**QUESTION 338**

As users switch roles within an organization, their accounts are given additional permissions to perform the duties of their new position. After a recent audit, it was discovered that many of these accounts maintained their old permissions as well. The obsolete permissions identified by the audit have been remediated and accounts have only the appropriate permissions to complete their jobs.

Which of the following is the BEST way to prevent access privilege creep?

- A. Implementing Identity and Access Management (IAM) solution
- B. Time-based review and certification
- C. Internet audit
- D. Trigger-based review and certification

**Answer: A**

**QUESTION 339**

Which of the following is the MOST important output from a mobile application threat modeling exercise according to Open Web Application Security Project (OWASP)?

- A. The likelihood and impact of a vulnerability
- B. Application interface entry and endpoints
- C. Countermeasures and mitigations for vulnerabilities
- D. A data flow diagram for the application and attack surface analysis

**Answer: D**

**QUESTION 340**

Continuity of operations is BEST supported by which of the following?

- A. Confidentiality, availability, and reliability
- B. Connectivity, reliability, and redundancy
- C. Connectivity, reliability, and recovery
- D. Confidentiality, integrity, and availability

**Answer: B**

**QUESTION 341**

Which of the following is true of Service Organization Control (SOC) reports?

- A. SOC 1 Type 2 reports assess the security, confidentiality, integrity, and availability of an organization's controls

D. To classify data according to what it contains

**Answer: D**

**QUESTION 347**

What determines the level of security of a combination lock?

- A. Complexity of combination required to open the lock
- B. Amount of time it takes to brute force the combination
- C. The number of barrels associated with the internal mechanism
- D. The hardness score of the metal lock material

**Answer: A**

**QUESTION 348**

A user downloads a file from the Internet, then applies the Secure Hash Algorithm 3 (SHA-3) to it. Which of the following is the MOST likely reason for doing so?

- A. It verifies the integrity of the file.
- B. It checks the file for malware.
- C. It ensures the entire file downloaded.
- D. It encrypts the entire file.

**Answer: A**

**QUESTION 349**

An organization that has achieved a Capability Maturity Model Integration (CMMI) level of 4 has done which of the following?

- A. Achieved optimized process performance
- B. Achieved predictable process performance
- C. Addressed the causes of common process variance
- D. Addressed continuous innovative process improvement

**Answer: A**
