QUESTION 259

Your company makes use of Microsoft 365 in their environment.

You have been tasked with making sure that admin roles are protected. The feature you use should achieve this by requiring approvals.

Which of the following is a feature you should use?

- A. Mobile application protection policy.
- B. Microsoft Azure AD Identity Protection.
- C. Microsoft Azure AD Privilege Identity Protection.
- D. Microsoft Azure AD Conditional Access.

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/overview>

QUESTION 260

Your company makes use of Microsoft 365 in their environment.

You have been tasked with making sure that members of the Global Administrators group are protected. The feature you use should achieve this by making use of dynamic risk profiles.

Which of the following is a feature you should use?

- A. Mobile application protection policy.
- B. Device configuration policy.
- C. Microsoft Azure AD Privilege Identity Protection.
- D. Microsoft Azure AD Conditional Access.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure>

QUESTION 261

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have been tasked with deploying Microsoft 365 for your company in a hybrid configuration.

You want to make sure that a smart card can be used by staff for authentication purposes.

Solution: You configure the use of password hash synchronization with single-on as the hybrid identity solution.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 262

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have been tasked with deploying Microsoft 365 for your company in a hybrid configuration.

You want to make sure that a smart card can be used by staff for authentication purposes.

Solution: You configure the use of pass-through authentication and single sign-on as the hybrid identity solution. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

QUESTION 263

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You have been tasked with deploying Microsoft 365 for your company in a hybrid configuration.

You want to make sure that a smart card can be used by staff for authentication purposes.

Solution: You configure the use of Active Directory Federation Services (AD FS) as the hybrid identity solution. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

QUESTION 264

You need to consider the underlined segment to establish whether it is accurate.

To retrieve data for employees who request personal data under General Data Protection Regulation (GDPR) guidelines, you have to create a GDPR assessment.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

What should you do?

- A. No adjustment required
- B. mobile application protection policy
- C. device configuration policy
- D. data subject request case

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365>

QUESTION 265

You need to consider the underlined segment to establish whether it is accurate.

You are a Microsoft 365 administrator for a company whose employees are allowed to access corporate information located in the cloud via their personal devices.

You have been tasked with making sure that employees are prohibited from copying this information to their personal OneDrive folders.

You should make use of Intune App Protection.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select

the accurate option.

- A. No adjustment required
- B. Information Rights Management
- C. Microsoft Azure AD Privilege Identity Protection
- D. Microsoft Azure AD Identity Protection

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

QUESTION 266

Your company has a Microsoft Office 365 subscription.

You have been tasked with removing customer information in compliance with General Data Protection Regulation (GDPR), after the customer generated data subject request (DSR). You want to make sure that legal holds are placed on relevant information if the opportunity arises.

You want to start searching for the client's information by using Content Search eDiscovery.

Which of the following applications can be searched with this method? (Choose two.)

- A. Microsoft PowerApps
- B. Microsoft Outlook
- C. Microsoft Access
- D. Microsoft SharePoint Online

Answer: BD

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365#part-1-responding-to-dsrs-for-customer-data>

QUESTION 267

You have been tasked with configuring a data governance strategy that allows for data classification. It should also allow for these classifications to be enforced.

Which of the following should form part of your strategy? (Choose two.)

- A. Apply Microsoft SharePoint permissions.
- B. Publish labels.
- C. Configure Microsoft Outlook Mail Tips.
- D. Apply supervision policies.
- E. Apply retention policies.
- F. Apply preservation policies.

Answer: BD

Explanation:

<https://www.recordpoint.com/advanced-data-governance-labels/>

QUESTION 268

Your company has a Microsoft Office 365 subscription.

As an administrator for this subscription, you are required to configure the use of a cloud security feature that allows for emails and documents to be classified and labeled.

Which of the following is the feature you should use?

- A. Microsoft Azure Information Protection.
- B. Microsoft Azure AD Identity Protection.
- C. Microsoft Azure AD Privilege Identity Protection.
- D. Intune App Protection.
