- A. Microsoft Defender for Cloud Apps
- B. Microsoft Defender for Endpoint
- C. Microsoft Defender for Identity
- D. Microsoft Defender for Office 365

**Answer: B**

**QUESTION 115**

Which two Azure resources can a network security group (NSG) be associated with? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. a network interface
- B. an Azure App Service web app
- C. a virtual network
- D. a virtual network subnet
- E. a resource group

**Answer: CE**

**Explanation:**

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources.

**QUESTION 116**

What is an assessment in Compliance Manager?

- A. A grouping of controls from a specific regulation, standard or policy.
- B. Recommended guidance to help organizations align with their corporate standards.
- C. A dictionary of words that are not allowed in company documents.
- D. A policy initiative that includes multiple policies.

**Answer: B**

**Explanation:**

Microsoft Purview Compliance Manager is a feature in the Microsoft Purview compliance portal that helps you manage your organization's compliance requirements with greater ease and convenience. Compliance Manager can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, and reporting to auditors. Watch the video below to learn how Compliance Manager can help simplify how your organization manages compliance:

Compliance Manager helps simplify compliance and reduce risk by providing:

Pre-built assessments for common industry and regional standards and regulations, or custom assessments to meet your unique compliance needs (available assessments depend on your licensing agreement; learn more).

Workflow capabilities to help you efficiently complete your risk assessments through a single tool. Detailed step-by-step guidance on suggested improvement actions to help you comply with the standards and regulations that are most relevant for your organization. For actions that are managed by Microsoft, you'll see implementation details and audit results. A risk-based compliance score to help you understand your compliance posture by measuring your progress in completing improvement actions.

**Answer:**

Microsoft Defender for Cloud Apps
Microsoft Defender for Endpoint
Microsoft Defender for Identity
Microsoft Defender for Office 365

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

**Explanation:**

Microsoft Defender for Identity (formerly Azure Advanced Threat Protection, also known as Azure ATP) is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.
