QUESTION 168

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts.

The solution must persist between PowerShell sessions.

Solution: At a command prompt, you run `set.exe path=d:\scripts`.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 169

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run `set.exe PATHEXT=d:\scripts`.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 170

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

QUESTION 171

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

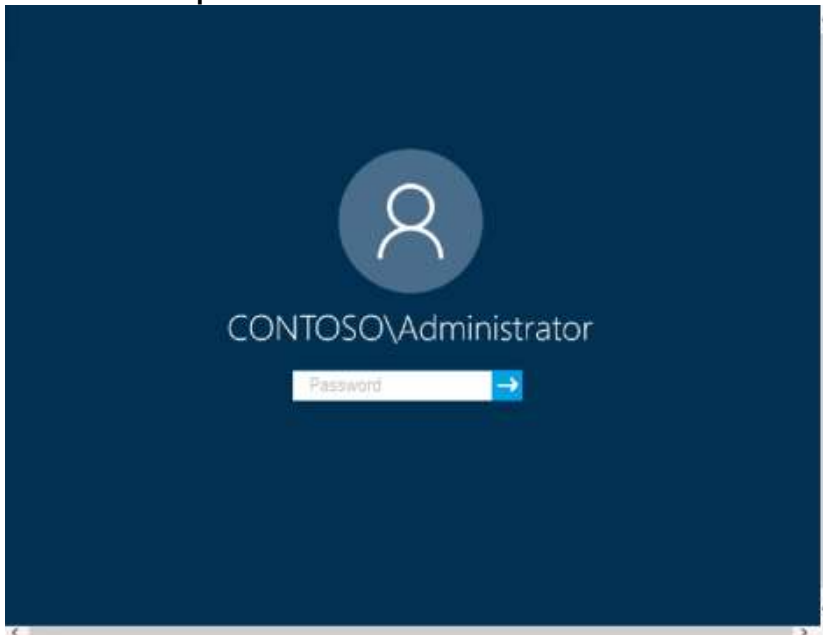

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Client2

Client3

DC1

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements:

VPN1 must connect to a server named vpn.contoso.com.

Only traffic to your company's network must be routed through VPN1.

To complete this task, sign in to the required computer or computers.

Answer:

1. On Client2, click on the Start button and go to settings.
2. Select Network & Internet.
3. Select VPN on the left-hand side
4. Click on the Add a VPN connection button.
5. Next, select the VPN provider—This will almost always be Windows (built-in).
6. Name your connection and enter the server name as provided by your IT technician. (**VPN1 and vpn.contoso.com**).
7. Add in your username and password as provided by your IT technician.
8. Click Save when done.
9. Closeout the PC settings windows.

Client3

DC1

You need to ensure that a local user named User1 can establish a Remote Desktop connection to Client2.

To complete this task, sign in to the required computer or computers.

Answer:

Add User to Remote Desktop Users Group via Settings App

1. Open the Settings app on Client2 and go to **System** -> **Remote Desktop**. Click on the **Select users that can remotely access this PC** link on the right side.
2. When the Remote Desktop Users dialog opens, click on **Add**.
3. Click on **Advanced**.
4. Click on **Find Now** and then select any user account you want to add to the "Remote Desktop Users" group, and click **OK**.
5. Click **OK** and you're done.

Tasks**Computers**

Client1

Client2

Client3

DC1

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

Answer:

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

1. Open **Server Manager**.
2. From **Tools** menu, select **Active Directory Users and Computers**
3. Double click at your domain on the left and then select **Builtin**.
4. Open **Remote Desktop Users** on the right pane.
5. At **Members** tab, click **Add**.
6. Type the AD users that you want to give Remote access to the RDS Server and click **OK**.
7. After selecting the remote desktop users, click **OK** again to close the window.

Step 2. Allow the log on through remote desktop Services.

1. Open Group Policy Editor. To do that:
 - a. Simultaneously press the **Windows**  + **R** keys to open run command box.
 - b. Type **gpedit.msc** and press **Enter**.
2. In Group Policy Editor navigate to: **Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment**.
3. At the right Pane: double click at **Allow log on through Remote Desktop Services**.
4. Click **Add User or Group**.
5. Type **remote** and then click **Check Names**.
6. Select the **Remote Desktop Users** and click **OK**.
7. Click **OK** at 'Select users, computers...' window.
8. Finally click **OK again and close Group Policy Editor**.
