QUESTION 292

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Security & Compliance admin center, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From Windows PowerShell, you run the New-ComplianceSecurityFilter cmdlet with the appropriate parameters.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/permissions-filtering-for-content-search>

<https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance-content-search/newcompliancesecurityfilter?view=exchange-ps>

QUESTION 293

You need to evaluate compliance with European Union privacy regulations for customer data.

What should you do in the Microsoft 365 compliance center?

- A. Create a Data Subject Request (DSR)
- B. Create a data loss prevention (DLP) policy for General Data Protection Regulation (GDPR) data
- C. Create an assessment based on the EU GDPR assessment template
- D. Create an assessment based on the Data Protection Baseline assessment template

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/compliance/regulatory/gdpr#data-protection-impact-assessment>

<https://docs.microsoft.com/en-us/microsoft-365/compliance/compliance-manager-templates-list?view=o365-worldwide>

QUESTION 294

Your company has an Active Directory domain that includes Windows 10 domain-joined devices.

You are planning to make use of Windows Update for Business to update the devices.

You are then instructed to defer Quality updates for the longest period allowed.

Which of the following is the option you should configure?

- A. 7 days
- B. 30 days
- C. 90 days
- D. 365 days

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-manage-updates-wufb>

QUESTION 295

Your company has an Active Directory domain that includes Windows 10 domain-joined devices.

You are planning to make use of Windows Update for Business to update the devices.

You are then instructed to defer Feature updates for the longest period allowed.

Which of the following is the option you should configure?

- A. 30 days
- B. 90 days
- C. 180 days
- D. 365 days

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-manage-updates-wufb>

QUESTION 296

You have an Active Directory domain that includes Windows 8.1 and Windows 10 devices. You also have Microsoft System Center Configuration Manager (Current Branch) configured in your environment.

You want to make sure that the upgrade readiness of the Windows 8.1 devices can be evaluated. You also want to make sure that the update compliance of all the Windows 10 devices can be evaluated.

You start by creating a Microsoft Azure Log Analytics Workspace.

Which of the following actions should you take NEXT?

- A. Enroll all devices in Intune.
- B. Configure a device compliance policy.
- C. Configure a commercial ID for all devices.
- D. Configure all devices to join the Windows Insider program.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/upgrade-readiness-get-started>

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-get-started>

QUESTION 297

You need to consider the underlined segment to establish whether it is accurate.

Your company has a Microsoft Azure Active Directory (Azure AD) tenant that includes a Microsoft 365 subscription.

To make sure that administrators have the ability to manage the configuration settings for all the Windows 10 devices, you should configure the Enrollment restrictions settings.

Select “No adjustment required” if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

What should you configure?

- A. No adjustment required.

- B. MDM authority
- C. MAM authority
- D. device enrollment settings

Answer: B**Explanation:**<https://docs.microsoft.com/en-us/intune/mdm-authority-set>**QUESTION 298**

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.

You have been tasked with assigning a user the minimum required role to allow him to sign up for Microsoft Store for Business.

Solution: You assign the user the Billing account role.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B**Explanation:**<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>**QUESTION 299**

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.

You have been tasked with assigning a user the minimum required role to allow him to sign up for Microsoft Store for Business.

Solution: You assign the user the Purchasing role.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B**Explanation:**<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>**QUESTION 300**

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.

You have been tasked with assigning a user the minimum required role to allow him to sign up for Microsoft Store for Business.

Solution: You assign the user the Global administrator role.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A**Explanation:**<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>**QUESTION 301**[MS-101 Exam Dumps](#) [MS-101 Exam Questions](#) [MS-101 PDF Dumps](#) [MS-101 VCE Dumps](#)

<https://www.braindump2go.com/ms-101.html>

Your company makes use of Microsoft System Center Configuration Manager (Current Branch) for device management.

The environment includes Windows 10, Windows 8.1, Android, and iOS devices.

Which of the following is TRUE with regards to the co-management of the above devices?

- A. None of the devices can be managed via co-management.
- B. The Android devices cannot be managed via co-management.
- C. Only the Windows 10 devices can be managed via co-management.
- D. All of the devices can be managed via co-management.

Answer: D

Explanation:

https://docs.microsoft.com/en-us/sccm/core/plan-design/choose-a-device-management-solution#bkmk_intune

QUESTION 302

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have a Microsoft 365 E3 subscription that includes Windows 10 Pro Microsoft Azure Active Directory (Azure AD) joined devices.

You have been tasked with upgrading the edition of the Windows 10 devices to Enterprise. Your strategy should allow for the upgrade to occur upon the users' next sign-in, with minimum interruption for the users.

Solution: You make use of Windows Update to achieve your goal.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 303

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have a Microsoft 365 E3 subscription that includes Windows 10 Pro Microsoft Azure Active Directory (Azure AD) joined devices.

You have been tasked with upgrading the edition of the Windows 10 devices to Enterprise. Your strategy should allow for the upgrade to occur upon the users' next sign-in, with minimum interruption for the users.

Solution: You configure a provisioning package to achieve your goal.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 304

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have a Microsoft 365 E3 subscription that includes Windows 10 Pro Microsoft Azure Active Directory (Azure AD) joined devices.

You have been tasked with upgrading the edition of the Windows 10 devices to Enterprise. Your strategy should allow for the upgrade to occur upon the users' next sign-in, with minimum interruption for the users.

Solution: You make use of Windows Autopilot to achieve your goal.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

QUESTION 305

Your company has an on-premises Active Directory domain that includes 50 Windows 10 devices. Your company also has an Azure subscription.

You have been tasked with monitoring System log events from the devices centrally. You have added and configured an Azure Log Analytics workspace in Azure.

Which of the following actions should you take on the devices?

- A. Enroll the devices in Intune.
- B. Create an event subscription.
- C. Install the Microsoft Monitoring Agent.
- D. Enroll in Microsoft Endpoint Manager.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/azure/azure-monitor/learn/quick-collect-windows-computer>

QUESTION 306

Your company has a 2.62 version of an Azure ATP sensor configured with the Delayed Deployment set to ON.

The Azure ATP service has just been updated.

Which of the following is the amount of hours the sensor update will be delayed for?

- A. 12
- B. 24
- C. 36
- D. 72

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/sensor-update>

QUESTION 307

Your Microsoft 365 subscription includes five Windows 8.1, five Windows 10, and five Windows Server 2016 devices. The devices must be onboarded to Microsoft Defender Advanced Threat Protection (ATP) without having to install software on the devices if possible.

You want to onboard the Windows 10 devices.

Solution: You make use of a Microsoft Azure ATP sensor.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-endpoints-windows-defender-advanced-threat-protection>

QUESTION 308

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your Microsoft 365 subscription includes five Windows 8.1, five Windows 10, and five Windows Server 2016 devices. The devices must be onboarded to Microsoft Defender Advanced Threat Protection (ATP) without having to install software on the devices if possible.

You want to onboard the Windows 10 devices.

[**https://www.braindump2go.com/ms-101.html**](https://www.braindump2go.com/ms-101.html)

Solution: You install the Microsoft Monitoring Agent.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-endpoints-windows-defender-advanced-threat-protection>

QUESTION 309

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your Microsoft 365 subscription includes five Windows 8.1, five Windows 10, and five Windows Server 2016 devices. The devices must be onboarded to Microsoft Defender Advanced Threat Protection (ATP) without having to install software on the devices if possible.

You want to onboard the Windows 10 devices.

Solution: You run a local script.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-endpoints-windows-defender-advanced-threat-protection>

QUESTION 310

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Company users store documents using Dropbox Business, which they access Dropbox Business via the MyApp portal.

You want to make sure that Microsoft 365 identity is used to authenticate user access to Dropbox Business. Also, in the event that information is downloaded to an untrusted device, the information needs to be protected.

Which of the following actions should you take via the Azure Active Directory admin center?

- A. You should configure an app protection policy.
- B. You should configure the device settings.
- C. You should configure application proxy settings.
- D. You should configure device configuration policy.

Answer: C

Explanation:

Azure Active Directory's Application Proxy provides secure remote access to on-premises web applications. After a single sign-on to Azure AD, users can access both cloud and on-premises applications through an external URL or an internal application portal.

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy>

QUESTION 311

Your company has a Microsoft 365 subscription.

User email is stored in Microsoft Exchange Online.

You have been instructed to keep a copy of all email messages that includes a specific word in the mailbox of a specified user.

Which of the following actions should you take from the Security & Compliance admin center?

- A. You should create a label and a label policy.
- B. You should create a mail flow rule.
- C. You should configure an in-place hold.
- D. You should configure a retention policy.

Answer: A**Explanation:**<https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-classification>**QUESTION 312**

Your company has recently acquired a Microsoft 365 subscription.

You have been tasked with logging all mailbox folder permission modifications a user who has a mailbox in Microsoft Exchange Online.

You are making use of the Set-Mailbox cmdlet.

Which of the following is the parameter you should use?

- A. -AuditAdmin
- B. -AuditDelegate
- C. -AuditEnabled
- D. -AuditLog

Answer: C**Explanation:**<https://docs.microsoft.com/en-us/powershell/module/exchange/mailboxes/set-mailbox?view=exchange-ps>**QUESTION 313**

Your company has a Microsoft 365 subscription in which you have just configured a Microsoft SharePoint Online tenant.

You are preparing to create an alert policy that only produces an alert when malware is discovered in 6 or more documents stored in SharePoint Online over a 10-minute cycle.

Which of the following is the action you should perform initially?

- A. You should enable Microsoft Office 365 Cloud App Security.
- B. You should deploy Microsoft Defender Advanced Threat Protection (Microsoft Defender ATP).
- C. You should create a data loss prevention (DLP) policy.
- D. You should upgrade the Microsoft 365 subscription.

Answer: B**QUESTION 314**

You need to consider the underlined segment to establish whether it is accurate.

Your company has a Microsoft 365 subscription.

To receive a notification when users receive email that includes infected files, you create an app protection policy. Select “No adjustment required” if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

- A. No adjustment required
- B. a threat management policy
- C. a data loss prevention (DLP) policy
- D. an alert policy

Answer: D**Explanation:**<https://docs.microsoft.com/en-us/office365/securitycompliance/alert-policies>
