Copying 10 GB of data <b>from</b> Azure <b>to</b> an on-premises network over a VPN generates additional Azure data transfer costs.	<input checked="" type="radio"/>	<input type="radio"/>

**Explanation:**

Box 1: No

Resource groups are logical containers for Azure resources. You do not pay for resource groups.

Box 2: No

Data ingress over a VPN is data 'coming in' to Azure over the VPN. You are not charged data transfer costs for data ingress.

Box 3: Yes

Data egress over a VPN is data 'going out' of Azure over the VPN. You are charged for data egress.

**QUESTION 224**

Hotspot Question

To complete the sentence, select the appropriate option in the answer area.

**Answer Area**

You have several virtual machines in an Azure subscription.  
You create a new subscription.

The virtual machines cannot be moved to the new subscription.
The virtual machines can be moved to the new subscription.
The virtual machines can be moved to the new subscription only if they are all in the same resource group.
The virtual machines can be moved to the new subscription only if they run Windows Server 2016.

Answer:

**Answer Area**

You have several virtual machines in an Azure subscription.

The virtual machines can be moved to the new subscription.
The virtual machines can be moved to the new subscription only if they are all in the same resource group.
The virtual machines can be moved to the new subscription only if they run Windows Server 2016.

**Explanation:**

You can move a VM and its associated resources to a different subscription by using the Azure portal. Moving between subscriptions can be handy if you originally created a VM in a personal subscription and now want to move it to your company's subscription to continue your work. You do not need to start the VM in order to move it and it should continue to run during the move.

### QUESTION 227

Drag and Drop Question

Match the Azure service to the correct description. Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all NOTE:

Each correct match is worth one point.

**Answer Options**

Azure Machine Learning	Azure IoT Hub
Azure Bot Services	Azure Functions

**Answer Area**

	Provides a digital online assistant that provides speech support
	Uses past trainings to provide predictions that have high probability
	Provides serverless computing functionalities
	Processes data from millions of sensors
