QUESTION 148

A company has a serverless application that includes an Amazon API Gateway DynamoDB database a function, and an Amazon.

Which AWS service can the company use to trace user requests as they move through the application s components?

- A. AWS CloudTrail
- B. Amazon CloudWatch
- C. Amazon Inspector
- D. AWS X-Ray

Answer: A

QUESTION 149

Which AWS services or resources can a company use directly on its on-premises servers? (Select TWO.)

- A. AWSOpsWorks
- B. AWS CloudFormation
- C. AWS Storage Gateway
- D. Application Load Balancer
- E. Amazon Cognito

Answer: AC

QUESTION 150

A company has existing software licenses thait it wants to bring to AWS, but the licensing model requires licensing physical cores. How can the company meet this requirement in the AWS Cloud?

- A. Launch an Amazon EC2 instance with default tenancy.
- B. Launch an Amazon EC2 instance on a Dedicated Host.
- C. Create an On-Demand Capacity Reservation.
- D. Purchase Dedicated Reserved Instances.

Answer: B

QUESTION 151

What does "security of the cloud" refer to in the AWS shared responsibility model?

[AWS-Certified-Cloud-Practitioner Exam Dumps](#) [AWS-Certified-Cloud-Practitioner Exam Questions](#)

[AWS-Certified-Cloud-Practitioner PDF Dumps](#) [AWS-Certified-Cloud-Practitioner VCE Dumps](#)

<https://www.braindump2go.com/aws-certified-cloud-practitioner.html>

- A. Availability of AWS services such as Amazon EC2
- B. Security of the cloud infrastructure that runs all the AWS services
- C. Implementation of password policies for IAM users
- D. Security of customer environments by using AWS Network Firewall partners

Answer: B

QUESTION 152

Which AWS service can a company use to directly query and analyze AWS Cost and Usage Reports?

- A. Amazon Elasticsearch Service (Amazon ES)
- B. Amazon Athena
- C. Amazon Aurora
- D. AWS Glue

Answer: B

QUESTION 153

Which tasks require use of the AWS account root user? (Select TWO.)

- A. Changing an AWS Support plan
- B. Modifying an Amazon EC2 instance type
- C. Grouping resources in AWS Systems Manager
- D. Running applications in Amazon Elastic Kubernetes Service (Amazon EKS)
- E. Closing an AWS account

Answer: AE

QUESTION 154

A company is running and managing its own Docker environment on Amazon EC2 instances. The company wants an alternative to help manage cluster size, scheduling, and environment maintenance. Which AWS service meets these requirements?

- A. AWS Lambda
- B. Amazon RDS
- C. AWS Fargate
- D. Amazon Athena

Answer: C

QUESTION 155

A company needs to review its AWS Cloud expense history by department. Each department has its own AWS account. Which AWS feature or tool can the company use to meet this requirement?

- A. AWS Budgets
- B. Cost Explorer
- C. AWS Purchase Order Management
- D. AWS Cost Anomaly Detection

Answer: B

QUESTION 156

A company wants to store internal reports in an Amazon S3 bucket. A compliance requirement states that unauthorized

users must not be able to access any new data that is stored in the S3 bucket.
What should the company do to meet this requirement?

- A. Create a gateway VPC endpoint to the S3 bucket. Share only that endpoint with authorized users.
- B. Enable server-side encryption (SSE) with customer master keys (CMKs) that are available only to authorized users.
- C. Split the reports into multiple files before storing them in the S3 bucket.
- D. Apply an S3 bucket policy that provides access to the AWS account root user credentials. Instruct the root user to provide access to authorized users.

Answer: D

QUESTION 157

A retail company needs to build a highly available architecture for a new ecommerce platform. The company is using only AWS services that replicate data across multiple Availability Zones. Which AWS services should the company use to meet this requirement? (Select TWO.)

- A. Amazon EC2
- B. Amazon Elastic Block Store (Amazon EBS)
- C. Amazon Aurora
- D. Amazon DynamoDB
- E. Amazon Redshift

Answer: CD

QUESTION 158

A company wants to migrate its applications from on premises to the AWS Cloud. Which AWS service or feature can help automate the migration?

- A. AWS Data Exchange
- B. CloudEndure Migration
- C. AWS AppSync
- D. AWS CloudFormation

Answer: B

QUESTION 159

Which AWS service gives a company the ability to use a private, dedicated connection between a VPC and an on-premises data center?

- A. AWS Direct Connect
- B. Amazon API Gateway
- C. AWS Systems Manager
- D. AWS CloudFormation

Answer: A

QUESTION 160

A large retail company wants to use an AWS service to process clickstream data from the company's ecommerce website. The company wants to collect and analyze the streaming data in real time. Which AWS service meets these requirements?

- A. Amazon Kinesis
- B. Amazon Athena

- C. Amazon CloudFront
- D. AWS Data Exchange

Answer: A

QUESTION 161

Which task requires the use of AWS account root user credentials?

- A. The deletion of IAM users
- B. The change to a different AWS Support plan
- C. The creation of an organization in AWS Organizations
- D. The deletion of Amazon EC2 instances

Answer: B

QUESTION 162

Which phrase describes agility as a benefit of building in the AWS Cloud?

- A. The ability to pay only when computing resources are consumed, based on the volume of resources that are consumed
- B. The ability to eliminate guessing about infrastructure capacity needs
- C. The ability to support innovation through a reduction in the time that is required to make IT resources available to developers
- D. The ability to deploy an application in multiple AWS Regions around the world in minutes

Answer: C

QUESTION 163

Which of the following are economic benefits of using the AWS Cloud? (Select TWO.)

- A. Consumption-based pricing
- B. Perpetual licenses
- C. Economies of scale
- D. AWS Enterprise Support at no additional cost.
- E. Bring-your-own-hardware model

Answer: AC

QUESTION 164

Which AWS service will automatically identify and protect a user's sensitive data?

- A. Amazon GuardDuty
- B. Amazon Macie
- C. Amazon Cloud Watch
- D. Amazon Inspector

Answer: B

QUESTION 165

A company has only basic knowledge of AWS technologies.

Which AWS service provides the SIMPLEST way for the company to establish a website on AWS?

- A. Amazon Elastic File System (Amazon EFS)
- B. AWS Elastic Beanstalk

- C. AWS Lambda
- D. Amazon Lightsail

Answer: B

QUESTION 166

Which AWS database allows for analytics that use SQL queries?

- A. Amazon S3
- B. Amazon Redshift
- C. Amazon DynamoDB
- D. Amazon Neptune

Answer: B

QUESTION 167

A company plans to move its on-premises servers to Amazon EC2 instances. The company has 50 different business units and wants to separate each billing for each unit.

What should a cloud practitioner recommend?

- A. Use separate AWS accounts for each business unit, then filter by unit using the coverage report.
- B. Place each business unit in a different AWS Region, then filter by unit in Cost Explorer.
- C. Tag each business unit's resources, then filter by unit in Cost Explorer.
- D. Use a different VPC for each business unit, then filter by unit using an AWS Cost and Usage Report.

Answer: C

QUESTION 168

Which AWS service or tool provides a visualization of historical AWS spending patterns and projections of future AWS costs?

- A. AWS Cost and Usage Report
- B. AWS Budgets
- C. Cost Explorer
- D. Amazon CloudWatch

Answer: C

QUESTION 169

A company is running a key-value NoSQL workload on Amazon EC2 instances and needs to have scalability, failover protection, and backup capabilities. What is the MOST operationally efficient way to meet these requirements?

- A. Add additional EC2 instances to the database cluster.
- B. Run an identical copy of the database in a second Availability Zone.
- C. Migrate the database to Amazon DynamoDB.
- D. Migrate to a relational database.

Answer: C

QUESTION 170

A company wants to store a copy of its on-premises data backups to the AWS Cloud. Data durability is not a concern, but the company wants to be able to begin retrieval of the data within milliseconds.

What is the MOST cost-effective storage solution?

- A. Amazon S3 Standard
- B. Amazon S3 Standard-Infrequent Access (S3 Standard-IA)
- C. Amazon S3 Glacier
- D. Amazon S3 One Zone-Infrequent Access (S3 One Zone-IA)

Answer: D

QUESTION 171

Which of the following are benefits of AWS Trusted Advisor? (Select TWO.)

- A. Access to Amazon Simple Queue Service (Amazon SQS)
- B. Cost optimization recommendations
- C. Hourly refresh of the service limit checks
- D. Security checks
- E. AWS Identity and Access Management (IAM) approval management

Answer: BC

QUESTION 172

Which of the following is included within the security pillar of the AWS Well-Architected Framework?

- A. Identity federation
- B. Data protection
- C. Incident reporting
- D. Disaster recovery

Answer: C

QUESTION 173

A company is using an Amazon EC2 On-Demand Instance for an application. The company wants to migrate the application to an EC2 Reserved Instance (RI). The application will run on the instance for longer than 3 years. Which EC2 instance purchasing option meets these requirements MOST cost-effectively?

- A. A No Upfront Standard RI for a 1-year term, renewed each year
- B. An All Upfront Convertible RI for a 1-year term
- C. An All Upfront Standard RI for a 3-year term
- D. A No Upfront Convertible RI for a 3-year term

Answer: C

QUESTION 174

Which of the following are advantages of moving to the AWS Cloud? (Select TWO.)

- A. The ability to turn over the responsibility for all security to AWS.
- B. The ability to use the pay-as-you-go model.
- C. The ability to have full control over the physical infrastructure.
- D. No longer having to guess what capacity will be required.
- E. No longer worrying about users access controls.

Answer: BD

QUESTION 175

A company needs to use SQL syntax to perform a direct query of objects in an Amazon S3 bucket. Which AWS service can the company use to meet this requirement?

- A. AWS Glue
- B. Amazon Athena
- C. AWS Lambda
- D. Amazon Kinesis

Answer: A

QUESTION 176

A company deployed an Amazon EC2 instance last week. A developer realizes that the EC2 instance is no longer running. The developer reviews a list of provisioned EC2 instances, and the EC2 instance is no longer on the list. What can the developer do to generate a recent history of the EC2 instance?

- A. Run Cost Explorer to identify the start time and end time of the EC2 instance.
- B. Use Amazon Inspector to find out when the EC2 instance was stopped.
- C. Perform a search in AWS CloudTrail to find all EC2 instance-related events.
- D. Use AWS Secrets Manager to display hidden termination logs of the EC2 instance.

Answer: C

QUESTION 177

A global company has a large number of AWS accounts. The company needs central management of billing and security policies across accounts. Which AWS service or feature will meet these requirements?

- A. AWS Config
- B. AWS Organizations
- C. IAM groups
- D. AWS Trusted Advisor

Answer: B

QUESTION 178

Which AWS services can help reduce application latency and improve performance by using edge locations? (Select TWO.)

- A. Amazon Route 53
- B. AWS Global Accelerator
- C. AWS Direct Connect
- D. Amazon Connect
- E. Amazon CloudFront

Answer: BE

QUESTION 179

Which AWS service or feature allows users to connect with and deploy AWS services programmatically?

- A. AWS Management Console
- B. AWS Cloud
- C. AWS CodePipeline
- D. AWS software development kits (SDKs)

Answer: D

QUESTION 180

When designing AWS workloads to be operational even when there are component failures, what is an AWS best practice?

- A. Perform quarterly disaster recovery tests.
- B. Place the main component on the us-east-1 Region.
- C. Design for automatic failover to healthy resources.
- D. Design workloads to fit on a single Amazon EC2 instance.

Answer: C

QUESTION 181

An ecommerce company plans to move its data center workload to the AWS Cloud to support highly dynamic usage patterns. Which benefits make the AWS Cloud cost-effective for the migration of this type of workload? (Select TWO.)

- A. Reliability
- B. Security
- C. Elasticity
- D. Pay-as-you-go resource pricing
- E. High availability

Answer: CD

QUESTION 182

A company needs to establish a private virtual interface (VIF) from its on-premises network directly to its VPC. Which AWS connectivity option should the company use?

- A. VPC peering
- B. AWS PrivateLink
- C. AWS Global Accelerator
- D. AWS Direct Connect

Answer: A

QUESTION 183

A company needs to generate reports that will describe its usage of Amazon EC2 Reserved Instances across AWS accounts for the past month. Which AWS service or tool can the company use to meet this requirement?

- A. AWS Organizations
- B. Amazon S3
- C. Cost Explorer
- D. Amazon EC2 dashboard

Answer: C

QUESTION 184

A company has an application with robust hardware requirements. The application must be accessed by students who are using lightweight, low-cost laptops. Which AWS service will help the company deploy the application without investing in backend infrastructure or high-end client hardware?

- A. Amazon AppStream 2.0
- B. AWS AppSync
- C. Amazon WorkLink
- D. AWS Elastic Beanstalk

Answer: C

QUESTION 185

A company does not want to rely on elaborate forecasting to determine its usage of compute resources. Instead, the company wants to pay only for the resources that it uses. The company also needs the ability to increase or decrease its resource usage to meet business requirements. Which pillar of the AWS Well-Architected Framework aligns with these requirements?

- A. Operational excellence
- B. Security
- C. Reliability
- D. Cost optimization

Answer: A

QUESTION 186

Which AWS service can a company use to access compliance documentation and AWS agreements?

- A. AWS Security Hub
- B. AWS Identity and Access Management (IAM)
- C. AWS Artifact
- D. AWS Certificate Manager (ACM)

Answer: C

QUESTION 187

A company moves a workload to AWS to run on Amazon EC2 instances. The company needs to run the workload in the most cost-effective way. What can the company do to meet this requirement?

- A. Use AWS Key Management Service (AWS KMS).
- B. Use multiple AWS accounts and consolidated billing.
- C. Use AWS CloudFormation to deploy the infrastructure.
- D. Rightsize all the EC2 instances that are used in the deployment.

Answer: D

QUESTION 188

Which AWS services or features enable a user to establish a network connection from on premises to the AWS Cloud? (Select TWO.)

- A. AWS Direct Connect
- B. AWS Snowball
- C. Amazon S3
- D. VPN connection
- E. Amazon Connect

Answer: AD

QUESTION 189

Which AWS services are managed database services? (Select TWO.)

- A. Amazon Elastic Block Store (Amazon EBS)
- B. Amazon S3
- C. Amazon DynamoDB

- D. Amazon RDS
- E. Amazon Elastic File System (Amazon EFS)

Answer: CD

QUESTION 190

How does the AWS Cloud pricing model differ from the traditional on-premises storage pricing model?

- A. AWS resources do not incur costs
- B. There are no Infrastructure operating costs
- C. There are no upfront cost commitments
- D. There are no software licensing costs

Answer: C

QUESTION 191

Which AWS service enables the decoupling and scaling of applications?

- A. Amazon Simple Queue Service (Amazon SQS)
- B. AWS Outposts
- C. Amazon S3
- D. Amazon Simple Email Service (Amazon SES)

Answer: A

QUESTION 192

How does AWS Cloud computing help businesses reduce costs? (Select TWO.)

- A. AWS charges the same prices for services in every AWS Region.
- B. AWS enables capacity to be adjusted on demand.
- C. AWS offers discounts for Amazon EC2 instances that remain idle for more than 1 week.
- D. AWS does not charge for data sent from the AWS Cloud to the internet.
- E. AWS eliminates many of the costs of building and maintaining on-premises data centers.

Answer: BD

QUESTION 193

A company has a global website with static content. Which AWS service will deliver the static content with low latency?

- A. AWS Lambda
- B. Amazon CloudFront
- C. Amazon EC2 Auto Scaling
- D. AWS Compute Optimizer

Answer: B

QUESTION 194

A company has two AWS accounts in an organization in AWS Organizations for consolidated billing. All of the company's AWS resources are hosted in one AWS Region. Account A has purchased five Amazon EC2 Standard Reserved Instances (RIs) and has four EC2 instances running. Account B has not purchased any RIs and also has four EC2 instances running. Which statement is true regarding pricing for these eight instances?

- A. The eight instances will be charged as regular instances.
- B. Four Instances will be charged as RIs, and four will be charged as regular instances.

- C. Five instances will be charged as RIs, and three will be charged as regular Instances.
- D. The eight instances will be charged as RIs.

Answer: B

QUESTION 195

An ecommerce company has Amazon EC2 instances running as web servers. There is a predictable pattern of peak traffic load that occurs two times each day, always at the same time. The EC2 instances are idle for the remainder of the day. What is the MOST cost-effective way to manage these resources while maintaining fault tolerance?

- A. Use an Auto Scaling group to scale resources in and out based on demand.
- B. Purchase Reserved Instances to ensure peak capacity at all times.
- C. Write a cron job to stop the EC2 instances when the traffic demand is low.
- D. Write a script to vertically scale the EC2 instances during peak traffic demand.

Answer: A

QUESTION 196

A company needs to log information that shows all the AWS resources that the company has launched and terminated. Which AWS service can the company use to meet this requirement?

- A. AWS Trusted Advisor
- B. Amazon CloudWatch
- C. AWS Config
- D. AWS CloudTrail

Answer: C

QUESTION 197

What is a feature of Amazon Route 53?

- A. Routing users to infrastructure both Inside and outside AWS
- B. Providing a private connection to infrastructure inside AWS
- C. Providing a private connection to Infrastructure outside AWS
- D. Distributing content across edge locations

Answer: C

QUESTION 198

What does the concept of agility mean in AWS Cloud computing? (Select TWO.)

- A. The speed at which AWS resources are implemented
- B. The speed at which AWS creates new AWS Regions
- C. The ability to experiment quickly
- D. The elimination of wasted capacity
- E. The low cost of entry into cloud computing

Answer: AC

QUESTION 199

Which AWS Trusted Advisor check includes the verification of AWS CloudTrail logging?

- A. Performance
- B. Fault tolerance

- C. Security
- D. Service limits

Answer: C

QUESTION 200

Which AWS Cloud benefit occurs when a company does not have to maintain overprovisioned resources that support peak workloads during periods of low activity?

- A. Pay-as-you-go pricing
- B. Agility
- C. Economy of scale
- D. Elasticity

Answer: A

QUESTION 201

A company needs to use third-party software for its workload on AWS. Which AWS service or feature can the company use to purchase the software?

- A. AWS Resource Access Manager
- B. AWS Managed Services
- C. AWS License Manager
- D. AWS Marketplace

Answer: D

QUESTION 202

What is a benefit of using AWS Auto Scaling?

- A. Pay-as-you-go pricing is only available for the use of AWS Auto Scaling.
- B. AWS Auto Scaling is billed based on the duration of a given event.
- C. Users only pay for the AWS resources that are deployed with AWS Auto Scaling.
- D. Bulk discount pricing is automatically applied to AWS Auto Scaling usage.

Answer: C

QUESTION 203

Which AWS service continuously audits AWS resources and enables them to assess overall compliance?

- A. Amazon CloudWatch
- B. AWS Config
- C. AWS CloudTrail
- D. AWS Trusted Advisor

Answer: B

QUESTION 204

Which AWS service should a cloud practitioner use to receive real-time guidance for provisioning resources, based on AWS best practices related to security, cost optimization, and service limits?

- A. AWS Trusted Advisor
- B. AWS Config
- C. AWS Security Hub

D. AWS Systems Manager

Answer: A

QUESTION 205

According to the AWS shared responsibility model, what responsibility does a customer have when using Amazon RDS to host a database?

- A. Manage connections to the database
- B. Install Microsoft SQL Server
- C. Design encryption-at-rest strategies
- D. Apply minor database patches

Answer: C

QUESTION 206

Which pillar of the AWS Well-Architected Framework aligns with the ability to make frequent, small, and reversible changes to AWS Cloud architecture?

- A. Security
- B. Cost optimization
- C. Operational excellence
- D. Performance efficiency

Answer: C

QUESTION 207

A company needs access to cloud support engineers 24 hours a day, 7 days a week. What is the LEAST expensive AWS Support plan that meets this requirement?

- A. AWS Basic Support
- B. AWS Business Support
- C. AWS Developer Support
- D. AWS Enterprise Support

Answer: C

QUESTION 208

A user is moving a workload from a local data center to an architecture that is distributed between the local data center and the AWS Cloud. Which type of migration is this?

- A. On-premises to cloud native
- B. Hybrid to cloud native
- C. On-premises to hybrid
- D. Cloud native to hybrid

Answer: C

QUESTION 209

How can a user protect an Amazon EC2 instance from a suspicious IP address?

- A. Block the IP on the inbound rule of a network ACL.
- B. Block the IP on the outbound rule of a security group.
- C. Block the IP on the inbound rule of a security group and network ACL.

D. Block the IP on the outbound rule of a security group and network ACL.

Answer: C

QUESTION 210

Which of the following are features of network ACLs as they are used in the AWS Cloud? (Select TWO.)

- A. They are stateless.
- B. They are stateful.
- C. They evaluate all rules before allowing traffic.
- D. They process rules in order, starting with the lowest numbered rule, when deciding whether to allow traffic.
- E. They operate at the instance level.

Answer: BD

QUESTION 211

A company needs to optimize the cost of its AWS architecture by identifying unused resources and idle resources. Which AWS service or feature should the company use to meet this requirement?

- A. Amazon Inspector
- B. AWS Config
- C. AWS Trusted Advisor
- D. AWS Organizations

Answer: C

QUESTION 212

Which benefit of cloud computing gives a company the ability to deploy applications to users all over the world through a network of AWS Regions, Availability Zones, and edge locations?

- A. Economy of scale
- B. Global reach
- C. Agility
- D. High availability

Answer: B

QUESTION 213

Which of the following are among the five pillars of the AWS Well-Architected Framework? (Select TWO.)

- A. High availability
- B. Performance efficiency
- C. Cost optimization
- D. Going global In minutes
- E. Continuous development

Answer: BC

QUESTION 214

A company wants to improve the availability and performance of its application with users in different countries. Which AWS service or feature will help improve availability by routing traffic to the closest healthy endpoints?

- A. AWS Direct Connect

- B. AWS Global Accelerator
- C. AWS Well-Architected Tool
- D. AWS CLI

Answer: A

QUESTION 215

A company wants to provision an Amazon EC2 instance at the lowest possible cost for a long-term project. The EC2 instance cannot be interrupted. Which EC2 pricing model meets these requirements?

- A. Spot Instances
- B. On-Demand Instances
- C. Reserved Instances
- D. Dedicated Hosts

Answer: C

QUESTION 216

A company manages an on-premises MySQL database on a Windows server. The company wants to migrate the database to AWS and needs a solution that will reduce the administrative overhead of the database. Which AWS service will meet this requirement?

- A. Amazon Redshift
- B. Amazon ElastiCache
- C. Amazon RDS
- D. Amazon Elastic File System (Amazon EFS)

Answer: C

QUESTION 217

A company needs a data warehouse for analytical workloads. The data warehouse must support standard SQL queries. Which AWS service meets these requirements?

- A. Amazon EMR
- B. Amazon Athena
- C. Amazon Redshift
- D. Amazon RDS

Answer: B

QUESTION 218

What is one of the core principles to follow when designing a highly available application in the AWS Cloud?

- A. Design using a serverless architecture.
- B. Assume that all components within an application can fail.
- C. Design AWS Auto Scaling Into every application.
- D. Design all components using open-source code.

Answer: B

QUESTION 219

A company wants to store its noncritical, infrequently accessed data in Amazon S3. The data must be retrievable within seconds. Which S3 storage class meets these requirements MOST cost-effectively?

- A. S3 Glacier
- B. S3 Standard-Infrequent Access (S3 Standard-IA)
- C. S3 Intelligent-Tiering
- D. S3 One Zone-Infrequent Access (S3 One Zone-IA)

Answer: D

QUESTION 220

A company's IT administrator needs to configure the AWS CLI for programmatic access to AWS Cloud services for the company's employees. Which credential components must the IT administrator use to meet this requirement? (Select TWO.)

- A. A public key
- B. A secret access key
- C. An IAM role
- D. An access key ID
- E. A private key

Answer: DE

QUESTION 221

Which tasks require the use of AWS account root user credentials? (Select TWO.)

- A. Configure multi-factor authentication (MFA) delete for an Amazon S3 bucket.
- B. Create an IAM administrator access policy.
- C. Open a support ticket with AWS to request an increase to service quotas.
- D. Change an AWS Support plan.
- E. Change payment currency for an AWS account.

Answer: BD

QUESTION 222

An auditor is preparing for an annual security audit. The auditor requests certification details for a company's AWS hosted resources across multiple Availability Zones in the us-east-1 Region. How should the company respond to the auditor's request?

- A. Open an AWS Support ticket to request that the AWS technical account manager (TAM) respond and help the auditor
- B. Open an AWS Support ticket to request that the auditor receive approval to conduct an onsite assessment of the AWS data centers in which the company operates.
- C. Explain to the auditor that AWS does not need to be audited because the company's application is hosted in multiple Availability Zones.
- D. Use AWS Artifact to download the applicable report for AWS security controls. Provide the report to the auditor.

Answer: A

QUESTION 223

Which AWS service allows a user to provision a managed MySQL DB instance?

- A. Amazon DynamoDB
- B. Amazon Redshift
- C. Amazon RDS
- D. AWS Database Migration Service (AWS DMS)

Answer: C

QUESTION 224

A company has the AWS Basic Support plan. The company needs assistance in its efforts to deploy, test, and improve its AWS environment Which form of assistance can the company use at no cost?

- A. AWS Support API for programmatic case management
- B. AWS technical account manager (TAM) consultation
- C. AWS online documentation, whitepapers, blogs, and support forums
- D. In-person AWS training classes with an accredited instructor

Answer: C

QUESTION 225

Which AWS service keeps track of SSUTLS certificates, creates new certificates, and processes renewals?

- A. AWS Identity and Access Management (IAM)
- B. AWS Certificate Manager (ACM)
- C. AWS Config
- D. AWS Trusted Advisor

Answer: B

QUESTION 226

A company plans to migrate an on-premises Microsoft SQL Server database to the AWS Cloud The database supports a legacy application. The company wants to maintain administrative control of the database configuration and host operating system. Which AWS service or feature meets these requirements?

- A. Amazon RDS for SOL Server
- B. SQL Server on Amazon EC2
- B. Amazon DynamoDB
- C. Amazon DocumentDB

Answer: C

QUESTION 227

What is a benefit of using an Elastic Load Balancer (ELB) with applications running in the AWS Cloud?

- A. An ELB will automatically scale resources to meet capacity needs.
- B. An ELB can balance traffic across multiple compute resources.
- C. An ELB can span multiple AWS Regions.
- D. An ELB can balance traffic between multiple internet gateways.

Answer: B

QUESTION 228

An IT manager needs to monitor company AWS resources and collect utilization metrics from Amazon EC2 instances and Amazon DynamoDB. Which AWS service can the IT manager use to meet these requirements?

- A. AWS CloudTrall
- B. AWS Config
- C. Amazon CloudWatch
- D. AWS Trusted Advisor

Answer: C

QUESTION 229

Which AWS compute service automatically scales resources up or down to meet application workload demands?

- A. Amazon Simple Queue Service (Amazon SQS)
- B. Amazon EC2
- C. Amazon Aurora
- D. AWS Lambda

Answer: D

QUESTION 230

A company has an Amazon EC2 instance that must access AWS Secrets Manager to retrieve credentials. Which identity or service is required by the EC2 Instance to perform the task?

- A. Multi-factor authentication (MFA)
- B. IAM role
- C. IAM group
- D. Security groups

Answer: D

QUESTION 231

A company is planning to migrate an important production workload to the AWS Cloud. The company needs an AWS Support plan that offers a response time of less than 15 minutes to business-critical issues. Which AWS Support plan aligns with this requirement?

- A. AWS Basic Support
- B. AWS Developer Support
- C. AWS Business Support
- D. AWS Enterprise Support

Answer: B

QUESTION 232

Which AWS services or tools can help optimize the costs of AWS resources? (Select TWO.)

- A. AWS Trusted Advisor
- B. AWS CloudTrail
- C. AWS Personal Health Dashboard
- D. AWS Pricing Calculator
- E. Cost Explorer

Answer: DE

QUESTION 233

Which of the following security resources are supplied by AWS? (Select TWO.)

- A. Trusted Advisor checks
- B. Service intrusion metrics
- C. Penetration testing
- D. Educational webinars

Braindump2go Guarantee All Exams 100% Pass
One Time!

E. Peer-to-peer file-sharing detection
