QUESTION 238
You need to consider the underlined segment to establish whether it is accurate.
All applications will remain in a hybrid environment after migrating to Microsoft Azure.
Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required.
B. Applications that manage sensitive information
C. Applications where access requires a USB-token device
D. All legacy applications

Answer: D
Explanation:
https://cloudblogs.microsoft.com/industry-blog/financial-services/2019/04/18/microsoft-honors-legacy-systems-with-hybrid-cloud/

QUESTION 239
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
Your company plans to move their Server environment to the cloud.
You have been tasked with identifying a cloud model that allows for the current email environment to be upgraded, while also reducing server and application maintenance.
You need to make sure that the requirements are met.
Solution: You recommend the Platform as a service (PaaS) model.
Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
Email environment can be completely transferred online by adopting Exchange online service, Exchange online is SaaS.

QUESTION 240
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
Your company plans to move their Server environment to the cloud.
You have been tasked with identifying a cloud model that allows for the current email environment to be upgraded, while also reducing server and application maintenance.
You need to make sure that the requirements are met.

Solution: You recommend the Infrastructure as a service (IaaS) model.
Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
Email environment can be completely transferred online by adopting Exchange online service, Exchange online is SaaS.

QUESTION 241
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
Your company plans to move their Server environment to the cloud.
You have been tasked with identifying a cloud model that allows for the current email environment to be upgraded, while also reducing server and application maintenance.
You need to make sure that the requirements are met.
Solution: You recommend the Software as a service (SaaS) model.
Does the solution meet the goal?

A. Yes
B. No

Answer: A
Explanation:
Email environment can be completely transferred online by adopting Exchange online service, Exchange online is SaaS.

QUESTION 242
Your company makes use of Platform as a Service (PaaS) for their Azure solution.
Which of the following options are components that your IT employees are responsible for?

A. Networks.
B. Databases.
C. Applications.
D. Servers.

Answer: C
Explanation:
You manage the applications and services you develop, and the cloud service provider typically manages everything else.
https://azure.microsoft.com/en-us/overview/what-is-paas/

QUESTION 243
Your company makes use of Platform as a Service (PaaS) for their Azure solution.
Which of the following options are components that Microsoft are responsible for? (Choose all that apply).

A. Storage.
B. Databases.
C. Applications.
D. Operating system.

Answer: ABD
Explanation:

MS-900 Exam Dumps **MS-900 Exam Questions** **MS-900 PDF Dumps** **MS-900 VCE Dumps**

https://www.braindump2go.com/ms-900.html

You manage the applications and services you develop, and the cloud service provider typically manages everything else.
https://azure.microsoft.com/en-us/overview/what-is-paas/

QUESTION 244
Your company is planning to migrate to Microsoft Azure and Microsoft 365.
You are required to identify a cloud service that allows for website hosting.
Which of the following is the model you should choose?

A. Software as a Service (SaaS)
B. Platform as a Service (PaaS)
C. Infrastructure as a Service (IaaS)
D. Container as a Service (CaaS)

Answer: B
Explanation:
PaaS provides all of the capabilities that you need to support the complete web application life cycle: building, testing, deploying, managing and updating within the same integrated environment.
https://azure.microsoft.com/en-gb/overview/what-is-paas

QUESTION 245
Your company is planning to migrate to Microsoft Azure and Microsoft 365.
You are required to identify a cloud service that allows for the deployment of a Linux virtual machine.
Which of the following is the model you should choose?

A. Software as a Service (SaaS)
B. Platform as a Service (PaaS)
C. Infrastructure as a Service (IaaS)
D. Container as a Service (CaaS)

Answer: C
Explanation:
Deploying and using Virtual Machines (VMa) are Infastructure as a Service (IaaS).

QUESTION 246
You need to consider the underlined segment to establish whether it is accurate.
To ensure that when a new Microsoft Word feature is available for worker to install as soon as it becomes available, you should subscribe to the Targeted release channel.
Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required.
B. Standard release
C. Semi-annual
D. Annual

Answer: A
Explanation:
https://docs.microsoft.com/en-us/office365/admin/manage/release-options-in-office-365?view=o365-worldwide

QUESTION 247
You are employed as a Microsoft 365 administrator. Your company plans to make use of MyAnalytics.
You need to identify the different features of MyAnalytics and Workspace Analytics.
Which of the following are features of MyAnalytics? (Choose all that apply.)

A. It can only be acquired as an added reference-on license.

B. It provides team work and collaboration metrics.
C. It is included in the Office 365 ProPlus license.
D. It provides employee work and collaboration metrics

Answer: D
Explanation:
It used to only come with E5 or as an add on with E1 and E3. Now it is available for everyone with Office365, Microsoft 365 Enterprise and the Business suite.
https://www.microsoft.com/en-us/microsoft-365/blog/2019/01/02/myanalytics-the-fitness-tracker-for-work-is-now-more-broadly-available/
https://www.microsoft.com/en-us/microsoft-365/blog/2018/07/12/introducing-workplace-analytics-solutions-and-myanalytics-nudging/

QUESTION 248
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you are educating users on which component to use to register their personal home device with the company.
Which of the following is the component that should be used?

A. Microsoft Azure AD Identity Protection
B. Enterprise Mobility + Security
C. Microsoft Teams
D. Microsoft Yammer

Answer: B
Explanation:
Enterprise Mobility + Security (EMS) is a mobility management and security platform that includes services such as Azure Active Directory (Azure AD), Microsoft Intune, Azure Information Protection and Microsoft Advanced Threat Analytics.
https://learn.microsoft.com/en-us/training/modules/what-is-m365/2-describe-differences-office-365-microsoft-365-windows-365?ns-enrollment-type=learningpath&ns-enrollment-id=learn.wwl.describe-microsoft-365-core-services-concepts

QUESTION 249
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you are educating new users on which component to use for audio and visual communications with colleagues.
Which of the following is the component that should be used?

A. Microsoft Exchange Online
B. Enterprise Mobility + Security
C. Microsoft Teams
D. Microsoft SharePoint Online

Answer: C
Explanation:
https://products.office.com/en-us/microsoft-teams/group-chat-software

QUESTION 250
Your company plans to acquire a Microsoft 365 subscription.
One of the services included in the subscription is described as a cloud service that allows you to do the following:
- Store and protect files.
- Share files.
- Make use of an app or web-browser to access files from anywhere.
- Restore files to an earlier date and time.
Which of the following is the service being described above?

MS-900 Exam Dumps **MS-900 Exam Questions** **MS-900 PDF Dumps** **MS-900 VCE Dumps**

https://www.braindump2go.com/ms-900.html

A. Office 365 Pro Plus.
B. Microsoft Yammer.
C. Microsoft Office Delve.
D. Microsoft OneDrive for Business.

Answer: D
Explanation:
https://products.office.com/en-za/onedrive-for-business/online-cloud-storage

QUESTION 251
Your company plans to acquire a Microsoft 365 subscription.
One of the services included in the subscription is described as a private social network that can be used to effectively sort out support problems. It can also be used to collect feedback on projects and documents.
Which of the following is the service being described above?

A. Microsoft Teams.
B. Microsoft Yammer.
C. Microsoft Office Delve.
D. Microsoft SharePoint Online.

Answer: B
Explanation:
https://products.office.com/en-za/yammer/yammer-overview

QUESTION 252
Your company intends to deploy a number of Microsoft Surface devices that run Windows 10, using Windows AutoPilot.
You have been tasked with preparing the devices for the deployment by importing a CSV file via the Microsoft 365 Device Management portal.
Which of the following combinations of blades will help you achieve your goal?

A. The Dashboard and Device Configuration blades.
B. The Device Enrollment and Devices blades.
C. The Device Enrollment and Devices Compliance blades.
D. The Device Compliance and Device Configuration blades.

Answer: B
Explanation:
https://docs.microsoft.com/en-us/mem/autopilot/add-devices

QUESTION 253
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you have been tasked with recommending a solution that will allow users to make use of unsuited applications on their Windows 10 devices.
Which of the following should you recommend?

A. Azure AD Connect.
B. Configuration Manager.
C. Windows AutoPilot.
D. Windows Virtual Desktop.

Answer: D
Explanation:
Unsuited applications mean unsupported apps that you can run it on windows virtual desktop where you can deploy older version of windows to avoid compatibility issues.

MS-900 Exam Dumps **MS-900 Exam Questions** **MS-900 PDF Dumps** **MS-900 VCE Dumps**

https://www.braindump2go.com/ms-900.html

QUESTION 254
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you have been tasked with recommending a solution that forces cloud-based applications to use the same credentials as on-premises applications.
Which of the following should you recommend?

A. Azure AD Connect.
B. Configuration Manager.
C. Windows AutoPilot.
D. Azure AD Application Proxy.

Answer: A
Explanation:
Azure AD Connect is an on-premises Microsoft application that's designed to meet and accomplish your hybrid identity goals.

QUESTION 255
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you have been tasked with recommending a solution that prohibits users from copying corporate information from managed applications installed on unmanaged devices.
Which of the following should you recommend?

A. Windows Virtual Desktop.
B. Microsoft Intune.
C. Windows AutoPilot.
D. Azure AD Application Proxy.

Answer: B
Explanation:
Microsoft Intune is a cloud-based service that focuses on mobile device management (MDM) and mobile application management (MAM). You control how your organization's devices are used, including mobile phones, tablets, and laptops. You can also configure specific policies to control applications. For example, you can prevent emails from being sent to people outside your organization. Intune also allows people in your organization to use their personal devices for school or work. On personal devices, Intune helps make sure your organization data stays protected, and can isolate organization data from personal data.

QUESTION 256
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have recently made use of Windows Autopilot to deploy Windows 10 devices in your company's environment.
You have been asked to make sure that data that stored in OneDrive for Business is available to users from remote locations.
Solution: You enable Microsoft Azure AD multi-factor authentication for the users.
Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
https://docs.microsoft.com/en-us/onedrive/developer/rest-api/getting-started/aad-oauth?view=odsp-graph-online

QUESTION 257
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have recently made use of Windows Autopilot to deploy Windows 10 devices in your company's environment.

You have been asked to make sure that data that stored in OneDrive for Business is available to users from remote locations.
Solution: You enroll the devices in Microsoft Intune.
Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
https://docs.microsoft.com/en-us/onedrive/developer/rest-api/getting-started/aad-oauth?view=odsp-graph-online

QUESTION 258
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have recently made use of Windows Autopilot to deploy Windows 10 devices in your company's environment.
You have been asked to make sure that data that stored in OneDrive for Business is available to users from remote locations.
Solution: You inform users that they should use their Microsoft Azure AD credentials to sign in to their devices.
Does the solution meet the goal?

A. Yes
B. No

Answer: A
Explanation:
https://docs.microsoft.com/en-us/onedrive/developer/rest-api/getting-started/aad-oauth?view=odsp-graph-online

QUESTION 259
Your company makes use of Microsoft 365 in their environment.
You have been tasked with making sure that admin roles are protected. The feature you use should achieve this by requiring approvals.
Which of the following is a feature you should use?

A. Mobile application protection policy.
B. Microsoft Azure AD Identity Protection.
C. Microsoft Azure AD Privilege Identity Protection.
D. Microsoft Azure AD Conditional Access.

Answer: C
Explanation:
You can't configure or protect Admin accounts without Privileged Identity Management.
Azure AD Identity Protection is for monitoring and protecting USER accounts not ADMIN accounts.

QUESTION 260
Your company makes use of Microsoft 365 in their environment.
You have been tasked with making sure that members of the Global Administrators group are protected. The feature you use should achieve this by making use of dynamic risk profiles.
Which of the following is a feature you should use?

A. Mobile application protection policy.
B. Device configuration policy.
C. Microsoft Azure AD Privilege Identity Protection.
D. Microsoft Azure AD Conditional Access.

Answer: D

Explanation:
A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner. Organizations with Azure AD Premium P2 licenses can create Conditional Access policies incorporating Azure AD Identity Protection sign-in risk detections.
https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-identity-protection-configure-risk-policies

QUESTION 261
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have been tasked with deploying Microsoft 365 for your company in a hybrid configuration.
You want to make sure that a smart card can be used by staff for authentication purposes.
Solution: You configure the use of password hash synchronization with single-on as the hybrid identity solution.
Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
Password hash synchronization with single-on is for cloud only. ADFS would be the hybrid answer.
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn

QUESTION 262
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have been tasked with deploying Microsoft 365 for your company in a hybrid configuration.
You want to make sure that a smart card can be used by staff for authentication purposes.
Solution: You configure the use of pass-through authentication and single sign-on as the hybrid identity solution.
Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
Password hash synchronization with single-on is for cloud only. ADFS would be the hybrid answer.
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn

QUESTION 263
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have been tasked with deploying Microsoft 365 for your company in a hybrid configuration.
You want to make sure that a smart card can be used by staff for authentication purposes.
Solution: You configure the use of Active Directory Federation Services (AD FS) as the hybrid identity solution.
Does the solution meet the goal?

A. Yes
B. No

Answer: A
Explanation:
Password hash synchronization with single-on is for cloud only. ADFS would be the hybrid answer.
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn

QUESTION 264
You need to consider the underlined segment to establish whether it is accurate.

MS-900 Exam Dumps **MS-900 Exam Questions** **MS-900 PDF Dumps** **MS-900 VCE Dumps**

https://www.braindump2go.com/ms-900.html

To retrieve data for employees who request personal data under General Data Protection Regulation (GDPR) guidelines, you have to create a GDPR assessment.
Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.
What should you do?

A. No adjustment required
B. mobile application protection policy
C. device configuration policy
D. data subject request case

Answer: D
Explanation:
What is a Data Subject Request?
Regulations provide people with rights to help manage the personal data that organizations or employers collect from them. These regulations often refer to people as data subjects or consumers, and the organizations or employers with that data as data controllers, or controllers. The GDPR provides these rights to data subject within the territorial reach of the GDPR. In the United States, the CCPA provides these rights to California consumers.

QUESTION 265
You need to consider the underlined segment to establish whether it is accurate.
You are a Microsoft 365 administrator for a company whose employees are allowed to access corporate information located in the cloud via their personal devices.
You have been tasked with making sure that employees are prohibited from copying this information to their personal OneDrive folders.
You should make use of Intune App Protection.
Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required
B. Information Rights Management
C. Microsoft Azure AD Privilege Identity Protection
D. Microsoft Azure AD Identity Protection

Answer: B
Explanation:
With Intune app protection you can create and assign app protection polies. A policy rule can be a rule that is being enforced when a user tries to access or move company data, or a set of actions that are prohibited or monitored when the user is in het app. A managed app is an app that has app protection policies applied and can be managed by Intune.

QUESTION 266
Your company has a Microsoft Office 365 subscription.
You have been tasked with removing customer information in compliance with General Data Protection Regulation (GDPR), after the customer generated data subject request (DSR). You want to make sure that legal holds are placed on relevant information if the opportunity arises.
You want to start searching for the client's information by using Content Search eDiscovery.
Which of the following applications can be searched with this method? (Choose two.)

A. Microsoft PowerApps
B. Microsoft Outlook
C. Microsoft Access
D. Microsoft SharePoint Online

Answer: BD
Explanation:

You can use the Content search eDiscovery tool in the Microsoft 365 compliance center to search for in-place content such as email, documents, and instant messaging conversations in your organization. Use this tool to search for content in these cloud-based Microsoft 365 data sources:
- Exchange Online mailboxes
- SharePoint Online sites and OneDrive for Business accounts
- Microsoft Teams
- Microsoft 365 Groups
- Yammer Groups
https://docs.microsoft.com/en-us/microsoft-365/compliance/content-search?view=o365-worldwide

QUESTION 267
You have been tasked with configuring a data governance strategy that allows for data classification. It should also allow for these classifications to be enforced.
Which of the following should form part of your strategy? (Choose two.)

A. Apply Microsoft SharePoint permissions.
B. Publish labels.
C. Configure Microsoft Outlook Mail Tips.
D. Apply supervision policies.
E. Apply retention policies.
F. Apply preservation policies.

Answer: BD
Explanation:
The question has two requirements, "allows for data classification," and, "allow for these classifications to be enforced." There is no requirement for data retention. "Publish Labels" allows for data classification, and "Apply Supervision Policies" allows for the enforcement of corporate policies, risk management, and regulator compliance.
https://techcommunity.microsoft.com/t5/security-compliance-and-identity/use-supervision-to-monitor-email-microsoft-teams-manage-risk/ba-p/325827

QUESTION 268
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you are required to configure the use of a cloud security feature that allows for emails and documents to be classified and labeled.
Which of the following is the feature you should use?

A. Microsoft Azure Information Protection.
B. Microsoft Azure AD Identity Protection.
C. Microsoft Azure AD Privilege Identity Protection.
D. Intune App Protection.

Answer: A
Explanation:
Identity Protection is automated AI technology to protect user accounts from anomalies.
Privileged identity protection is for dynamic role-based for Administrators to work with limited access to prevent inside organization risks.
https://docs.microsoft.com/en-us/azure/information-protection/what-is-information-protection

QUESTION 269
After acquiring a Microsoft 365 E5 subscription, you are tasked with applying security features.
You are currently configuring a security feature that allows you to control how a Microsoft support engineer accesses information during a help session.
Which of the following is the feature you are configuring?

A. Customer Lockbox.
B. Data Governance.

C. Data Loss Prevention.
D. Microsoft Defender for Office 365.

Answer: A
Explanation:
https://docs.microsoft.com/en-us/microsoft-365/compliance/customer-lockbox-requests?view=o365-worldwide

QUESTION 270
After acquiring a Microsoft 365 E5 subscription, you are tasked with applying security features.
You are currently configuring a security feature that allows you to protect against unidentified malware, viruses, and malicious URLs.
Which of the following is the feature you are configuring?

A. Microsoft Azure AD Identity Protection.
B. Data Governance.
C. Microsoft Azure AD Conditional Access.
D. Microsoft Defender for Office 365.

Answer: D

QUESTION 271
You need to consider the underlined segment to establish whether it is accurate.
You have been tasked with acquiring Microsoft 365 Enterprise licenses for your organization.
You should contact a Cloud Solution Provider (CSP) or subscribe to a Microsoft Enterprise Agreement (EA).
Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.
Which two options can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. No adjustment required
B. contact a Cloud Solution Provider (CSP) or use a company credit card via the Microsoft website
C. subscribe to a Microsoft Enterprise Agreement (EA) or visit a Microsoft retail store
D. use a company credit card via the Microsoft website or visit a Microsoft retail store subscription from

Answer: A
Explanation:
If you want to get Microsoft Enterprise Agreement (EA) you have to contact a specialist. So you can not do this with a credit card.

QUESTION 272
Your company has a Microsoft 365 subscription.
After a Microsoft 365 outage, the Service Health Dashboard indicates no issues with the service.
You check the Service Health Dashboard and observe that the service is healthy.
You then access the Post-Incident Review (PIR).
Which of the following is the maximum time, after an incident has been resolved, that you have to wait for a preliminary Post-Incident Review (PIR) to be delivered via your Service Health Dashboard?

A. 12 hours.
B. 24 hours.
C. 48 hours.
D. 5 business days.

Answer: C
Explanation:
https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-health-and-continuity#post-incident-reviews:

MS-900 Exam Dumps MS-900 Exam Questions MS-900 PDF Dumps MS-900 VCE Dumps

https://www.braindump2go.com/ms-900.html

For unplanned customer-impacting service incidents in which there was broad and noticeable impact across a large number of organizations, a preliminary Post-Incident Review (PIR) will be delivered via your Service Health Dashboard within 48 hours of incident resolution, followed by a final PIR within five business days.

QUESTION 273
A retail company is planning to upgrade their Windows 7 point-of-sale terminals to Windows 10.
You have been informed that the terminals should only be upgraded again after a minimum of five years. Your solution has to allow for the scheduling of upgrades and updates to be executed consistently for al devices, while also keeping costs to a minimum.
Which of the following is the version of windows you should upgrade to?

A. Windows 10 Home
B. Windows 10 Pro
C. Windows 10 Enterprise
D. Windows 10 Enterprise LTSC

Answer: D
Explanation:
https://docs.microsoft.com/en-us/windows/deployment/update/waas-overview#long-term-servicing-channel

QUESTION 274
A retail company is planning to upgrade their Windows 7 point-of-sale terminals to Windows 10.
You have been informed that the terminals should only be upgraded again after a minimum of five years. Your solution has to allow for the scheduling of upgrades and updates to be executed consistently for al devices, while also keeping costs to a minimum.
Which of the following is the servicing tool that you should use?

A. Windows Autopilot
B. Windows Server Update Services
C. Microsoft Intune
D. Azure AD Connect

Answer: B
Explanation:
Windows Server Update Services (WSUS) provides extensive control over Windows 10 updates and is natively available in the Windows Server operating system. In addition to the ability to defer updates, organizations can add an approval layer for updates and choose to deploy them to specific computers or groups of computers whenever ready.

QUESTION 275
You need to consider the underlined segment to establish whether it is accurate.
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you want to check what the repercussions are if the availability terms of the Microsoft Office 365 services are not satisfied.
You analyze the Service Level agreement.
Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required.
B. analyze the Microsoft Cloud agreement
C. access Data Governance
D. analyze the Microsoft Enterprise agreement

Answer: A
Explanation:
https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-level-agreement

QUESTION 276
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have been tasked with deploying Microsoft Office to company using a subscription-based licensing model.
The version of Office you deploy should allow for Office application settings to be enforced via group policy.
Solution: You deploy Office Professional Plus 2016.
Does the solution meet the goal?

 A. Yes
 B. No

Answer: B
Explanation:
Only Office 365 ProPlus can be bought with subscription, other version of office, including the 2016 version can be bought only by license.
https://products.office.com/en-za/business/compare-more-office-365-for-business-plans

QUESTION 277
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have been tasked with deploying Microsoft Office to company using a subscription-based licensing model.
The version of Office you deploy should allow for Office application settings to be enforced via group policy.
Solution: You deploy Office Home and Business 2016.
Does the solution meet the goal?

 A. Yes
 B. No

Answer: B
Explanation:
Only Office 365 ProPlus can be bought with subscription, other version of office, including the 2016 version can be bought only by license.
https://products.office.com/en-za/business/compare-more-office-365-for-business-plans

QUESTION 278
Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
You have been tasked with deploying Microsoft Office to company using a subscription-based licensing model.
The version of Office you deploy should allow for Office application settings to be enforced via group policy.
Solution: You deploy Office 365 ProPlus.
Does the solution meet the goal?

 A. Yes
 B. No

Answer: A
Explanation:
Only Office 365 ProPlus can be bought with subscription, other version of office, including the 2016 version can be bought only by license.
https://products.office.com/en-za/business/compare-more-office-365-for-business-plans

QUESTION 279
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you have been tasked with assigning Microsoft 365 licenses to users in a department where audio-conferencing is not required. The department does, however, require office desktop products to complete tasks.

MS-900 Exam Dumps MS-900 Exam Questions MS-900 PDF Dumps MS-900 VCE Dumps

https://www.braindump2go.com/ms-900.html

Which of the following is the license that would help you achieve this?

A. Office 365 ProPlus
B. Microsoft 365 E1
C. Office 365 E3
D. Office 365 E5

Answer: C
Explanation:
https://www.microsoft.com/en-us/microsoft-365/compare-all-microsoft-365-plans

QUESTION 280
Your company has a Microsoft Office 365 subscription.
As an administrator for this subscription, you have been tasked with assigning Microsoft 365 licenses for a department where users need to collaborate with other users and also check their job schedules on a weekly basis. The department does not, however, require office desktop products to complete tasks.
Which of the following is the license that would help you achieve this?

A. Office 365 F1
B. Microsoft 365 E1
C. Office 365 E3
D. Office 365 E5

Answer: B
Explanation:
E1 is correct as user can collaborate online and don't need desktop version. F1 is for frontline support.
