via the Microsoft Defender portal (security.microsoft.com). It provides a unified experience to view device timelines, threat intelligence, and alerts, enabling automatic or manual response to threats like malware and phishing.

QUESTION 9
Hotspot Question

You want to view the administrative actions taken by a service administrator in Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	○	○
You can use Audit in the Microsoft Defender portal.	○	○
You can use Audit in the Microsoft Purview portal.	○	○

Answer:

Answer Area

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	○	○
You can use Audit in the Microsoft Defender portal.	○	○
You can use Audit in the Microsoft Purview portal.	○	○
