QUESTION 170

A company wants to store a copy of its on-premises data backups to the AWS Cloud. Data durability is not a concern, but the company wants to be able to begin retrieval of the data within milliseconds. What is the MOST cost-effective storage solution?

- A. Amazon S3 Standard
- B. Amazon S3 Standard-Infrequent Access (S3 Standard-IA)
- C. Amazon S3 Glacier
- D. Amazon S3 One Zone-Infrequent Access (S3 One Zone-IA)

Answer: D

QUESTION 171

Which of the following are benefits of AWS Trusted Advisor? (Select TWO.)

- A. Access to Amazon Simple Queue Service (Amazon SQS)
- B. Cost optimization recommendations
- C. Hourly refresh of the service limit checks
- D. Security checks
- E. AWS Identity and Access Management (IAM) approval management

Answer: BC

QUESTION 172

Which of the following is included within the security pillar of the AWS Well-Architected Framework?

- A. Identity federation
- B. Data protection
- C. Incident reporting
- D. Disaster recovery

Answer: C

QUESTION 173

A company is using an Amazon EC2 On-Demand Instance for an application. The company wants to migrate the application to an EC2 Reserved Instance (RI). The application will run on the instance for longer than 3 years.

Which EC2 instance purchasing option meets these requirements MOST cost-effectively?

- A. A No Upfront Standard RI for a 1-year term, renewed each year
- B. An All Upfront Convertible RI for a 1-year term
- C. An All Upfront Standard RI for a 3-year term
- D. A No Upfront Convertible RI for a 3-year term

Answer: C

QUESTION 174

Which of the following are advantages of moving to the AWS Cloud? (Select TWO.)

- A. The ability to turn over the responsibility for all security to AWS.
- B. The ability to use the pay-as-you-go model.
- C. The ability to have full control over the physical infrastructure.
- D. No longer having to guess what capacity will be required.
- E. No longer worrying about users access controls.

Answer: BD

QUESTION 175

A company needs to use SQL syntax to perform a direct query of objects in an Amazon S3 bucket. Which AWS service can the company use to meet this requirement?

- A. AWS Glue
- B. Amazon Athena
- C. AWS Lambda
- D. Amazon Kinesis

Answer: A

QUESTION 176

A company deployed an Amazon EC2 instance last week. A developer realizes that the EC2 instance is no longer running. The developer reviews a list of provisioned EC2 instances, and the EC2 instance is no longer on the list. What can the developer do to generate a recent history of the EC2 instance?

- A. Run Cost Explorer to identify the start time and end time of the EC2 instance.
- B. Use Amazon Inspector to find out when the EC2 instance was stopped.
- C. Perform a search in AWS CloudTrail to find all EC2 instance-related events.
- D. Use AWS Secrets Manager to display hidden termination logs of the EC2 instance.

Answer: C

QUESTION 177

A global company has a large number of AWS accounts. The company needs central management of billing and security policies across accounts. Which AWS service or feature will meet these requirements?

- A. AWS Config
- B. AWS Organizations
- C. IAM groups
- D. AWS Trusted Advisor

Answer: B

QUESTION 178

Which AWS services can help reduce application latency and improve performance by using edge locations? (Select TWO.)

- A. Amazon Route 53
- B. AWS Global Accelerator
- C. AWS Direct Connect
- D. Amazon Connect
- E. Amazon CloudFront

Answer: BE

QUESTION 179

Which AWS service or feature allows users to connect with and deploy AWS services programmatically?

- A. AWS Management Console
- B. AWS Cloud
- C. AWS CodePipeline
- D. AWS software development kits (SDKs)

Answer: D

QUESTION 180

When designing AWS workloads to be operational even when there are component failures, what is an AWS best practice?

- A. Perform quarterly disaster recovery tests.
- B. Place the main component on the us-east-1 Region.
- C. Design for automatic failover to healthy resources.
- D. Design workloads to fit on a single Amazon EC2 instance.

Answer: C

QUESTION 181

An ecommerce company plans to move its data center workload to the AWS Cloud to support highly dynamic usage patterns. Which benefits make the AWS Cloud cost-effective for the migration of this type of workload? (Select TWO.)

- A. Reliability
- B. Security
- C. Elasticity
- D. Pay-as-you-go resource pricing
- E. High availability

Answer: CD

QUESTION 182

A company needs to establish a private virtual interface (VIF) from its on-premises network directly to its VPC. Which AWS connectivity option should the company use?

- A. VPC peering
- B. AWS PrivateLink
- C. AWS Global Accelerator
- D. AWS Direct Connect

Answer: A

QUESTION 183

A company needs to generate reports that will describe its usage of Amazon EC2 Reserved Instances across AWS accounts for the past month. Which AWS service or tool can the company use to meet this requirement?

- A. AWS Organizations
- B. Amazon S3
- C. Cost Explorer
- D. Amazon EC2 dashboard

Answer: C

QUESTION 184

A company has an application with robust hardware requirements. The application must be accessed by students who are using lightweight, low-cost laptops. Which AWS service will help the company deploy the application without investing in backend infrastructure or high-end client hardware?

- A. Amazon AppStream 2.0
- B. AWS AppSync
- C. Amazon WorkLink
- D. AWS Elastic Beanstalk

Answer: C

QUESTION 185

A company does not want to rely on elaborate forecasting to determine its usage of compute resources. Instead, the company wants to pay only for the resources that it uses. The company also needs the ability to increase or decrease its resource usage to meet business requirements. Which pillar of the AWS Well-Architected Framework aligns with these requirements?

- A. Operational excellence
- B. Security
- C. Reliability
- D. Cost optimization

Answer: A

QUESTION 186

Which AWS service can a company use to access compliance documentation and AWS agreements?

- A. AWS Security Hub
- B. AWS Identity and Access Management (IAM)
- C. AWS Artifact
- D. AWS Certificate Manager (ACM)

Answer: C

QUESTION 187

A company moves a workload to AWS to run on Amazon EC2 instances. The company needs to run the workload in the most cost-effective way. What can the company do to meet this requirement?

- A. Use AWS Key Management Service (AWS KMS).
- B. Use multiple AWS accounts and consolidated billing.
- C. Use AWS CloudFormation to deploy the infrastructure.
