**QUESTION 1**

Your organization has a Microsoft 365 subscription.  
You create a security group named Group1 and assign a Microsoft 365 E3 license to the group.  
You discover that a user named User1 does NOT have access to the Microsoft 365 E3 features.  
You need to ensure that User1 can access all the Microsoft 365 E3 features.  
Which two actions can you perform? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Add User1 to Group1.
- B. Assign a Conditional Access policy to Group1.
- C. Assign a Conditional Access policy to User1.
- D. Assign a license to User1.

**Answer:** AD

**Explanation:**

You can license a user with Microsoft 365 E3 either by adding them to a licensed security group or by direct assignment in the Microsoft 365 admin center. Group-based licensing automatically assigns licenses to members, which is ideal for automation, while direct assignment is better for individual, immediate, or one-off licensing needs.

**QUESTION 2**

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

If a user shares a Microsoft 365 Copilot agent, you can use

- Microsoft Foundry
- Microsoft Copilot Studio
- the Microsoft 365 admin center
- the Power Apps portal

to block users from using the agent.

**Answer:**

Answer Area

If a user shares a Microsoft 365 Copilot agent, you can use

- Microsoft Foundry
- Microsoft Copilot Studio
- the Microsoft 365 admin center
- the Power Apps portal

to block users from using the agent.

**QUESTION 3**

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.

Yes

No

To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.

To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.

**Answer:**

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>

**QUESTION 4**

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot only surfaces the organizational data for which individual users have permissions.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot uses the same underlying controls for data access as other Microsoft 365 services.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can use connectors to retrieve information from third-party data sources.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot only surfaces the organizational data for which individual users have permissions.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot uses the same underlying controls for data access as other Microsoft 365 services.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can use connectors to retrieve information from third-party data sources.	<input checked="" type="radio"/>	<input type="radio"/>

**QUESTION 5**

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

In Microsoft 365 Copilot, you should use

to perform multi-step reasoning over unstructured data.

Answer:

Answer Area

In Microsoft 365 Copilot, you should use

to perform multi-step reasoning over unstructured data.

**QUESTION 6**

Your organization has a Microsoft 365 subscription.

You need to assign a license to a user.

What should you use?

- A. the Microsoft Purview portal
- B. the Microsoft 365 admin center
- C. the Microsoft Teams admin center

Answer: B

Explanation:

To assign a Microsoft 365 license to a user, use the Microsoft 365 admin center (admin.microsoft.com) by navigating to Users > Active users, selecting the user, and choosing

**QUESTION 7**

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

Microsoft 365 Copilot retrieves data from  by using Microsoft Graph.

Azure OpenAI
external users
Microsoft SharePoint files
web searchers

Answer:

Answer Area

Microsoft 365 Copilot retrieves data from  by using Microsoft Graph.

Azure OpenAI
external users
Microsoft SharePoint files
web searchers

**QUESTION 8**

Hotspot Question

You want to view the administrative actions taken by a service administrator in Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	<input type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Defender portal.	<input type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Purview portal.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	<input checked="" type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Defender portal.	<input checked="" type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Purview portal.	<input checked="" type="radio"/>	<input type="radio"/>

**QUESTION 9**

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Entra Privileged Identity Management (PIM) provides

restricted access to Microsoft 365 services.
the lifecycle management of users.
the management of enterprise applications.
time-bound role activation.

Answer:

Answer Area

Microsoft Entra Privileged Identity Management (PIM) provides

restricted access to Microsoft 365 services.
the lifecycle management of users.
the management of enterprise applications.
time-bound role activation.

**QUESTION 10**

Your organization has a Microsoft 365 E5 subscription.

You need to ensure that a third-party cloud service can authenticate to Microsoft Entra.

What should you configure?

- A. a Microsoft 365 Copilot connector
- B. multifactor authentication (MFA)
- C. a Conditional Access policy
- D. an app registration

Answer: D

Explanation:

To enable a third-party cloud service to authenticate with Microsoft Entra ID in an E5 subscription, you should create an App Registration in the Entra admin center. This creates a service principal, assigning a unique identity, client secrets/certificates, and API permissions (OAuth) for secure token-based authentication.

**Key Steps and Considerations:**

Create Registration: In the Azure Portal, go to Microsoft Entra ID > App registrations > New registration.

Configure Auth: Define supported account types (e.g., single or multi-tenant) and Redirect URIs.

Secure Access: Generate a client secret or upload a certificate for the application to identify itself securely.

Permissions: Configure API permissions to define what organizational data the third-party app can access.

**QUESTION 11**

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

Conditional Access policies

are configured by using the Microsoft Defender portal.
are applied only to on-premises resources.
provide control over how users can access cloud apps.
require a Microsoft Exchange mailbox.

Answer:

Answer Area

Conditional Access policies

are configured by using the Microsoft Defender portal.
are applied only to on-premises resources.
provide control over how users can access cloud apps.
require a Microsoft Exchange mailbox.

**QUESTION 12**

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

The Microsoft responsible AI principle of

accountability
inclusiveness
privacy and security
reliability and safety
transparency

requires the oversight of AI systems to ensure that humans remain in control.

Answer:

Answer Area

The Microsoft responsible AI principle of

accountability
inclusiveness
privacy and security
reliability and safety
transparency

requires the oversight of AI systems to ensure that humans remain in control.

**QUESTION 13**

Hotspot Question

A user named User5 navigates to <https://myapps.microsoft.com>. After entering their username and password, User5 receives the following message on their mobile device.

Are you trying to sign in?

Contoso Ltd.  
User5@sk2508.onmicrosoft.com

Enter the number shown to sign in.

YES

NO, IT'S NOT ME

I CAN'T SEE THE NUMBER

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

User5 is using  for multifactor authentication (MFA).

email OTP
the Microsoft Authenticator app
SMS
a Temporary Access Pass

Answer:

Answer Area

User5 is using  for multifactor authentication (MFA).

email OTP
the Microsoft Authenticator app
SMS
a Temporary Access Pass

**QUESTION 14**

Your organization has a Microsoft 365 subscription. You need to evaluate your organization's Identity Secure Score. Which two factors affect the score? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. the SharePoint site permissions
- B. the number of global administrators
- C. passwords that are never expired
- D. the location of the users

Answer: BC

Explanation:

[B]

The number of Global Administrators directly affects your Identity Secure Score. The score is impacted by two primary recommendations regarding these roles: Designate more than one Global Administrator: Microsoft requires at least two Global Admins to prevent a total lockout if one account is lost or compromised. One of these should ideally be a "break-glass" emergency access account. Limit Global Administrators to fewer than five: Your score may decrease if you have five or more Global Admins. Having too many increases the attack surface and "privilege creep".

[C]

Enabling "passwords never expire" (specifically, removing mandatory expiration) positively affects your Microsoft 365 Identity Secure Score. Microsoft considers this a best practice, as forcing regular password changes often leads to users choosing weaker, predictable passwords.

Reference: <https://learn.microsoft.com/en-us/entra/identity/monitoring-health/concept-identity-secure-score>

**QUESTION 15**

Your organization has a Microsoft 365 subscription. You need to review the impact of a recent phishing incident that targeted email users. What should you use?

- A. the Microsoft Defender portal
- B. the Microsoft 365 admin center
- C. the Microsoft Entra admin center
- D. the Microsoft Exchange admin center

Answer: A

Explanation:

To check the impact of a phishing incident in your Microsoft 365 subscription using the Microsoft Defender portal, you should focus on the Incidents, Email & collaboration reports, and Threat Explorer sections.

1. Identify and Analyze the Incident
2. Investigate Email Details and Exposure

3. Review Remediation Status

Reference:

<https://learn.microsoft.com/en-us/defender-xdr/investigate-incidents>

**QUESTION 16**

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Defender for Office 365 provides protection from phishing and malware attacks.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender for Identity monitors identities in Active Directory domains.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Answer Area

Statements	Yes	No
Microsoft Defender for Office 365 provides protection from phishing and malware attacks.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Defender for Identity monitors identities in Active Directory domains.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications.	<input type="radio"/>	<input checked="" type="radio"/>
