**QUESTION 314**

**Case Study 3 - Litware, Inc**

**Overview**

**General Overview**

Litware, Inc. is a consulting company that has a main office in Montreal and a branch office in Seattle. Litware collaborates with a third-party company named ADatum Corporation.

**Environment**

**On-Premises Environment**

The network of Litware contains an Active Directory domain named litware.com. The domain contains three organizational units (OUs) named LitwareAdmins, Montreal Users, and Seattle Users and the users shown in the following table.

Name	OU
Admin1	LitwareAdmins
Admin2	LitwareAdmins
Admin3	LitwareAdmins
Admin4	LitwareAdmins

The domain contains 2,000 Windows 10 Pro devices and 100 servers that run Windows Server 2019.

**Cloud environment**

Litware has a pilot Microsoft 365 subscription that includes Microsoft Office 365 Enterprise E3 licenses and Azure Active Directory Premium Plan 2 licenses.

The subscription contains a verified DNS domain named litware.com.

Azure AD Connect is installed and has the following configurations:

- Password hash synchronization is enabled.
- Synchronization is enabled for the LitwareAdmins OU only.

Users are assigned the roles shown in the following table.

Name	Role
Admin1	Global Administrator
Admin2	Helpdesk admin
Admin3	Security admin
Admin4	User Administrator

Self-service password reset (SSPR) is enabled.

The Azure Active Directory (Azure AD) tenant has Security defaults enabled.

#### Requirements

#### Planned Changes

Litware identifies the following issues:

- Admin1 cannot create conditional access policies.
- Admin4 receives an error when attempting to use SSPR.
- Users access new Office 365 service and feature updates before the updates are reviewed by Admin2.

#### Technical Requirements

Litware plans to implement the following changes:

- Implement Microsoft Intune.
  - Implement Microsoft Teams.
  - Implement Microsoft Defender for Office 365.
  - Ensure that users can install Office 365 apps on their device.
  - Convert all the Windows 10 Pro devices to Windows 10 Enterprise E5.
  - Configure Azure AD Connect to sync the Montreal Users OU and the Seattle Users OU.
- You need to configure just in time access to meet the technical requirements.

What should you use?

- A. access reviews
- B. entitlement management
- C. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- D. Azure Active Directory (Azure AD) Identity Protection

**Answer: C**

#### Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure>

#### QUESTION 315

#### Case Study 3 - Litware, Inc

#### Overview

#### General Overview

Litware, Inc. is a consulting company that has a main office in Montreal and a branch office in Seattle. Litware collaborates with a third-party company named ADatum Corporation.

#### Environment

#### On-Premises Environment

The network of Litware contains an Active Directory domain named litware.com. The domain contains three organizational units (OUs) named LitwareAdmins, Montreal Users, and Seattle Users and the users shown in the following table.

Name	OU
Admin1	LitwareAdmins
Admin2	LitwareAdmins
Admin3	LitwareAdmins
Admin4	LitwareAdmins

The domain contains 2,000 Windows 10 Pro devices and 100 servers that run Windows Server 2019.

**Cloud environment**

Litware has a pilot Microsoft 365 subscription that includes Microsoft Office 365 Enterprise E3 licenses and Azure Active Directory Premium Plan 2 licenses.

The subscription contains a verified DNS domain named litware.com.

Azure AD Connect is installed and has the following configurations:

- Password hash synchronization is enabled.
- Synchronization is enabled for the LitwareAdmins OU only.

Users are assigned the roles shown in the following table.

Name	Role
Admin1	Global Administrator
Admin2	Helpdesk admin
Admin3	Security admin
Admin4	User Administrator

Self-service password reset (SSPR) is enabled.

The Azure Active Directory (Azure AD) tenant has Security defaults enabled.

**Requirements**

**Planned Changes**

Litware identifies the following issues:

- Admin1 cannot create conditional access policies.
- Admin4 receives an error when attempting to use SSPR.
- Users access new Office 365 service and feature updates before the updates are reviewed by Admin2.

**Technical Requirements**

Litware plans to implement the following changes:

- Implement Microsoft Intune.
- Implement Microsoft Teams.
- Implement Microsoft Defender for Office 365.
- Ensure that users can install Office 365 apps on their device.
- Convert all the Windows 10 Pro devices to Windows 10 Enterprise E5.
- Configure Azure AD Connect to sync the Montreal Users OU and the Seattle Users OU.

Hotspot Question

You need to ensure that Admin4 can use SSPR.

Which tool should you use, and which action should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

Action:  ▼

Enable app registrations.
Enable password writeback.
able password hash synchronization
Disable password hash synchronization

Tool:  ▼

Azure AD Connect
Synchronization Rules Editor
Azure Active Directory admin center

Answer:

## Answer Area

Action:  ▼

Enable app registrations.
Enable password writeback.
able password hash synchronization
Disable password hash synchronization

Tool:  ▼

Azure AD Connect
Synchronization Rules Editor
Azure Active Directory admin center

- Configure Azure AD Connect to sync the Montreal Users OU and the Seattle Users OU.

**Hotspot Question**

You need to configure the Office 365 service status notifications and limit access to the service and feature updates. The solution must meet the technical requirements.

What should you configure in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

To configure the notifications:

▼
Briefing email
Help desk information
Organization information

To limit access:

▼
Privileged Access
Release preferences
Office installation options

**Answer:**

## Answer Area

To configure the notifications:

	▼
Briefing email	
Help desk information	
Organization information	

To limit access:

	▼
Privileged Access	
Release preferences	
Office installation options	

**Explanation:**

**QUESTION 318**

After your company migrates their on-premises email solution to Microsoft Exchange Online, you are tasked with assessing which licenses to acquire.

You are informed that licenses acquired for the company's IT and Managers groups should allow for the following: The IT group needs to have access to the Microsoft Azure Active Directory (Azure AD) Privileged Identity Management. Both the IT and Managers groups should have access to Microsoft Azure Active Directory (Azure AD) conditional access.

You need to make sure that the licensing costs are kept to a minimum.

Which two of the following options should you recommend? (Choose two.)

- A. You should acquire Microsoft 365 E3 licenses for the Managers group members.
- B. You should acquire Microsoft 365 E5 licenses for the Managers group members.
- C. You should acquire Microsoft 365 E3 licenses for the IT group members.
- D. You should acquire Microsoft 365 E5 licenses for the Managers group members.

**Answer:** AD

**QUESTION 319**

Your company's Microsoft 365 tenant includes Microsoft Exchange Online.

You have been tasked with enabling calendar sharing with a partner organization, who also has a Microsoft 365 tenant. You have to make sure that users in the partner organization has access to the calendar of every user instantly.

Which of the following actions should you take?

- A. Configure a conditional access policy via Exchange admin center.
- B. Configure a new organization relationship via Exchange admin center.
- C. Configure the sharing settings via Exchange admin center.
- D. Run the Set-SPOSite cmdlet.

**Answer:** B

**Explanation:**

<https://docs.microsoft.com/en-us/exchange/sharing/organization-relationships/create-an-organization-relationship>

**QUESTION 320**

**Note:** The question is included in a number of questions that depicts the identical set-up. However, every

<https://www.braindump2go.com/ms-100.html>

**question has a distinctive result. Establish if the solution satisfies the requirements.**

After acquiring a Microsoft 365 Enterprise subscription, you are tasked with migrating your company's Microsoft Exchange Server 2016 mailboxes and groups to Exchange Online.

You have started a new migration batch. You, subsequently, receive complaints from on-premises Exchange Server users about slow performance.

Your analysis shows that the issue has resulted from the migration. You want to make sure that the effect the mailbox migration has on users is decreased.

Solution: You create a label policy.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 321**

**Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.**

After acquiring a Microsoft 365 Enterprise subscription, you are tasked with migrating your company's Microsoft Exchange Server 2016 mailboxes and groups to Exchange Online.

You have started a new migration batch. You, subsequently, receive complaints from on-premises Exchange Server users about slow performance.

Your analysis shows that the issue has resulted from the migration. You want to make sure that the effect the mailbox migration has on users is decreased.

Solution: You create a mail flow rule.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### **QUESTION 322**

**Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.**

After acquiring a Microsoft 365 Enterprise subscription, you are tasked with migrating your company's Microsoft Exchange Server 2016 mailboxes and groups to Exchange Online.

You have started a new migration batch. You, subsequently, receive complaints from on-premises Exchange Server users about slow performance.

Your analysis shows that the issue has resulted from the migration. You want to make sure that the effect the mailbox migration has on users is decreased.

Solution: You modify the migration endpoint settings.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

#### **QUESTION 323**

You need to consider the underlined segment to establish whether it is accurate.

Your company has a Microsoft 365 subscription.

To prevent your company from receiving phishing email messages, create a new mail flow rule.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

- A. No adjustment required
- B. Label policy.

- C. Threat management policy.
- D. Spam filter policy.

**Answer: C**

**Explanation:**

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies>

**QUESTION 324**

You work for a company manages all their identities in the cloud.

After acquiring a new domain name, you are tasked with making sure that the primary email address of all new mailboxes uses the new domain.

Which of the following is the Microsoft Exchange Online PowerShell cmdlet that you should run?

- A. Update-EmailAddressPolicy
- B. Update-OfflineAddressBook
- C. Set-AddressBookPolicy
- D. Set-EmailAddressPolicy

**Answer: D**

**Explanation:**

<https://docs.microsoft.com/en-us/powershell/module/exchange/email-addresses-and-address-books/set-emailaddresspolicy?view=exchange-ps>

**QUESTION 325**

You are responsible for your company's Microsoft 365 subscription.

The company introduces a security policy that requires DLP incident reports to be automatically sent to legal department users.

You are required to configure the reports to be delivered via email as often you can.

Which of the following is the option you should use?

- A. Annually
- B. Monthly
- C. Weekly
- D. Quarterly

**Answer: C**

**QUESTION 326**

You have been tasked with detecting all users in your company's Microsoft 365 subscription who has a Microsoft Office 365 license as a result of belonging to a group.

You need to make sure that the group used to assign the license is included in your results.

Which of the following actions should you take?

- A. You should access the Azure portal, and navigate to the Licenses blade.
- B. You should access the Microsoft 365 admin center, and navigate to the Products blade.
- C. You should access the Azure portal, and navigate to the Monitor blade.
- D. You should access the Microsoft 365 admin center, and navigate to the Users blade.

**Answer: A**

**QUESTION 327**

You have previously accessed the Security & Compliance admin center to upload a number of archive PST files to Microsoft 365.

When you try to run an import job for the PST files 45 days later, you find that they have been removed from Microsoft 365.

Which of the following is the number of days that Microsoft 365 retains PST file before deleting them automatically?

- A. 1 day.
- B. 30 days.
- C. 15 days.
- D. 45 days.

**Answer:** B

**Explanation:**

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365>

**QUESTION 328**

You need to consider the underlined segment to establish whether it is accurate.

You have been tasked with deploying a Windows 10 Enterprise image to a large number of Windows 8.1 devices.

These devices are joined to an Active Directory domain.

You use the in-place upgrade Windows 10 deployment method for the task.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

What should you recommend?

- A. No adjustment required.
- B. Windows Autopilot
- C. Windows Update
- D. Azure AD Connect

**Answer:** A

**Explanation:**

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/windows10-infrastructure>

**QUESTION 329**

**Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.**

Your company currently has an on-premises Active Directory forest.

You have been tasked with assessing the application of Microsoft 365 and the utilization of an authentication strategy.

You have been informed that the authentication strategy should permit sign in via smart card-based certificates, and also permitting the use of SSO to connect to on-premises and Microsoft 365 services.

Solution: You recommend the use of pass-through authentication and seamless SSO with password hash synchronization as the authentication strategy.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**QUESTION 330**

**Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.**

Your company currently has an on-premises Active Directory forest.

You have been tasked with assessing the application of Microsoft 365 and the utilization of an authentication strategy.

You have been informed that the authentication strategy should permit sign in via smart card-based certificates, and also permitting the use of SSO to connect to on-premises and Microsoft 365 services.

Solution: You recommend the use of password hash synchronization and seamless SSO as the authentication strategy.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**QUESTION 331**

**Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.**

Your company currently has an on-premises Active Directory forest.

You have been tasked with assessing the application of Microsoft 365 and the utilization of an authentication strategy.

You have been informed that the authentication strategy should permit sign in via smart card-based certificates, and also permitting the use of SSO to connect to on-premises and Microsoft 365 services.

Solution: You recommend the use of federation with Active Directory Federation Services (AD FS) as the authentication strategy.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

**QUESTION 332**

Your company's Microsoft Azure Active Directory (Azure AD) tenant includes four users. Three of the users are each configured with the Password administrator, Security administrator, and the User administrator roles respectively. The fourth user has no role configured.

Which of the following are the users that are able to reset the password of the fourth user?

- A. The users with the Password administrator and the User administrator roles.
- B. The users with the Security administrator and the User administrator roles.
- C. The users with the Password administrator and the Security administrator roles.
- D. The user with the Password administrator role only.

**Answer: A**

**Explanation:**

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>

**QUESTION 333**

Your network contains an Active Directory domain that spans a number of cities and a multitude of users.

After acquiring Microsoft 365, you intend to deploy quite a few Microsoft 365 services.

You want to make sure that pass-through authentication and seamless SSO can be used in your environment. You also decide that Azure AD Connect won't be configured to be in staging mode.

With regards to redundancy limits, which of the following is the maximum amount of servers that can run Azure AD Connect?

- A. 1
- B. 3
- C. 5
- D. 7

**Answer: A**

**QUESTION 334**

Your network contains an Active Directory domain that spans a number of cities and a multitude of users.

After acquiring Microsoft 365, you intend to deploy quite a few Microsoft 365 services.

You want to make sure that pass-through authentication and seamless SSO can be used in your environment. You also decide that Azure AD Connect won't be configured to be in staging mode.

With regards to redundancy limits, which of the following is the most amount of servers that can run standalone Authentication Agents?

- A. 7
- B. 9
- C. 11
- D. 13

**Answer: C**
