QUESTION 315

You need to consider the underlined segment to establish whether it is accurate.

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.

To sign up for Microsoft Store for Business with minimum privileges required, you need the Global Administrator role. Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

- A. No adjustment required
- B. Billing account owner
- C. Basic purchaser
- D. Service administrator

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/microsoft-store/sign-up-microsoft-store-for-business>

QUESTION 316

Your company makes use of Microsoft Defender Advanced Threat Protection (ATP) to protect thousands of Windows 10 devices.

You want to display Microsoft Defender ATP alert events. The events must be filtered by high severity. The events should also have happened in the last week.

Which of the following actions should you take?

- A. You should make use of the threat intelligence API in Microsoft Defender ATP.
- B. You should make use of Automated investigations in Microsoft Defender ATP.
- C. You should make use of the System Event log.
- D. You should make use of Azure Analytics.

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/investigate-alerts-windows-defender-advanced-threat-protection>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/automated-investigations-windows-defender-advanced-threat-protection>

QUESTION 317

Your company has a Microsoft 365 subscription.

As part of a threat management strategy, you want to make sure that the possible effect of opening files in Microsoft SharePoint that contain malicious content is reduced for users.

Which of the following is a policy that you should create from the Security & Compliance admin center?

<https://www.braindump2go.com/ms-101.html>

- A. A retention policy
- B. A Safe Links policy
- C. A DLP policy
- D. A Safe Attachments policy

Answer: D

Explanation:

ATP Safe Attachments provides zero-day protection to safeguard your messaging system, by checking email attachments for malicious content. It routes all messages and attachments that do not have a virus/malware signature to a special environment, and then uses machine learning and analysis techniques to detect malicious intent. If no suspicious activity is found, the message is forwarded to the mailbox.

QUESTION 318

Your company has a Microsoft 365 subscription.

As part of a threat management strategy, you want to make sure that the possible effect of impersonation and spoofing attacks in email messages is reduced for users.

Which of the following is a policy that you should create from the Security & Compliance admin center?

- A. A retention policy
- B. An Anti-spam policy
- C. An Anti-phishing policy
- D. A DLP policy

Answer: C

Explanation:

ATP anti-phishing protection detects attempts to impersonate your users and custom domains. It applies machine learning models and advanced impersonation-detection algorithms to avert phishing attacks.

QUESTION 319

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You are required to configure a policy from the Exchange admin center that alerts you when users receive infected documents via email.

Solution: You create a spam filter policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/anti-spam-and-anti-malware-protection>

QUESTION 320

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You are required to configure a policy from the Exchange admin center that alerts you when users receive infected documents via email.

Solution: You create a DLP policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/anti-spam-and-anti-malware-protection>

QUESTION 321

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You are required to configure a policy from the Exchange admin center that alerts you when users receive infected documents via email.

Solution: You create an anti-malware policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/anti-spam-and-anti-malware-protection>

QUESTION 322

You need to consider the underlined segment to establish whether it is accurate.

Your company's Microsoft 365 subscription includes a Microsoft Azure Active Directory (Azure AD) tenant.

To make sure that a tenant user has the ability to publish retention labels from the Security & Compliance admin center using the minimum permissions necessary, you should assign the user the Global Administrator role.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

To which role group should you add User1?

- A. No adjustment required
- B. Records Management
- C. Reviewer
- D. Compliance Data Administrator

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/file-plan-manager>

QUESTION 323

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You have been tasked with making sure that managed iOS devices are prevented from copying and pasting company data from Microsoft Word documents to other apps.

Solution: You create a DLP policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 324

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You have been tasked with making sure that managed iOS devices are prevented from copying and pasting company data from Microsoft Word documents to other apps.

Solution: You create a conditional access policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

QUESTION 325

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You have been tasked with making sure that managed iOS devices are prevented from copying and pasting company data from Microsoft Word documents to other apps.

Solution: You create an app protection policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

QUESTION 326

You have recently created a retention policy.

You want to make sure that users are unable to disable the policy. Your solution should also prevent the users from minimizing the retention period.

Which of the following actions should you take?

- A. You should run the `Set-RetentionCompliancePolicy` cmdlet with the `-Restrictive Retention` parameter set to `True`.
- B. You should run the `Set-RetentionCompliancePolicy` cmdlet with the `-Restrictive Retention` parameter set to `False`.
- C. You should run the `Set-HoldCompliancePolicy` cmdlet with the `-Restrictive Retention` parameter set to `True`.
- D. You should run the `Set-RetentionCompliancePolicy` cmdlet with the `-Restrictive Retention` parameter set to `False`.

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance-retention/set-retentioncompliancepolicy?view=exchange-ps>

QUESTION 327

Your company has Microsoft Azure Active Directory (Azure AD) tenant, and makes use of Windows Information

Protection (WIP).

You have been tasked with changing which users are impacted by Windows Information Protection (WIP). Which of the following should you configure?

- A. The Azure AD device settings
- B. The MAM User scope
- C. A compliance policy
- D. A conditional access policy

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure>

QUESTION 328

You need to consider the underlined segment to establish whether it is accurate.

To amend which applications are influenced by Windows Information Protection (WIP), you should configure the Azure AD app registration.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

- A. No adjustment required
- B. the MDM authority
- C. an app protection policy
- D. a DLP policy

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure>

QUESTION 329

Your company has a Microsoft 365 E3 subscription with auditing enabled

You are responsible for examining the Microsoft 365 audit log.

Which of the following is the number of days that the data in the audit log will be available?

- A. 7
- B. 30
- C. 90
- D. 180

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance>

QUESTION 330

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription, with a data loss prevention (DLP) policy configured.

You discover that users are erroneously flagging content as false positive and circumventing the DLP policy.

You want to make sure that the DLP policy is not circumvented.

Solution: You configure an alert policy.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

QUESTION 331

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription, with a data loss prevention (DLP) policy configured.

You discover that users are erroneously flagging content as false positive and circumventing the DLP policy.

You want to make sure that the DLP policy is not circumvented.

Solution: You configure incident reports.

Does the solution meet the goal?

A. Yes

B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

QUESTION 332

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription, with a data loss prevention (DLP) policy configured.

You discover that users are erroneously flagging content as false positive and circumventing the DLP policy.

You want to make sure that the DLP policy is not circumvented.

Solution: You configure user overrides.

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

QUESTION 333

You need to consider the underlined segment to establish whether it is accurate.

To download the results of a content search, you should acquire an export key first.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required

B. a .csv file

C. an import key

D. a PIN

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/export-search-results>

QUESTION 334

You need to consider the underlined segment to establish whether it is accurate.

To place a hold on all mailbox content, the eDiscovery Manager role is required as a minimum.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

- A. No adjustment required
- B. eDiscovery Administrator
- C. Compliance Administrator
- D. Organization Management

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/assign-ediscovery-permissions?view=o365-worldwide>

QUESTION 335

Drag and Drop Question

Your company has Windows 10 Enterprise domain-joined devices in their environment.

To allow for application compatibility testing, you are instructed to postpone the installation of new Windows builds. You want to make sure that Windows is barred from updating for the ensuing 30 days. You need to configure certain Group Policy settings to achieve your goal.

Which of the following is the options you should choose? Answer by dragging the correct options from the list to the answer area.

Options

Answer

Manage preview builds

Manage Feature updates

Manage Quality updates

Select when Preview Builds and Feature Updates are received

Select when Preview Builds and Quality Updates are received
