**QUESTION 1120**

A network technician is assisting a user cannot connect to a wireless connection. The user is connecting to the correct SSID and has the correct pre-shared key. The technician verifies the WAP is working, and other clients are connected to it from same location. Which of the following should the technician investigate?

- A. Channel overlap
- B. Wireless frequency
- C. AP power levels
- D. Encryption type

**Answer: A**

**QUESTION 1121**

A technician needs a way to allow clients to access a new application server on the network. Which of the following should the technician set up to achieve this objective? (Select TWO)

- A. DHCP MAC reservation
- B. DNS SRV record
- C. DNS reverse zone
- D. DHCP scope option
- E. DHCP IP reservation
- F. Cloud-hosted DNS

**Answer: A**

**QUESTION 1122**

A technician needs to manage a Linux-based system from the GUI remotely. Which of the technician should the technician deploy?

- A. RDP
- B. SSH
- C. VNC
- D. Telnet

**Answer: B**

**QUESTION 1123**

Which of the following BEST explains why a firewall would be subject to international export controls?

- A. Protected industry
- B. IP version incompatibility
- C. Differing power standards
- D. Encryption technology

**Answer:** C

**QUESTION 1124**

In which of the following layers of the OSI model is checksum added to the end of an Ethernet frame?

- A. Layer 2
- B. Layer 3
- C. Layer 4
- D. Layer 5

**Answer:** A

**QUESTION 1125**

Which of the following components should be used to provide interconnectivity between virtual machines in distinct broadcast domains inside the hypervisor's environment?

- A. Virtual router
- B. Virtual switch
- C. Virtual NIC
- D. Virtual SAN

**Answer:** A

**QUESTION 1126**

Which of the following would MOST likely provide continuous power during a short brownout?

- A. Uninterruptible power supply
- B. Hot site
- C. Cold site
- D. Generator
- E. Redundant power supplies

**Answer:** A

**QUESTION 1127**

A network technician receives a call from Joe, a user about slow speeds when he copies large files from the file server. Other users can copy the same files in a matter of seconds. Prior to experiencing the slow speeds, Joe moved the computer farther from the network jack and built his own Cat5 cable.

During troubleshooting the on-site network technician observes Joe is only getting a 10Mbps connection speed while everyone else who is connected to the switch is getting 1000Mbps. Which of the following should the network technician check NEXT? (Select TWO)

- A. Total length
- B. RJ45 terminations
- C. Desktop hardware
- D. Switch configuration
- E. Cable type
- F. Latency

**Answer:** BE

**QUESTION 1128**

While troubleshooting a connectivity issue, a network technician successfully pinged the loopback address and external DNS server but was unable to ping the website's URL.

Which of the following tools should the technician use to determine where the network issue is located?

- A. Nmap
- B. netstat
- C. nslookup
- D. ipconfig
- E. tracer

**Answer: E**

**QUESTION 1129**

Which of the following are reasons for enabling jumbo frames? (Select TWO)

- A. To increase payload size
- B. To increase bandwidth
- C. To provide additional SANs storage capacity
- D. To implement larger SQL queries
- E. To reduce CPU overhead

**Answer: AE**

**QUESTION 1130**

A network engineer is adding a second router to the company's topology to connect a new wing of the building. The second router will be in the same server room as the first router and does not support auto-MDX.

Which of the following describes how the routers should be connected to each other?

- A. Connect the second router to the first router with a crossover cable.
- B. Use a straight-through cable to connect the two routers together.
- C. Connect the two routers with vendor-specific console cables.
- D. Connect the AUX ports directly between the two routers.

**Answer: A**

**QUESTION 1131**

A network technician is installing a network printer in a factory setting. The connection from the switch contains an LC connector, yet the printer only supports an RJ45 connector.

Which of the following should the technician use?

- A. Range extender
- B. Media converter
- C. Multilayer switch
- D. Load balancer

**Answer: A**

**QUESTION 1132**

A network technician is implementing a new IPv6 addressing scheme at a local office.

This is a large office, and the network manager would like a solution that saves time and allows for automatic addressing of nodes.

Which of the following would BEST accomplish this?

- A. APIPA
- B. 6 to 4 tunnel
- C. NAT64
- D. EUI-64

**Answer:** A

**QUESTION 1133**

As part of a new datacenter upgrade project, the security manager has asked for additional physical security to prevent asset theft. Which of the following technologies should be implemented?

- A. Video surveillance
- B. Motion detection alarms
- C. Asset tracking tags
- D. Locks on devices

**Answer:** B

**QUESTION 1134**

A network administrator is concerned about the management traffic between a machine and the corporate router. Which of the following protocols should the administrator use to prevent a security breach?

- A. VNC
- B. SSH
- C. RDP
- D. SFTP

**Answer:** B

**QUESTION 1135**

A network technician needs to visit a datacenter. To be admitted the security officer requests to see a driver's license, and then directs the technician to a fingerprint scanner. Which of the following authentication factors is the facility requiring for admittance? Select TWO).

- A. Something you have
- B. Something you know
- C. Something you do
- D. Something you are
- E. Somewhere you are

**Answer:** BE
