QUESTION 11

When configuring a wireless network for dynamic VLAN allocation, which three IETF attributes must be supplied by the radius server? (Choose three.)

- A. 81 Tunnel-Private-Group-ID
- B. 65 Tunnel-Medium-Type
- C. 83 Tunnel-Preference
- D. 58 Egress-VLAN-Name
- E. 64 Tunnel-Type

Answer: ABE

Explanation:

The RADIUS user attributes used for the VLAN ID assignment are:

IETF 64 (Tunnel Type)--Set this to VLAN.

IETF 65 (Tunnel Medium Type)--Set this to 802

IETF 81 (Tunnel Private Group ID)--Set this to VLAN ID.

Reference: <https://www.cisco.com/c/en/us/support/docs/wireless-mobility/wireless-vlan/71683-dynamicvlan-config.html>

QUESTION 12

Where in the controller interface can you find a wireless client's upstream and downstream link rates?

- A. On the AP CLI, using the cw_diag ksta command
- B. On the controller CLI, using the diag wireless-controller wlac -d sta command
- C. On the AP CLI, using the cw_diag -d sta command
- D. On the controller CLI, using the WiFi Client monitor

Answer: B

QUESTION 13

Which administrative access method must be enabled on a FortiGate interface to allow APs to connect and function?

- A. Security Fabric
- B. SSH
- C. HTTPS

[NSE6_FWF-6.4 PDF Dumps](#) [NSE6_FWF-6.4 VCE Dumps](#)

<https://www.braindump2go.com/nse6-fwf-6-4.html>

D. FortiTelemetry

Answer: A

Explanation:

<https://docs.fortinet.com/document/fortigate/6.2.9/cookbook/788897/configuring-the-root-fortigate-and-downstream-fortigates>

QUESTION 14

You are investigating a wireless performance issue and you are trying to audit the neighboring APs in the PF environment. You review the Rogue APs widget on the GUI but it is empty, despite the known presence of other APs. Which configuration change will allow neighboring APs to be successfully detected?

- A. Enable Locate WiFi clients when not connected in the relevant AP profiles.
- B. Enable Monitor channel utilization on the relevant AP profiles.
- C. Ensure that all allowed channels are enabled for the AP radios.
- D. Enable Radio resource provisioning on the relevant AP profiles.

Answer: D

Explanation:

The ARRP (Automatic Radio Resource Provisioning) profile improves upon DARRP (Distributed Automatic Radio Resource Provisioning) by allowing more factors to be considered to optimize channel selection among FortiAPs. DARRP uses the neighbor APs channels and signal strength collected from the background scan for channel selection. Reference: <https://docs.fortinet.com/document/fortigate/6.4.0/new-features/228374/add-arrp-profile-for-wireless-controller-6-4-2>

QUESTION 15

Which two roles does FortiPresence analytics assist in generating presence reports? (Choose two.)

- A. Gathering details about on site visitors
- B. Predicting the number of guest users visiting on-site
- C. Comparing current data with historical records
- D. Reporting potential threats by guests on site

Answer: AB

Explanation:

<https://fortinetweb.s3.amazonaws.com/docs.fortinet.com/v2/attachments/457ebad4-2437-11e9-b20a-f8bc1258b856/FortiPresence-v2.0-getting-started.pdf>

QUESTION 16

Six APs are located in a remotely based branch office and are managed by a centrally hosted FortiGate. Multiple wireless users frequently connect and roam between the APs in the remote office. The network they connect to, is secured with WPA2-PSK. As currently configured, the WAN connection between the branch office and the centrally hosted FortiGate is unreliable. Which configuration would enable the most reliable wireless connectivity for the remote clients?

- A. Configure a tunnel mode wireless network and enable split tunneling to the local network
- B. Configure a bridge mode wireless network and enable the Local standalone configuration option
- C. Configure a bridge mode wireless network and enable the Local authentication configuration option
- D. Install supported FortiAP and configure a bridge mode wireless network

Answer: A

QUESTION 17

Refer to the exhibit.

If the signal is set to -68 dB on the FortiPlanner site survey reading, which statement is correct regarding the coverage area?

- A. Areas with the signal strength equal to -68 dB are zoomed in to provide better visibility
- B. Areas with the signal strength weaker than -68 dB are cut out of the map
- C. Areas with the signal strength equal or stronger than -68 dB are highlighted in multicolor
- D. Areas with the signal strength weaker than -68 dB are highlighted in orange and red to indicate that no signal was propagated by the APs.

Answer: C

QUESTION 18

Which statement describes FortiPresence location map functionality?

- A. Provides real-time insight into user movements
- B. Provides real-time insight into user online activity
- C. Provides real-time insight into user purchase activity
- D. Provides real-time insight into user usage stats

Answer: D

Explanation:

This geographical data analysis provides real-time insights into user behavior.

The exhibits show the diagnose debug log of a station connection taken on the controller CLI. Which security mode is used by the wireless connection?

- A. WPA2 Enterprise
- B. WPA3 Enterprise

[NSE6_FWF-6.4 Exam Dumps](#) [NSE6_FWF-6.4 Exam Questions](#)

<https://www.braindump2go.com/nse6-fwf-6-4.html>

- C. WPA2 Personal and radius MAC filtering
- D. Open, with radius MAC filtering

Answer: A

Explanation:

Best security option is WPA2-AES.

Reference: <https://www.esecurityplanet.com/trends/the-best-security-for-wireless-networks/>

QUESTION 20

Which of the following is a requirement to generate analytic reports using on-site FortiPresence deployment?

- A. SQL services must be running
- B. Two wireless APs must be sending data
- C. DTLS encryption on wireless traffic must be turned off
- D. Wireless network security must be set to open

Answer: B

Explanation:

FortiPresence VM is deployed locally on your site and consists of two virtual machines. All the analytics data collected and computed resides locally on the VMs.

Reference: https://fortinetweb.s3.amazonaws.com/docs.fortinet.com/v2/attachments/30bd9962-44e8-11eb-b9ad-00505692583a/FortiPresence_VM-1.0.0-Administration_Guide.pdf

QUESTION 21

Which two phases are part of the process to plan a wireless design project? (Choose two.)

- A. Project information phase
- B. Hardware selection phase
- C. Site survey phase
- D. Installation phase

Answer: CD

Explanation:

<https://www.sciencedirect.com/topics/computer-science/wireless-site-survey>

<https://www.automation.com/en-us/articles/2015-2/wireless-device-network-planning-and-design>

QUESTION 22

When enabling security fabric on the FortiGate interface to manage FortiAPs, which two types of communication channels are established between FortiGate and FortiAPs? (Choose two.)

- A. Control channels
- B. Security channels
- C. FortLink channels
- D. Data channels

Answer: AD

Explanation:

The control channel for managing traffic, which is always encrypted by DTLS. | The data channel for carrying client data packets.
